Freedom, Responsibility and Economics of the Person Jérôme Ballet, Damien Bazin, Jean-Luc Dubois, François-Régis Mahieu, 2013-07-31 The capability approach has developed significantly since Amartya Sen was awarded the Nobel Prize in Economics in 1998 It is now recognised as being highly beneficial in the analysis of poverty and inequality but also in the redefinition of policies aimed at improving the well being of individuals The approach has been applied within numerous sectors from health and education to sustainable development but beyond the obvious interest that it represents for the classical economics tradition it has also encountered certain limitations While acknowledging the undeniable progress that the approach has made in renewing the thinking on the development and well being of a population this book takes a critical stance It focuses particularly on the approach's inadequacy vis vis the continental phenomenological tradition and draws conclusions about the economic analysis of development In a more specific sense it highlights the fact that the approach is too bound by standard economic logic which has prevented it from taking account of a key person dimension namely the ability of an individual to assume responsibility As a result this book advocates the notion that if the approach is used carelessly in relation to development policies it can cause a number of pernicious effects some of which may lead to disastrous consequences Due to its multidisciplinary nature this book will be of interest to those working in the fields of economics philosophy development studies and sociology

The Anthropology of Complex Economic Systems Niccolo Leo Caldararo, 2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In The Anthropology of Complex Economic Systems Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are

false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation

The Haitian Economy (Routledge Revivals) Mats Lundahl, 2015-05-08 Haiti is a very poor country with a stagnant economy This title first published in 1983 considers the Haitian economy placing it in its historical context and explores the reasons why it has performed so badly Mats Lundahl examines agriculture which has failed to provide an adequate standard of living analyses the structure of agricultural production and explains why the land is so unproductive Lundahl analyses why technology in agriculture is so underdeveloped and argues that no government since 1820 has been seriously interested in fostering economic development since vested interest consistently intervenes to discourage new projects

Time Resources, Society and Ecology Tommy Carlstein, 2019-09-18 Originally published in 1982 Time Resources Society and Ecology examines and seeks to examine the time dimension in terms of the ecology technology social organization and spatial structure of the human habitat Approaches to time resources sociological time budget studies anthropological activity analysis and economic analysis of money allocation have been limited by their sectoral scope or their failure to relate effectively to the processes of social interaction technological change and environmental structure In this book the book's articulation of time resources is developed in a general theoretical framework of action and interaction in time and space The book examines constraints and possibilities facing preindustrial societies and throws light on the impact of technology on modern societies Basic models of time allocation are presented and finally a cross cultural comparison is made of the mobilization of time resources in preindustrial societies Geographers social anthropologists and human ecologists should find this work directly relevant to their interest in understanding the interactions between man and environment

Key Issues in Hunter-Gatherer Research Linda J. Ellanna, Ernest S. Burch, 2020-08-25 Hunter gatherer research has experienced enormous expansion over the past three decades In the late

1950s less than a score of anthropologists were actively engaged in issue oriented studies of foraging populations Since then the number of active researchers has grown into the hundreds This book offers the most up to date anthology of papers on hunter gatherer research and contains possibly the most comprehensive bibliography on hunter gatherers ever published It will be essential reading for all students of hunter gatherer societies **The Land Question in India** Anthony P.

D'Costa,Achin Chakraborty,2017-04-06 This volume takes a fresh look at the land question in India Instead of re engaging in the rich transition debate in which the transformation of agriculture is seen as a necessary historical step to usher in dynamic capitalist or socialist development this collection critically examines the centrality of land in contemporary development discourse in India Consequently the focus is on the role of the state in pushing a process of dispossession of peasants through direct expropriation for developmental purposes such as acquisition of land by local states for infrastructure development and to support accumulation strategies of private business through industrialization Land in India is sought for non agricultural purposes such as purchasing land to reduce risk and real estate development Land is also central to tribal communities adivasis whose livelihoods depend on it and on a moral economy that is independent of any price driven markets Adivasis tend to hold on to such property not as individual owners for profit but for collective security and to protect a way of life Thus land notwithstanding its role in the accumulation process has been and continues to be a turbulent arena in which classes castes and communities are in conflict with each other with the state and with capital jockeying to determine the terms and conditions of land transactions or their prevention through both market and non market mechanisms The volume goes beyond the traditional political economy of the agrarian transition question and deals with inter alia distributional conflicts arising from acquisition of land by the state for capital accumulation on the one hand and its commodification on the other It provides new analytical insights into the land acquisition processes their legal institutional and ethical implications and the multifaceted regional diversity of acquisition experiences in India *Resources for the Teaching of Anthropology* David G. Mandelbaum,Gabriel W. Lasker,Ethel M. Albert,2023-11-15 Understanding Human Society Walter Goldschmidt,2013-04-15 Published in 1998 Understanding Human Society is a valuable contribution to the field of Social Science
