Economies In Transition Comparing Asia:

Economies in Transition Wing Thye Woo, Stephen Parker, Jeffrey Sachs, 1997 In 1994 the Asia Foundation's Center for Asian Pacific Affairs began a two year project to compare the transitions of selected East European and Asian economies from centrally planned communist systems to market economies The goal was to shed light on the transition process through an understanding of the underlying economic and institutional dynamics This volume is the culmination of that project The volume is divided into three parts In the first part an overview the editors review the authors findings and highlight major themes The second part looks closely at the transition process in seven Asian and East European economies China Vietnam Mongolia Russia Poland Hungary and the Czech Republic The third part contains six comparative studies that explore key elements of the transition process The papers incorporate feedback obtained from meetings with cabinet members and high government officials conferences and seminars in Prague Ho Chi Minh City Hanoi Beijing Ulan Bator and Washington D C Contributors Leszek Balcerowicz Barbara Blaszczyk Peter Boone Yuan Zheng Cao Bruce Comer Marek Dabrowski Georges de Menil Daniel C Esty Gang Fan Boris Federov Roman Frydman Carol Graham Stephen Parker Andrzej Rapaczynski James Riedel Jeffrey D Sachs Baavaa Tarvaa Vinod Thomas Gavin Tritt Adiya Tsend Enkhbold Tsendjav Joel Turkewitz Narantsetseg Unenburen Yan Wang Wing Thye Woo *Comparative Economics in a Transforming World Economy* John Barkley Rosser, 2004 The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies **Managing Relationships in Transition Economies** Nancy K. Napier, David C. Thomas, 2004-02-28 The transition from socialist or communist economy to market economy in many countries has been dramatic unpredictable and mostly on the surface observable in new consumption patterns or higher standards of living But deeper change in the managerial mindset in these new market economies has been much slower and less evident It is crucial to business success for foreign managers to understand their transition economy counterparts This book examines the interactions that foreign and transition economy managers have in building business relationships the influences behind those interactions how the interactions themselves change over time and how to manage the process of building relationships more smoothly Consistency and Viability of Islamic Economic Systems and the Transition Process J. Marangos, 2013-08-27 Consistency and Viability of Islamic Economics Systems and the Transition Process outlines the transition problem for non market economies and creates an analytic framework for understanding the cause and effect of these economies **Economic Transition in Hungary and East Germany** J. Stephan, 1999-02-08 What factors determine the success of economic transition development and growth Examining the contrast between East German shock therapy and Hungary's gradualism the book generates a set of generalisable conditions for economic development which imply some degree of state intervention and strategy A stability oriented incomes policy and a carefully managed integration strategy can enable sustainable export surpluses a competitive currency and macroeconomic stability whilst providing sufficient room for

economic restructuring structural transformation and technological catch up The dangers of premature integration are examined

Handbook of the Economics and Political Economy of Transition Paul Hare, Gerard Turley, 2013-05-02

Transition from central planning to a market economy involving large scale institutional change and reforms at all levels is often described as the greatest social science experiment in modern times As more than two decades have passed since the fall of the Berlin Wall and the collapse of the Soviet Union it is now an excellent time to take stock of how the transition process has turned out for the economies that have moved on from socialism and the command economy This new handbook assembles a team of leading experts many of whom were closely involved in the transition process as policymakers and policy advisors to explore the major themes that have characterized the transition process After identifying the nature of initial conditions and the strengths and weaknesses of institutions the varying paths and reforms countries have taken are fully analyzed from the shock therapy privatization or gradualism of the early years to the burning issues of the present including global integration and sustainable growth Topics covered include the socialist system pre transition economic reforms institutions the political economy of transition performance and growth enterprise restructuring and people and transition The country coverage is also extensive from the former socialist countries of the USSR and the satellite states of Central and Eastern Europe to the Asian countries of China Vietnam and others The rise of China as a key actor in the drama is chronicled along with the emergence of a new more confident oil rich Russia The comparative prosperity of the Central European countries such as Poland and the Czech Republic is contrasted with the mixed fortunes of the former USSR where some countries are stagnating while others boom This Handbook of the Economics and Political Economy of Transition is the definitive guide to this new order of things in the former Communist world

Olgu,2015-12-04 Despite considerable progress on political and economic convergence over the last decade financial structures of individual countries within the EU remain diverse This book considers the future prospects of the banking industry in the context of enlargement application of the IFRS and a potential new member country Turkey Resource Abundance and Economic Development R. M. Auty,2001-06-28 Since the 1960s the per capita incomes of the resource poor countries have grown significantly faster than those of the resource abundant countries In fact in recent years economic growth has been inversely proportional to the share of natural resource rents in GDP so that the small mineral driven economies have performed least well and the oil driven economies worst of all Yet the mineral driven resource rich economies have high growth potential because the mineral exports boost their capacity to invest and to import Resource Abundance and Economic Development explains the disappointing performance of resource abundant countries by extending the growth accounting framework to include natural and social capital The resulting synthesis identifies two contrasting development trajectories the competitive industrialization of the resource poor countries and the staple trap of many

resource abundant countries The resource poor countries are less prone to policy failure than the resource abundant countries because social pressures force the political state to align its interests with the majority poor and follow relatively prudent policies Resource abundant countries are more likely to engender political states in which vested interests vie to capture resource surpluses rents at the expense of policy coherence A longer dependence on primary product exports also delays industrialization heightens income inequality and retards skill accumulation Fears of Dutch disease encourage efforts to force industrialization through trade policy to protect infant industry The resulting slow maturing manufacturing sector demands transfers from the primary sector that outstrip the natural resource rents and sap the competitiveness of the economy The chapters in this collection draw upon historical analysis and models to show that a growth collapse is not the inevitable outcome of resource abundance and that policy counts Malaysia a rare example of successful resource abundant development is contrasted with Ghana Bolivia Saudi Arabia Mexico and Argentina which all experienced a growth collapse The book also explores policies for reviving collapsed economies with reference to Costa Rica South Africa Russia and Central Asia It demonstrates the importance of initial conditions to successful economic reform
