Global Economic Modeling: A Volume In Honor Of Lawrence R Klein Peter Pauly, 2018-04-25 Global econometric models have a long history From the early 1970s to the present as modeling techniques have advanced different modeling paradigms have emerged and been used to support national and international policy making One purpose of this volume based on a conference in recognition of the seminal impact of Nobel Prize winner in Economic Sciences Lawrence R Klein whose pioneering work has spawned the field of international econometric modeling is to survey these developments from today's perspective A second objective of the volume is to shed light on the wide range of attempts to broaden the scope of modeling on an international scale Beyond new developments in traditional areas of the trade and financial flows the volume reviews new approaches to the modeling of linkages between macroeconomic activity and individual economic units new research on the analysis of trends in income distribution and economic wellbeing on a global scale and innovative ideas about modeling the interactions between economic development and the environment With the expansion of elaborated economic linkages this volume makes an important contribution to the evolving literature of global econometric models

Understanding Chinese Economic Model; Learning from mistakes Manoj Trivedi, 2020-08-07 The economic wisdom is rooted in a profound understanding of the relationships that exist between different orders of law that operate within an economic community It is above the man made laws and regulations that societies develop themselves But China has tried to change economic rules and set its own that has adversely impacted its own economy How and why China has kept the prices low to disrupt global economy is worth learning Unable to keep pace with such low prices many industries across globe were forced to close down Such a Chinese move has resulted into rise in income inequality

unemployment and protectionism along with political instability across countries To keep pace with nefarious malefic moves and counter China with its own ball game it is a must for global leaders including Business Leaders to learn from the Chinese mistakes and prepare their organization for challenges ahead Industry 4.0 and tools of AI has leveraged organizations to change their business model and practices for being cost efficient and competitive But mere adopting tools of AI will not yield desired results unless supported by robust performance pillar The purpose of Industry 4.0 is more about Business Analytics creating Business Intelligence and Decision Intelligence than technological advancement It leverage organisations to control their operational cost and be competitive Learning from the Chinese mistakes and adopting such practices will take forward organizations to whole new level of sustainable paradigm while improving their cost structure and build immunity to any threats

Modern Economic Development in Japan and China X. Huang, 2013-10-29 The contributors provide a comparative analysis of the modern economic development of Japan and China that are often explained in frameworks of East Asian developmentalism varies of capitalism or world economic system and explore their broader significances for the rise and global expansion of modern economy

Macroeconometric Models Władysław Welfe, 2013-02-15 This book gives a comprehensive description of macroeconometric modeling and its development over time The first part depicts the history of macroeconometric model building starting with Jan Tinbergen's and Lawrence R Klein's contributions It is unique in summarizing the development and specific structure of macroeconometric models built in North America Europe and various other parts of the world The work thus offers an extensive source for researchers in the field The second part of the book covers the systematic characteristics of macroeconometric models It includes the household and enterprise sectors disequilibria financial flows and money market sectors

Issues on Economic Relations Between the EU and China and Evaluation on the Impact of China's Tariff Change on the Two Economies with a CGE Model Li Wang, 2009 The book focuses on issues on bilateral relations between the EU and China and evaluation on the impact of China's tariff changes on the two economies with a CGE model Through analyzing the statistic data and relevant document we find that for the EU China seems to be the most important partner in Asia and predominant interests of Europe in China are in the domains of economics and politics Economic relations are thought to be far more important for both the EU and China than other sensitive issues such as human rights Meanwhile using a CGE model we find that China's tariff reduction seems to impact the Chinese economy stronger than the European economy and China's textile and apparel industries are the biggest winners whereas the motor vehicle and parts industry is the biggest losers with China's trade liberalization

CHINAGEM—A Dynamic General Equilibrium Model of China: Theory, Data and Applications Xiujian Peng, 2023-08-23 This book contains detailed documentation of the CHINAGEM model a large scale dynamic computable general equilibrium CGE model of China and its applications Specifically this book documents the theory and database behind the CHINAGEM model This book explores the closure development for the four simulation modes of the model

including historical decomposition forecast and policy simulations the detailed explanation of how to analyze simulation results and the extensions of CHINAGEM and their applications These extensions include several innovative modules and case studies as examples of the application of CHINAGEM This book provides an entry point for CGE modellers to develop their analytical skills This book can also be used as a platform for research institutes to develop CGE models suitable for their research portfolio The module developments included in this book are designed to capture the specific features of the Chinese economy The applications of these modules chosen in the book cover hot policy issues in China and the simulation results have valuable policy implications This book identifies that the CHINAGEM model itself and all the extensions can be used for analysing many new topics and policy issues such as the effects of the USA China trade war the effects of Made in China 2025 Plan as well as China's commitment to the carbon neutrality before 2060 and its economic implications

Econometric Models of Asian Link Shinichi Ichimura, Mitsuo Ezaki, 2012-12-06 This is the first outcome of our effort in ASIAN LINK PROJECT to construct the econometric models of Asian developing countries and analyze their inter dependence with major trading partners the United States and Japan The model we present here is called Asian Link System The countries in this system include Korea Taiwan Hong Kong China the Philippines Thailand Malaysia Singapore Indonesia Japan and the United States They are covered by national models The rest of the world is divided into several regions and treated by simple proto type models The main characteristics of Asian Link System are to deal with the inter dependent relations between Asian developing countries on the one hand and Japan and United States on the other hand Here are presented these national models and the Asian Link System with the underlying statistical data so that any econometrician can re estimate our models and check the results of our research work Nowadays most articles and books in econometrics report only the final results or conclusions of research so that no other econometrician can re calculate or re examine the findings This is very serious in the empirical research because as theorists may make mistakes positive economists do commit errors or miss some possible considerations Unless statistical data are offered other econometricians cannot make suggestions or improve the models This is the main reason why empirical research in econometrics or applied econometrics are not making substantial progress in recent years

China's Economic Reform Zhang Yu, 2017-10-12 China's growth miracle over the past 30 years has propelled it to become the world's second largest economy and potentially the largest in the following years This book examines China's experience on economic reform trying to find the reasons for the sustainable and rapid development and provide insights into the study of economic theories From the perspective of political economics this book elaborates on China's socialist market economy which was officially confirmed as the goal of the country's economic reform in 1992 It expounds on China's economic model the relationship between socialism and market economy as well as the establishment and improvement of socialist market economy in China deepening the studies in the laws governing China's economic development Then it explores the gradual reform the reform of state owned enterprises and the

relationship between governments and market all of which are crucial to the success of China's economic reform. Finally, based on the analysis above, this book discusses the reasons for the constant and rapid development of China's economy. With detailed analysis on the reform experience and theoretical implications, this book will appeal to scholars and students studying China's economy and contribute to the development of economic theories.
