Economics Society And Values:

Economics, Society, and Values Owen Nankivell, 1995 **Proceedings of the Conferences, Agricultural Economics Society** Agricultural Economics Society (Great Britain), 1928 **The Theory of Value and Distribution in Economics** Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments **Historical materialism and the economics of Karl Marx** Benedetto Croce, 2019-11-27 In *Historical Materialism and the Economics of Karl Marx* Benedetto Croce offers a profound analysis of Marxian economics through the lens of historical materialism a framework that prioritizes social and economic factors in understanding historical development Croce engages with Marx's work dissecting its philosophical underpinnings and advocating for a synthesis of idealism and materialism His incisive prose weaves rigorous philosophical argument with historical context illustrating how economic structures influence societal evolution As a philosopher with a passion for intertextual dialogue Croce situates Marx's theories within the broader tapestry of European intellectual history critiquing and contextualizing them against the backdrop of contemporary socio-political climates A prominent figure in Italian philosophy Benedetto Croce was deeply influenced by his early exposure to Hegelian idealism and later Marxist thought As a historian politician and cultural commentator his experiences during tumultuous periods in Italy including the rise of Fascism informed his writings Croce sought to reconcile idealist philosophy with tangible social realities leading him to explore Marx's economic theories critically while grappling with their implications Croce's *Historical Materialism and the Economics of Karl Marx* is essential reading for scholars and students alike offering a comprehensive understanding of Marx's economics through a philosophical lens This book is a valuable resource for those seeking to contextualize Marxist theory within modern philosophical discourse enhancing the reader's appreciation of the complexities of socio-economic analysis **Values and Valuables** Cynthia Ann Werner, Duran Bell, 2004 This volume brings together anthropologists and economists to discuss the complex ways in which different cultures imbue material objects with symbolic qualities whose value cannot be reduced to material or monetary

equivalents **Facts, Values and Objectivity in Economics** José Castro Caldas,Vítor Neves,2012-03-22 Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions Institutional Economics Wendell Gordon,2014-07-03 Wendell Gordon presents the philosophy of economic institutionalism clearly and evocatively in the tradition of the pragmatism of Peirce James and Dewey In Gordon s view the institutionalism of Veblen and Ayres the only indigenous American school of economic thought offered the most hope for understanding and solving the economic problems of the twentieth century The institutional approach long known as the Texas School looks at social order as ongoing process The effort to explain how our attitudes have developed and how they are changed is central to this approach Gordon argues that the dynamics of technical change the institutionalism of behavior norms human biology and the resource endowment of the universe interact to create and change these attitudes Gordon thoroughly analyzes both orthodox and Marxist economic approaches with regard to institutional economics He also examines such other radical approaches as underconsumption and the single tax There is a discussion of the procedures and problems involved in testing for the validity of institutional theory and the analysis of economic problems in the institutional frame of reference In addition inflation energy multinationals property rights business organization unemployment and other issues are considered from an institutional perspective

The Value Orientations of Buddhist and Christian Entrepreneurs Gábor Kovács,2020-07-30 This book is a comparative analysis of the value orientations of Buddhist and Christian entrepreneurs and how these values impact business The chapters review and analyze the concepts of Buddhist economics and the social teaching of the Roman Catholic Church The value orientations of Buddhist and Christian entrepreneurs are described by irreducible core values that correspond to the ontological conception the procedural dimension and the other directedness of a spiritual value commitment in business The book includes the reflections of Buddhist and Christian entrepreneurs about business spirituality profit the temporal perspectives of business and stakeholder management The cases testify that a spiritual value orientation can contribute to creating genuine ethical commitment The findings and the examples can encourage business scholars and practitioners to stop considering ethics as an instrument in the service of profit and serve as inspiration for integrating spirituality into business in a profound way This book will be of interest to scholars studying business ethics workplace spirituality and faith at work **Value of Information and Flexibility** Martin J. Vilela,Gbenga F. Oluyemi,2021-10-21 This book presents a

consistent methodology for making decisions under uncertain conditions as is almost always the case Tools such as value of information and value of flexibility are explored as a means to make more complex and nuanced decisions The book develops the complete formalism for assessing the value of acquiring information with two novel approaches Firstly it integrates the fuzzy characteristics of data and secondly develops a methodology for assessing data acquisition actions that optimize the value of projects from a holistic perspective The book also discusses the formalism for including flexibility in the project decision assessment Practical examples of oil and gas related decision problems are included and discussed to facilitate the learning process This book provides valuable advice and case studies applicable to engineers researchers and graduate students particularly in the oil and gas industry and pharmaceutical industry

Islamic Financial Economy and Islamic Banking Masudul Alam Choudhury, 2016-06-10 Islamic Financial Economy and Islamic Banking is a thorough deeply conceptual analytical and applied work in the area of epistemological foundation of Islamic world system The book presents a new frontier of original contribution to the theme of generalized system model of shari ah The model derived from the Qur an and Sunnah Prophetic guidance incorporates a wide analytical coverage of the purpose and objective of the Islamic worldview maqasid as shari ah in Islamic economics and finance in particular The author covers issues that contrast with the existing understanding of Islamic economics and finance including some specific goals defining the field and how they compare in today s unstable world of financial volatility A new heterodox thinking in economic theory is outlined The potential as to how such issues can be addressed by the Tawhidi epistemology in formulating the generalized system model of the purpose and objective of shari ah lead the way in this book Its presentation and analysis methods and approach overarch the fields of philosophy of science rigorous analysis mathematical and other presentations of the understanding given and all taken up in the light of the exegesis of the Qur an and coverage of the Sunnah The result is a substantive one in the field of scholarship and application and in analytically proving the universality and uniqueness of the epistemic worldview for the academic and practitioner world at large The totality of the multiverse diversity of issues and problems reviewed comprise the study of the world system by the Tawhidi methodological approach Yet this methodology and its empirical configuration are universally applicable to all users without any need for unnecessary religious overtone
