Economics Of The Modern Construction Firm:

The Economics of the Modern Construction Firm S. Gruneberg, Graham J. Ive, 2000-08-08 This is a book about the whole diverse range of firms that are found in the construction sector about their decision making and the economic environments in which they operate The authors aim to provide a new and coherent perspective on these firms and the choices they have to make both for their managers and for all who have a stake in these firms and their industry This book offers some new and important perspectives for research and teaching about construction firms *The Economics of the Modern Construction Sector* G. Ive, S. Gruneberg, 2000-07-31 This book will be of interest to built environment professionals and to students of the economics and management of the built environment It shows the value of integrating ideas and data about the production of the built environment as an industrial process with theories and data about the demand for construction The approach taken is institutional and post Keynesian and illuminates an important and distinctive sector of the economy embracing design construction and property industries This book offers some new and important perspectives for research and teaching in construction economics and management *Modern Construction Economics* Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics **Research**

Companion to Construction Economics Ofori, George, 2022-03-15 This innovative Research Companion considers the history nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline It presents a state of the art review of construction economics identifying areas for further research

Describing Construction Rick Best, Jim Meikle, 2022-09-16 This third book from editors Rick Best and Jim Meikle brings together and presents insights into a number of key concepts in the study of construction firms projects and the group of activities that loosely define the construction industry The value for readers comes from the collection of a variety of topics in a single volume which provide a basic understanding of the complexities of construction as more than a set of practical concerns such as labour management and materials handling Instead the focus is on analysis of the industry and its component parts from the viewpoints of construction economists and others seeking to understand the drivers and challenges that shape an area of economic activity that is a major contributor in all economies The aim of this book is to provide an overview and discussion of several aspects of what makes construction tick It is unlike other industry sectors in many ways being project based with often intense competition for work Where the first book *Measuring Construction* focused on particular areas associated with quantifying various aspects of construction activity and the second *Accounting for Construction* looked more at how we record and report on construction activity *Describing Construction* gives readers the views of experts in the field of how the construction industry is described what its make up is it even asks the question is

construction a single industry This book will change the way most readers understand the construction industry whatever that may be not from the point of view of visible on site activities but through a scientific approach to analysis and understanding of how projects firms and various sectors of the industry work and how things are changing and may continue to change in future It is essential reading for students and researchers in construction management quantity surveying architecture and engineering
