Atkins, 2000 This introduction to food studies provides a geographical overview of today s dominant food system one developed in and controlled by northern industrialised countries and one that is becoming increasingly globalised The Roman Empire Peter Garnsey, Richard P. Saller, 1987-06-12 During the first stable period of the Principate roughly from 27 BC to AD 235 when the empire reached its

maximum extent Roman society and culture were radically transformed But how was the vast territory of the empire controlled Did the demands of central government stimulate economic growth or endanger survival What forces of cohesion operated to balance the social and economic inequalities and high mortality rates Why did Roman governments freeze the official religion while allowing the diffusion of alien especially oriental cults Are we to see in their attitude to Christianity a policy of toleration or simply confusion and a failure of nerve These are some of the many questions posed in this book which offers the first overall account of the society economy and culture of the Roman empire Addressed to non specialist readers no less than to scholars it breaks with the traditional historian's preoccupation with narrative and politics As an integrated study of the life and outlook of the ordinary inhabitants of the Roman world it deepens our understanding of the underlying factors in this important formative period of world history

Each chapter contains a guide to further reading and to websites of relevance to food. Extensively illustrated, this book is essential reading for students of food studies in the social sciences and humanities. Culture, Society, Economy Don Robotham, 2005-03-30. Robotham offers here a clear-headed exposé of the limits of classical liberalism in the face of world production today. His theme is both urgent and iconoclastic. There is an unusual clarity about the exposition and a drive that comes from passionate engagement combined with long experience reading and reflection. Keith Hart, Goldsmiths College, London. In Culture, Society and Economy Don Robotham examines the failure of recent social theory to grasp the problems of globalization and the emergence of corporate monopoly capital and sets out his own argument for a radical solution. He argues that the neglect of economics by both cultural studies and social theory has weakened the ability to develop viable alternatives to present-day capitalist globalization. With deep awareness of and reference to current events and contemporary trends, the author presents a detailed critique of cultural studies in particular. Stuart Hall and Paul Gilroy. Giddens' theory of risk society. Scott Lash and John Urry's economies of signs and space. Manuel Castells' theory of network society. The final chapters make a unique argument that the solution to the problems of globalization lies in more globalization rather than adopting an anti-globalization or localization position. Don Robotham proposes more effective centralized institutions for governing the world economy in other words world government. **Food, Science and Society** P.S. Belton, Teresa Belton, 2002-09-19. There is widespread concern amongst consumers about the safety and acceptability of food and there are clearly communication gaps between consumers, many food professionals and food industry. This book offers accounts of the two-way nature of this difficult communication process and steps that can be made to bridge these communication gaps in a variety of social and cultural environments. Individual chapters of the book analyze the roles of science, culture and risk perception and of mass media and attitudes towards eating. An additional section describes the interface between scientists and lay people with regard to policy making and agricultural practice. *Proceedings of IAC 2025 in Venice* Group of Authors, 2025-08-28. In the Culture Society Angela McRobbie, Angela McRobbie, 2013-09-13. How do different artistic and cultural practices develop in the contemporary consumer culture? Providing a new direction in cultural studies as well as a vigorous defence of the field. Angela McRobbie's new collection of essays considers the social consequences of cultural proliferation and the social basis of aesthetic innovation. In the wake of postmodernism, McRobbie offers a more grounded and even localised account of key cultural practices from the new populism of young British artists including Damien Hirst and Tracy Emin to the underground London sounds of drum n bass, discussing music by artists such as Tricky, Talvin Singh and Goldie from the new sexualities in

girls and women's magazines like *More* and *Sugar* to the dynamics of fashion production and consumption. Throughout the essays, the author returns to issues of livelihoods and earning a living in the cultural economy while at the same time pressing the issue of cultural value. *Religion, Reform and Modernity in the Eighteenth Century* Robert G. Ingram, 2007. A new interpretation of English history and religion in the eighteenth century. The eighteenth century has long divided critical opinion. Some contend that it witnessed the birth of the modern world while others counter that England remained an ancien régime confessional state. This book takes issue with both positions, arguing that the former overstate the newness of the age and largely misdiagnose the causes of change while the latter rightly point to the persistence of more traditional modes of thought and behaviour but downplay the era's fundamental uncertainty and misplace the reasons for and the timeline of its passage. The overwhelming catalyst for change is here seen to be war rather than long-term social and economic changes.

Archbishop Thomas Secker 1693-1768: the Cranmer or Laud of his age and the hitherto neglected church reforms he spearheaded form the particular focus of the book. This is the first full archival-based study of a crucial but frequently ignored figure.

ROBERT G INGRAM is Assistant Professor at the Department of History, Ohio University.
