**Canada in the European Age, 1453-1919** R.T. Naylor, 2006-07-10 When *Canada in the European Age 1453 1919* was first published it reversed traditional methodology by placing Canada's evolution in the context of the rise and fall of empires around the world not just in the Americas R T Naylor

contends that the struggle for property and political rights in early nineteenth century Newfoundland is incomprehensible without an understanding of events as distinct as the Afro American slave trade or the Napoleonic Wars the opening of the natural resource frontier of British Columbia makes sense only if seen as another manifestation of the same historical forces that fired the opening shots in the Opium wars in China and the fate of Canada's native peoples may have been different in form but not in essence from that of the aboriginal inhabitants on almost every continent

**A Concise Economic History of the World** Rondo E. Cameron, 1993 This classic book offers a broad sweep of economic history from prehistoric times to the present and explores the disparity of wealth among nations Now in its fourth edition A Concise Economic History of the World includes expanded coverage of recent developments in the European Union transition economies and East Asia

*The Peasants of Ottobeuren, 1487-1726* Govind P. Sreenivasan, 2004-06-24 The Peasants of Ottobeuren offers an interesting perspective on one of the enduring problems of early modern European history the possibilities for economic growth and social change in rural society Based on the voluminous records of the Swabian Benedictine monastery of Ottobeuren this study underscores the limitations of the traditional narrative of a sixteenth century boom which foundered on the productive rigidities of the peasant economy and then degenerated into social crisis in the seventeenth century Population growth did strain resources at Ottobeuren but the peasantry continued to produce substantial agricultural surplus More importantly peasants reacted to demographic pressure by deepening their involvement in land and credit markets and more widely and aggressively marketing the fruits of their labour Marriage and inheritance underwent a similar process of commercialization which made heavy demands on the peasantry but which maintained a degree of social stability through the devastations of war plague and famine

*European Proto-Industrialization* Sheilagh Ogilvie, Markus Cerman, 1996-02-23 This collection of essays provides an up to date introduction to proto industrialization the growth of export oriented domestic industries which took place all over Europe between about 1500 and 1800 Often these industries expanded alongside agriculture without advanced technology or centralized factories Since the 1970s numerous theories have been proposed arguing that proto industrialization transformed demographic behaviour social structure and traditional institutions and was a major cause of capitalism and factory industrialization European proto industrialization summarizes the theories and criticisms and includes a reconsideration of the original theories and chapters written by experts on different European countries It provides an essential guide to an important yet often confusing field of economic and social history

**Forging Modernity** Martin Hutchinson, 2023-03-20 The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage In Forging Modernity Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors After comparing their endowments and political structures as far back as 1600 he then traces how Britain through better policies primarily from the political Tory party diverged from other European countries Hutchinson's Harvard MBA allows a unique perspective on the early industrial

enterprises many successes resulted from marketing control systems and logistics rather than from production technology alone while on a national scale the scientific method and commercial competition were as important as physical infrastructure By 1830 through ever improving policies Britain had built a staggering industrial lead half a century ahead of its rivals Then the Tories lost power and policy changed forever In his conclusion Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain Nevertheless the policies that drove growth ingenuity and rising living standards are still available for those bold enough to adopt them *Civic Politics in the Rome of Urban VIII* Laurie Nussdorfer, 2019-04-23 In this colorful depiction of daily political life in Baroque Rome Laurie Nussdorfer argues that the lay persons managed to sustain a civic government under the increased papal absolutism of Urban VIII 1623 1644 who oversaw both sacred and secular life Focusing on the S P Q R the Senate and the Roman People which was ministered from the capitoline Hill she shows that it provided political representation for lay members of the urban elite carried out the work of local government and served as a symbol of the Roman voice in public life Through a detailed study of how civic authorities derived their sense of legitimacy and how lay subjects maneuvered in informal and disguised ways to block or criticize the papal regime the author advances a new way of conceiving politics under an absolute ruler As Nussdorfer analyzes the complex interactions between the lay administration and Urban VIII and his family the papal administration and Romans of the upper and lower classes she also provides fresh insights into the actual practice of early modern government She takes the plague threat of the early 1630s the War of Castro 1641 1644 and the interregnum following the pope's death as important test cases of the state's power in times of crisis Laurie Nussdorfer is Assistant Professor of History and Letters at Wesleyan University Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Irregular Armed Forces and their Role in Politics and State Formation** Diane E. Davis, Anthony W. Pereira, 2003-01-13 Existing models of state formation are derived primarily from early Western European experience and are misleading when applied to nation states struggling to consolidate their dominion in the present period In this volume scholars suggest that the Western European model of armies waging war on behalf of sovereign states does not hold universally The importance of irregular armed forces militias guerrillas paramilitaries mercenaries bandits vigilantes police and so on has been seriously neglected in the literature on this subject The case studies in this book suggest among other things that the creation of the nation state as a secure political entity rests as much on irregular as regular armed forces For most of the developing world the state's legitimacy has been difficult to achieve constantly eroding or challenged by irregular armed forces within a country's borders

No account of modern state formation can be considered complete without attending to irregular forces      The Individual Vs. The Public Interest Richard M. Alston, 2019-07-11 Central to the controversy surrounding U S natural resources policy is the conflict between environmentalists and proponents of development Examining the evolution of the philosophies underlying that conflict Dr Alston traces the failure to achieve a unified resources policy to the seemingly incompatible ideological positions held by resource specialists interest groups policymakers economists and foresters His analysis goes beyond his case study of national forest policy to focus on an ancient question basic to policy making in a democratic society How can government provide a sociopolitical framework that accommodates both individual interests and the need for unity in a collective existence Only within this broader framework he argues is it possible to determine the proper division between private and public resource management or the proper role of government in natural resources planning Incorporating a critical evaluation of the development of classical and neoclassical economic theory this work makes clear the need to strike a balance between a strictly individualistic and an ecological point of view Dr Alston illustrates the ideological conflicts that complicate resources planning and explores the possibility of a new ideology capable of accommodating and integrating differences to meet the complex needs of society      **The Undevelopment of Capitalism** Rebecca Jean Emigh, 2009 In *The Undevelopment of Capitalism* Emigh argues that the expansion of the Florentine economic market in the fifteenth century helped to undo the development of markets of other economies especially the rural economy of Tuscany As this highly developed urban market penetrated rural regions it actually erased rural market institutions that rural inhabitants had used to organize agricultural production and family life Thus an advanced economy at the time of the late Middle Ages and early Renaissance undeveloped over time The economic development of this region in Italy was delayed as it failed to keep pace with the rest of Europe Using a negative case methodology to show how urban and rural markets change Emigh employs methods of historical sociology and sectoral theories to examine how markets can prosper and suffer at the same time She shows how sectoral relations are crucial to transitions to capitalism and how capitalist development can also contract markets      The Social Life of Coffee Brian Cowan, 2008-10-01 What induced the British to adopt foreign coffee drinking customs in the seventeenth century Why did an entirely new social institution the coffeehouse emerge as the primary place for consumption of this new drink In this lively book Brian Cowan locates the answers to these questions in the particularly British combination of curiosity commerce and civil society Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century Britain's virtuosi gentlemanly patrons of the arts and sciences were profoundly interested in things strange and exotic Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses As the coffeehouse evolved rising to take a central role in British commercial and civil society the virtuosi were also transformed by their own invention      **The Rise of Western Power**

Jonathan Daly,2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world The Rise of Western Power charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and industrial among others The result is a clear and engaging introduction to the history of Western civilization      **Consumption and the World of Goods** John

Brewer,Roy Porter,2013-06-17 The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services
