Computable Economics K. Velupillai, 2000-01-06 In the field of economic analysis computability in the formation of economic hypotheses is seen as the way forward In this book Professor Velupillai implements a theoretical research program along these lines Choice theory learning rational expectations equilibria the persistence of adaptive behaviour arithmetical games aspects of production theory and economic dynamics are given recursion theoretic i.e. computable interpretations These interpretations lead to new kinds of questions being posed by the economic theorist In particular recursion theoretic decision problems replace standard optimisation paradigms in economic analysis Economic theoretic questions posed recursion theoretically lead to answers that are ambiguous undecidable choices uncomputable learning processes and algorithmically unplayable games become standard answers Professor Velupillai argues that a recursion theoretic formalisation of economic analysis Computable Economics makes the subject intrinsically inductive and computational

*Re-Inventing Our Lives* Mohamed Buheji, 2018-11-20 When we study socio economic issues we are actually studying the way our lives are planned This Handbook targets to re-invent the way we think and deal with challenges in our life journey by re-inventing how our mindsets can visualise complex problems Patterns of problem structure and its activity profile are shown in relevant to discovering hidden opportunities in the socio economic issues To re-invent the issues in our life the problem outcome is linked to both the problem scenarios and its visualised stories Therefore the dynamics of the socio economic complex situations are explained based on the different styles of thinking not the competency of problem solving The case studies in the handbook show how our social life affects our economic outcomes Also all the examples of dealing with problems in different ways pave the way for re-inventing our lives through re-inventing the way we deal with our communities and organisations chronic problems Dr Buheji in this first ever Handbook of Socio Economic Problem Solving shows how we can renew our learning capacity and to extract factors that influence the problem outcome to come with High multiplying effect model solutions The diversified problem solving techniques help the reader to build socio economic perspectives The reader would be challenged to explore the mindset of managing life frustrations that would make us create proper community solutions through visualising improved situations inspiring change and creating meaningful wealth in our life journey The book shows the link between the learning by involvement and learning by experience that lead to life breakthroughs It is a personal challenge so can you take it      *The Economics Problem Solver*, 1998      **Real World**

**Economics** Edward Fullbrook, 2007 Economics is extremely sick It is so locked in its past that nearly all of its introductory

textbooks are modelled on one that appeared in 1948 The discipline cannot continue in its autistic state much longer This book takes you to the heart of a fiery and many faceted debate It is comprised of 66 articles that have been selected based on their importance to the reform movement and for their accessibility to the general reader Real economic problems concern real people so their analysis must be made intelligible to an educated general public if real democracy is to function All economists must learn to live without the belief that there is only one right way of describing and explaining reality This requires economists to begin the development of an ethos of honesty regarding the limitations of their chosen approaches

*Children's Saving* Edmund J.S. Sonuga-Barke, Paul Webley, 2017-12-06 Originally published in 1993 this book presents an alternative approach to the study of the emergence of economic awareness during childhood a new developmental economic psychology In the past attempts to study the emergence of children s economic consciousness have failed to take account of the practical nature of the economic in the history of western cultures Economic socialisation has been seen as the acquisition of abstract knowledge about the institutions of adult economic culture The child has been seen as a spectator acquiring knowledge of that culture but never really a part of it However economic actions in essence are directed not towards the attainment of knowledge but rather towards the practical solution of problems of resource allocation imposed by constraint Children just like adults are faced with practical problems of resource allocation Their response to these problems may be different from those of adults but no less economic for that This realisation forms the heart of this book In it children are seen as both inhabitants of their own playground economic subculture and actors in the wider economic world of adults solving or attempting to solve practical economic problems In order to highlight this child centred approach the authors studied the way children tackle the particular problems posed by limitations of income How do children learn a the relationship between choices available in the present and the future b to spread their limited financial resources over time into the future and c about the strategies such as banking that allow them to protect those resources from threats and temptations In short how do children learn to save This volume goes some way to answering these and related questions and in so doing sets up an alternative framework for the study of the emergence of economic awareness **Psychology Library**
