Managing Innovation in Japan Chihiro Watanabe, 2009-04-21 This book summarizes highlights of the investigation of An Elucidation of the Role of Institutional Systems in Characterizing Technology Development Trajectories A Global Comparative Analysis of Manufacturing Technology and Information Technology in the Enhancement of Business Practice supported by Grant in Aid for Scientific Research S by Japan's Ministry of Education Culture Sports Science and Technology Japan Society for Science Policy over the period 2002-2006 Background and objectives of the investigation are summarized as follows a Japan ranks far below the level of the USA with respect to the development and utilization of information technology IT in the information society that emerged in the 1990s b This can be attributed to a vicious cycle between Japan's non-elastic institutions insufficient utilization of the potential benefits of IT and economic stagnation c The source of such a vicious cycle can be derived from the fundamental differences of the characterizing process of technology between manufacturing technology MT and IT during their diffusion processes This investigation attempted to elucidate this mechanism Noteworthy findings obtained include a MT has been developed largely by the supply side and its functionality is established during the stage of its supply to the market In contrast IT is strongly driven by the demand side and its functionality is created through diffusion in a self-propagating way This contrast can be clearly observed in the dramatic advancement of Japan's mobile phone industry in the late 1990s

Economic Catch-up and Technological

Leapfrogging Keun Lee, 2016-08-26 This book elaborates upon the dynamic changes to Korean firms and the economy from the perspective of catch-up theory The central premise of the book is that a latecomer's sustained catch-up is not possible by simply following the path of the forerunners but by creating a new path or leapfrogging In this sense the idea of catch-up distinguishes itself from traditional views that focus on the role of the market or the state in development

The Economics of Persistent Innovation: An Evolutionary View Christian Bas, William Latham, 2009-06-04 William Latham Christian Le Bas Persistence of firm innovative behavior became an important topic in applied industrial organization with the publication of the seminal empirical work of P Geroski and his colleagues 1997 Evidence that firms innovate persistently has led previous studies to focus on the determinants of innovation persistence and on its heterogeneity across industries technologies and countries The aims of this book are 1 to illumine the scale and scope of the phenomenon of persistence in innovation and 2 to account for the principal factors that explain why some firms innovates persistently and others do not Because this book deals intensively and extensively with the subject of firm innovation persistence which is not as yet a well known term we need to provide a nontrivial definition of it that encompasses the full range topics we want to address and aids our understanding of how they are related to each other We begin with a careful identification of innovation Our first definition is drawn from K Pavitt 2003 innovation processes involve the exploration and exploitation of opportunities for a new or improved product process or service based either on an advance in technical practice or a change in market demand or a combination of the two While this definition is clear and conforms well to both our empirical and theoretical perspectives some elaboration may help to clarify the concept

Technological Systems in the Bio Industries B. Carlsson, 2012-12-06 Technological Systems in the Bio Industries An International Study represents a comprehensive interdisciplinary and systematic effort to understand the nature and role of technological change in a rapidly evolving arena of economic activity that can be loosely referred to as

the bio industries These include biomedical industries that deliver goods and services used in health care including those based on genetic engineering as well as applications of biotechnology in other industries such as agriculture food production and the forest industries This volume is the third in a continuing series of studies on technological systems it seeks to identify and address new sets of conceptual and methodological issues in analyzing innovation systems particularly as regards the delimitation of relevant systems The book makes an in depth comparison of the biomedical clusters in Sweden and Ohio It also sheds light on the emergence of new science based technological systems

Innovation Systems in the Service Economy J Stanley Metcalfe,Ian Miles,2012-12-06 A frequent complaint in literature is that services have been previously largely overlooked by innovation researchers and technology policy makers Given the unarguable growth in the importance of the service sectors increasing numbers of researchers and policy makers have taken a fresh look at service activities Innovation Systems in the Service Economy Measurement and Case Study Analysis presents contributions which increase the understanding of the role of services in the development of the division of labor in modern economics This volume is devoted to the elaboration and understanding of the following two themes First service firms can be innovative in their own right even though the process of innovation and the kinds of innovation may be different from those traditionally associated with manufacturing and other primary activities Second service firms and associated activities play an important role in the evolving division of creative labor which is constituted by modern innovative systems

The Technological Evolution of Industrial Districts Fiorenza Belussi,Giorgio Gottardi,Enzo Rullani,2012-12-06 Fiorenza Belussi Giorgio Gottardi and Enzo Rullani This volume collects some papers presented at the Vicenza conference The Future of Districts held in June 1999 organised by the Department of Technology and Management of Industrial Systems of the Faculty of Engineering of Padua University with the collaboration of several engineers industrial economists and experts in the issue of technology management This was the starting point of a long lasting and painful collective discussion the results of which are documented here during many meetings of this itinerant group including the workshop in Padua organised by Professor Luciano Pilotti and held in May 2001 Systems governance knowledge within firm networks at the Department of Economics of the University of Padua and the recent international research seminar held in May 2002 in Rome at the Tagliacarne Institute within the EU sponsored project Industrial districts re location processes identifying policies of EU enlargement West East ID The reason we decided to organise this book was not only to underline the importance of the industrial district ID model as a tool of propulsive local growth in a country like Italy On the contrary the idea that moved us was the theoretical dissatisfaction with the way in which the phenomenon of local development and industrial clustering of specific industries was treated in the international approach of the various disciplines

Knowledge Capital and the "New Economy" Pontus Braunerhjelm,2012-12-06 According to its proponents the new economy is associated with sustainable growth increased demand for labor and zero inflation On the micro level this bright avenue into the future is propelled by

knowledge capital flexibility and new ways of organizing production such as clusters and networks Progress in information technology together with massive deregulation on the national and the international levels have been credited with setting this development into motion The concept of the new economy has been rapidly embraced by politicians as it seems to offer a way out of the traditional trade off between unemployment and wage inflation However empirical evidence regarding the microeconomic mechanisms of the new economy is scarce Knowledge Capital and the New Economy Firm Size Performance and Network Production intends to narrow this gap by empirically analyzing the composition of knowledge capital and how knowledge capital is distributed across firms of different size Moreover the impact of knowledge capital on firms profitability and international competitiveness is also examined Finally we compare cluster dynamics and the institutional set up in Europe and the U S with the purpose of identifying regulations that seem to hinder a conducive environment for expanding and dynamic European clusters The results of this study emphasize the role of knowledge capital and flexibility Thus irrespective of how sustainable the new economy turns out to be the policy implications in terms of providing institutions that facilitate knowledge enhancing economic activities flexible markets and transparent incentive structures are undeniable Countries that fail in this respect may find themselves trailing in the international growth and welfare rankings

Networks, Alliances and Partnerships in the Innovation Process John de la Mothe, Albert N. Link, 2012-12-06 In an era of intense knowledge based globalization and technology based competition the central role of networks alliances and partnerships is now becoming recognized By looking at the dynamics of these strategic organizational activities leading authors in the field examine in this book how firms align themselves how they use networks and enter into partnerships in order to develop new or radically improved processes and how they introduce new or radically improved products to the market The topic excludes as the primary interest spatial effects such as those found in geographic clusters or in regional innovation systems The focus here is instead on the innovation process and therefore examines framework issues about how we can assess networks of innovators measurement issues for both researchers and official statisticians and impact issues for both industry strategists and policy makers Using an evolutionary perspective and drawing on a range of disciplines Networks Partnerships and Alliances explores important issues at the conceptual methodological and comparative levels concerning the construction of comparative advantage

Institutions and Systems in the Geography of Innovation M.P. Feldman, Nadine Massard, 2012-12-06 This volume provides a collection of theoretical articles and empirical studies on innovation and location by focusing on the institutions and systems that mediate knowledge spillovers The objective is to provide an international comparison using a variety of approaches The volume is organized around the three themes The first focuses on theoretical work that attempts to advance our understanding of knowledge externalities and systems on innovation The second section provides empirical studies that attempt to measure these impacts The final section considers future challenges to regional economic development policy in the face of economic integration and globalization

Review

of Industrial Organization ,1999 **Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations** Roger Svensson,2012-12-06 Success Strategies and Knowledge Transfer in Cross Border Consulting Operations analyzes the international operations of consulting firms Apart from developing a theoretical framework which differs from traditional theories about international trade the main issues analyzed in this book are 1 Success determinants when tendering for international consulting contracts 2 The choice between exports acquisition of a local firm or establishing a greenfield office when entering foreign markets 3 The extent and nature of knowledge transfer to emerging markets 4 The role of development agencies in international consulting projects 5 The trend towards and consequences of more management services included in international projects 6 The effects on competition when state owned consulting firms are allowed to operate in the international market The empirical analysis of these issues is based on a unique database of individual tender documents which Swedish consulting firms have submitted abroad
