Economic Policy 40:

The Theory of Economic Policy in a Strategic Context Nicola Acocella, Giovanni Di Bartolomeo, Andrew Hughes Hallett, 2013 Developing a new and highly innovative theory of economic policy this book deals with conflicts between strategic actions by public and private agents It builds on the Lucas critique but also applies the tools introduced by Tinbergen and Theil to dynamic policy games and from there derives a new theory of economic policy Its main propositions describe such properties in the models currently used for policy making as neutrality and equilibrium existence uniqueness and multiplicity These properties are key to understanding the impact of concepts such as rational expectations time inconsistency communication and the use of policy announcements As the numerous examples show they are useful both for model building and for devising optimal institutions The Theory of Economic Policy in a Strategic Context is an essential but accessible tool for economic researchers involved in policy questions

Ordoliberalism and European Economic Policy Malte Dold, Tim Krieger, 2019-09-18 This volume takes a broad perspective on the recent debate on the role of German ordoliberalism in shaping European economic policy before and after the eurozone crisis It shows how ordoliberal scholars explain the institutional origins of the eurozone crisis and presents creative policy proposals for the future of the European economy Ordoliberal discourse both attempts to offer political solutions to socioeconomic challenges and to find an ideal market order that fosters individual freedom and social cohesion This tension between realpolitik and economic utopia reflects the wider debate on how far economic theory shapes and is shaped by historical contingencies and institutions The volume will be of interest to policymakers as well as research scholars and graduate students from various disciplines ranging from economics to political science history and philosophy

The Political Power of Economic Ideas Peter A. Hall, 2020-11-10 John Maynard Keynes once observed that the ideas of economists and political philosophers both when they are right and when they are wrong are more powerful than is commonly understood The contributors to this volume take that assertion seriously In a full scale study of the impact of Keynesian doctrines across nations their essays trace the reception accorded Keynesian ideas initially during the 1930s and then in the years after World War II in a wide range of nations including Britain the United States France Germany Italy Japan and Scandinavia The contributors review the latest historical evidence to explain why some nations embraced Keynesian policies while others did not At a time of growing interest in comparative public policy making they examine the central issue of how and why particular ideas acquire influence over policy and politics Based on three years of collaborative research for the Social Science Research Council the volume takes up central themes in contemporary economics political science and history The contributors are Christopher S Allen Marcello de Cecco Peter Alexis Gourevitch Eleanor M Hadley Peter A Hall Albert O Hirschman Harold James Bradford A Lee Jukka Pekkarinen Pierre Rosanvallon Walter S Salant Margaret Weir and Donald Winch

West, 2010-11-23 Economic policymaking has perpetually been one of the central dilemmas facing Congress leading to huge budget deficits and disagreements among legislators about spending priorities and tax policies This book examines congressional decision making on economic policy during the Reagan administration It looks at legislative actions on Reaganomics tax reform and the politics of deficit reduction and shows the importance of looking not just at the consequences of these decisions but also at the legislative processes that led to them Using an activist based approach and previously unexamined data Darrell West shows that district activists often more conservative than the public at large exerted a disproportionate and misleading effect on congressional voting When this support eventually proved unstable a more skeptical Congress began to eventually back away from the president's policies This move had serious consequences for deficit reduction and policy initiation and also influenced the final shape of the tax reform package adopted in 1986

Mujeri, Neaz Mujeri, 2021-03-18 This book examines the theory and global evidence on structural transformation

along with stylised facts and implications using among others a dynamic panel model for South Asia The characteristics of the structural transformation process in Bangladesh bring out the relevance of a comprehensive and inclusive South Asian brand in view of the challenges of large population size high burden of poverty rising inequalities and its compulsion to achieve rapid and sustained inclusive development The analysis highlights several distinct characteristics of Bangladesh s structural transformation including changes in value added trade employment productivity formal informal jobs and opportunities for low skilled workers The book suggests that the manufacturing sector could not create the required number of jobs and generate rapid absolute and relative productivity gains in the Bangladesh economy Although the services sector has largely led output and employment growth services subsectors with strong labour absorptive capacity have low average productivity Hence growth enhancing structural transformation led by these subsectors is likely to be less dynamic than required for rapid employment creating growth in the economy The book s analysis on COVID 19 and cyclone Amphan shows that an integrated disaster and development paradigm is needed for Bangladesh An inclusive and health and well being focused structural transformation presents the pathway to advance the people centred approach to development in Bangladesh through both vulnerability reduction and investments in sustainable development that would offset both known and unknown disaster threats The key for Bangladesh is to skillfully manage the developer s dilemma of achieving both structural transformation in terms of large productivity gains and inclusive growth for reducing poverty and rising inequalities This book is relevant to students academicians and development practitioners and others interested in contemporary development

Public Financial Management in the European Union Marta Postuła,2022-04-19 This book reveals how to create efficient institutions and coordinate policy on a transnational scale to ensure that European Union integration can best meet social needs It offers a combined technocratic and humanist perspective on the discussion of public financial management The state as part of its public policy should seek to preserve our social and environmental values yet there are mounting imbalances in society which point to the growing role of the state in minimising them Under such circumstances it is worth reflecting on how new challenges could require updated more complex formulas to deal with crises in current times and for social and economic policy making by states and the European Union generally which would ensure their compatibility with the world financial markets The work offers an in depth and unique performance analysis of European Union institutions compared to the

national entities of EU Member States It contributes to the ongoing debate on global public goods and the processes involved in managing their provision Further it discusses public finance management instruments indicating their historical evolution in practice and their effectiveness measured with the Human Development Index The author presents a proposal of how to manage global European and national public goods across three areas environmental protection transnational infrastructure projects and social policy The book analyses public financial management instruments used during the recent pandemic making a distinction between regular and emergency instruments and assessing their effectiveness in specific economic situations This will be of interest to researchers and students of economics and finance as well as decision makers and practitioners from governments international organisations and specific non governmental organisations concerned with issues of public finance management

Gendering Globalization on the Ground Gay Young, 2014-11-13 How has globalization worked for women working on the frontlines of neoliberalism on the Mexico US border This border divides US from Others and produces social inequalities that form a site where marginalized border women encounter the othering power of neoliberalism and confront inequalities of gender and class Within this context a critical comparison of socially similar women working either in export production industries or in small scale commerce and low level services in Ciudad Juarez reveals how export factory work constrains women s empowerment at home as well as the wages they earn and the well being of their households This volume challenges the neoliberal rationale of empowering women to support market growth and argues instead for understanding women s empowerment as a process of transformation from disempowerment by gender power relations to challenging masculinist domination in households and ultimately the economy and society Because structures of gender and globalization are mutually constituted women s empowerment as gender democracy is integral to producing alternative democratic globalization Using a feminist methodology that gives attention to the standpoint of women located on the downside of social hierarchies and takes into account strategically diverse points of view this study develops analysis to counter neoliberal globalization as it touches down in the lives of ordinary women and men on the border and beyond

Romina Kazandjian, Ms. Lisa Kolovich, Ms. Kalpana Kochhar, Ms. Monique Newiak, 2016-07-14 We show that gender inequality decreases the variety of goods countries produce and export in particular in low income and developing countries We argue that this happens through at least two channels first gender gaps in opportunity such as lower educational enrollment rates for girls than for boys harm diversification by constraining the potential pool of human capital available in an economy Second gender gaps in the labor market impede the development of new ideas by decreasing the efficiency of the labor force Our empirical estimates support these hypotheses providing evidence that gender friendly policies could help countries diversify their economies *Scheming for the Poor* William Ascher, 1984 Comparison of political aspects of economic policy aiming at income redistribution in Argentina Chile and Peru focuses on the policy making process comparing the approaches of populist reformist and radical political leadership discusses inflation and investment policy trade policy balance of payments tax reform land reform wage policy public expenditure on social services etc considers trade union attitudes and landowners rural workers entrepreneurs and employers attitudes and armed forces political opposition
