The Economics of Regional Trading Arrangements Richard W. T. Pomfret, 2001 Regionalism became a major issue in international commercial diplomacy during the 1990s The European Union's 1992 program the formation of NAFTA and attempts to form or strengthen regional trading arrangements in South America southern Africa and Southeast Asia were all viewed as challenges to the nondiscrimination principle that had been the cornerstone of the postwar international trading system This book provides a unified analysis of policies which discriminate among trading partners featuring ample treatments of both history and theory as well as a review of empirical studies

Regional Trading Arrangements Among Developing Countries Dean A. DeRosa, 1995-01-01 The international setting and the resurgence of regionalism Regional trading arrangements in economic theory The ASEAN economies in the global trading system ASEAN economic arrangements and the free trade area plan Quantitative analysis of the AFTA plan

The Economics of Regional Trading Arrangements Richard Pomfret, 1997-10-16 The Economics of Regional Trading Arrangements provides a unified analysis of policies which discriminate among trading partners With the European Union's 1992 programme the formation of NAFTA and attempts to form or strengthen regional trading arrangements in South America southern Africa and Southeast Asia regionalism became a major issue in international commercial diplomacy during the early 1990s The proliferation of RTAs was viewed by some as a challenge and by others as a complement to the establishment of the World Trade Organization as the successor to GATT Richard Pomfret analyses the new RTAs situating them in the broader realm of discriminatory trade policies for which there is a well defined body of theory and empirical studies before asking whether the new regionalism requires new theoretical analysis His approach is to combine in roughly equal proportions history theory and a review of empirical studies This is appropriate given that the key theoretical result is the welfare ambiguity of discriminatory trade policy changes Empirical studies can provide a sense of which of the potentially offsetting effects are more or less important Since some effects may take a long time to have their full impact and may be systemic it is also useful to observe how RTAs have evolved in practice This new paperback edition of The Economics of Regional Trading Arrangements includes a brand new Preface in which Pomfret surveys three important developments that occurred during the second half of the 1990s the onset of a third wave of regionalism the reintegration of formerly centrally planned economies into the global trading system and theoretical developments including the significance of national boundaries This up to date survey will appeal to trade theorists as well as to anyone involved in policy institutions

Regional Trading Blocs in the Global Economy May T. Yeung, Nicholas Perdakis, William Alexander Kerr, 1999-01-01

The Asia Pacific Rim is still potentially one of the most dynamic areas of the global economy and the European Union EU is the world's most prosperous market. The development of relations between the EU and Association of South East Asian Nations ASEAN is vitally important for the future economic evolution of both regions. This book traces the relationship between the EU and ASEAN considering the current and future position of trade relations.

Regional Trading Blocs in the World Economic System Jeffrey A. Frankel, Ernesto Stein, Shang-Jin Wei, 1997. Covers trends from 1957 to 1995. The Political Importance of Regional Trading Blocs Bart Kerremans, Bob Switky, 2018-02-06. This title was first published in 2000. This text addresses concerns about regional trade agreements. From a variety of political and economic angles it explains the emergence of trade blocs, their internal policies and politics and their effects on global trade. It does not provide sequential descriptions and analyses of each of the world's major trading blocs. The focus here is on a number of causal factors that help explain the emergence of trading blocs and the development of their relations to and effects on the multilateral trading system. In each chapter attempts have been made to draw theoretical and case based generalizations that may apply to other trade blocs than the used in the empirical analyses.

Evaluating the trade effect of developing regional trade agreements : a semi-parametric approach Souleymane Coulibaly, 2007. Abstract: Many recent papers have pointed to ambiguous trade effects of developing regional trade agreements (RTAs) calling for a reassessment of their economic merits. The author focuses on seven such agreements currently in force in Sub-Saharan Africa: ECOWAS and SADC, Asia: AFTA and SAPTA, and Latin America: CACM, CAN and MERCOSUR, estimating their impacts on their members' trade flows. Instead of the usual dummy variables for RTAs, he proposes a variable taking into account the number of years of membership. He then combines a gravity model with kernel estimation techniques to capture the non-monotonic trade effects while imposing minimal structure on the model. The results indicate that except for SAPTA, these RTAs have had a positive impact on their members' intra-trade over the estimation period 1960-99. AFTA seems to be the most successful among them with an estimated positive impact on its members' imports from the rest of the world, hence no trade diversion, but its impact on their exports to the rest of the world is rather limited. During its first 10 years of existence, ECOWAS appears to have had a positive impact on its members' imports from the rest of the world, hence no trade diversion, but this positive impact vanished over time. SAPTA's negative impact on its members' intra-trade is probably an implicit effect of the India-Pakistan tensions over the estimation period.

North-South Regional Trade Agreements as Legal Regimes Clair Gammage, 2017-05-26. This book offers a critical reflection of the North-South regional trade agreements (RTAs) known as the Economic Partnership Agreements negotiated between the EU and the African, Caribbean and Pacific countries. Conceiving of regions as legal regimes, Clair Gammage highlights the challenges facing developing countries when negotiating RTAs with developed countries and interrogates the assumption that these agreements will and can promote sustainable development through trade.

New Dimensions in Regional Integration Jaime De Melo, Arvind Panagariya, 1995 Interest in regional integration has recently revived in both developed and developing countries The US has responded to the lack of progress in the Uruguay Round of the GATT by pursuing bilateral trade negotiations while developing countries have been prompted to re evaluate the potential benefits of regional integration The tendency for the world trading system to divide into three blocs the European Community the Americas and East Asia is providing their members with guaranteed access to large markets however poor non member countries will suffer from the loss of access and the risk of trade wars is increased In this book leading international experts assess the renewed attractiveness of regional integration to individual countries the types of integration that are suitable to various circumstances the conditions necessary to their success and the relationship of regionalism to multilateral free trade

The Rules of the Game in the Global Economy Lee E. Preston, Duane Windsor, 2013-11-11 This study has been long in the making and the world has changed dramatically while we have been at work We initially anticipated a substantial section on the Soviet dominated Council for Mutual Economic Assistance CMEA or COMECON which offered an interesting contrast to the kind of international business regime typically found among market

oriented countries and industries As we moved toward publication the CMEA vanished and so we mention it only in passing The USSR subsequently disintegrated into a Commonwealth of Independent States CIS On the other hand we began with the assumption that the historic rule of capture no longer played a significant role in international economic relations The seizure of Kuwait's territory and wealth by the government of Iraq suggests that this assumption was heavily influenced by wishful thinking Even though this seizure has been reversed by military action the experience remains a challenge to generally held beliefs about the strength of order versus chaos in contemporary international affairs Some readers of this volume have suggested that it gives insufficient attention to the fact that many of the important business and economic regimes of the postwar period are currently under significant pressure perhaps even in danger of collapse We acknowledge that there are many evidences of strain in for example the free trade and money exchange regimes and in many areas of environmental protection
