## **Economics In Sweden An Evaluation Of Swedish Research In Economics:**

Economics in Sweden Lars Engwall, 2006-08-21 Economics in Sweden contains the results of one of the most comprehensive attempts to evaluate research in economics ever undertaken A team of Swedish and international researchers including Avinash K Dixit Seppo Honkapohja and Robert M Slow examined the structure of economics in Sweden and its results They identified postgraduate education as a key area and their findings will be of particular relevance at a time when many countries are restructuring their graduate education programme The Post-1945 Internationalization of Economics Alfred William Coats, 1997 In addressing the internationalization of economics after 1945 these essays are concerned with aspects of economic education the economist's role in policymaking and the sociology and professionalization of the discipline These matters have rarely been considered in international terms While discussing organizations such as the World Bank International Monetary Fund and the European Community and presenting studies that are primarily concerned with the effect of these developments in particular countries this volume focuses on the situation of Latin America Arguably the post 1945 internationalization of economics has proceeded further more dramatically and with greater effect in that continent than in any other region of comparable size Contributors S Ambirajan William Ascher William J Barber Young Back Choi A W Coats Barend de Vries Margaret Garrison de Vries Peter Groenewegen Arnold Harberger Aiko Ikeo Maria Rita Loureiro Ivo Maes Veronica Montecinos Jacques J Polak Pier Luigi Porta Bo Sandelin Ann Veiderpass John Williamson

**Neo-liberal Economic Policy** Philip Arestis,Malcolm C. Sawyer,2004 Over the past two decades there has been a prevailing shift in economic policy in many countries This reflects the continuing rise of neo liberalism the doctrine that economic policy should leave it to the market and that governments should retreat from market intervention This book provides a balanced and comprehensive appraisal of these important policy developments The authors examine the most notable trends in neo liberal economic policy such as the withdrawal from the use of fiscal measures and the reliance on monetary policy They discuss the neo liberal view that the causes of unemployment lie in the operation of the labour market in particular its inflexibility They also assess the increasing inclination towards the liberalisation and deregulation of markets most notably financial markets In light of these developments the authors investigate several specific areas including an assessment of the theory of credibility financial fragility and the development process a reappraisal of the Rehn Meidner Model for Sweden the economic policy of the Spanish socialist governments the costs of neomonetarism in Brazil macroeconomic policies of the EMU The contributors expertly illustrate the ways in which neo liberal policies have been applied and implemented They also seek to show the shortcomings of the neo liberal approach and illustrate the different policy models available As such this volume will interest and inform academics economists and policymakers looking for a detailed critique of recent developments in economic policy      **Energy Abstracts for Policy Analysis** ,1985      *Synopses*
