Evaluation for Participation and Sustainability in Planning Angela Hull, E.R. Alexander, Abdul Khakee, Johan Woltjer, 2012-03-29 Planning evaluation is required to establish the success of planning interventions both of physical developments and new approaches Yet this should not be a task undertaken purely by professionals without participation by those affected by the process and outcomes of the projects This book provides case studies and advice on how to balance conservation with economic growth the cost effectiveness of plans alongside the effects upon the community and the importance of engaging with all stakeholders involved in a project Practical aspects of the evaluation process covered include how evaluation is used in planning introducing new kinds of information or criteria alternative ways of collecting presenting information how strategic planning objectives are implemented in local practice International contributors provide empirical studies and cases of application which are of practical value to those involved in the evaluation of planning The book concludes by offering a new paradigm a locally oriented context specific participatory and multi disciplinary approach to planning evaluation
Environmental Management Accounting and Supply Chain Management Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19 This volume s focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition

Economics of Poverty, Environment and Natural-Resource Use Rob B. Dellink, Arjan Ruijs, 2008-03-25 Reduction of poverty is a tremendous and persistent challenge for the global community Given that the livelihood of millions is at stake there is an urgent need to reconsider the causes of and the remedies for poverty Poverty and its reduction are closely linked to the natural resources base The quality and bounty of the

local environment certainly affect living conditions of the poor and their poverty is often seen as a contributing factor to the degraded condition of the local environment Teasing apart the direction of causality in this resource poverty nexus is a serious empirical challenge This book contributes to an improved understanding of the economic dimensions of environmental and natural resource management and poverty alleviation The ten chapters of the book offer an overview of the current knowledge concerning the relation between poverty environment and natural resource use Three sides of the debate receive particular attention First the relation between resource use and poverty is discussed from a theoretical point of view Second it is questioned whether payments for environmental services or considering values of resources can be an effective tool for stimulating both sustainable resource use and poverty alleviation Third alternative strategies to break the land degradation poverty cycle are discussed

Green Accounting in Europe — Four case studies Anil

Markandya, Marcella Pavan, 2012-12-06 Conventional economic accounts which measure Gross National Product GNP and related indicators of national performance do not fully allow for the damages caused to the environment in the course of producing and consuming goods and services Nor do they fully account for the fact that some resources are being depleted in achieving the living standards that we enjoy today This failure is important because policy makers are guided by the changes in macroeconomic indicators such as GNP Moreover such indicators are not a good guide to the sustainability of present practices of consumption and production This book provides practical estimates of one key area of neglect in the present national accounts the measurement of environmental damages The book sets out the methodology for making such estimates and then applies it to data from four countries Germany Italy The Netherlands and the UK The results show what can be achieved in the way of consistent damage estimates and what the key problems are

Handbook of Biodiversity

Valuation A Guide for Policy Makers OECD, 2002-03-26 This Handbook describes the types of values usually associated with biodiversity While there are exceptions to the need to prioritise economic values over other values economic valuation has a sound theoretical foundation that can help clarify the tradeoffs implicit in public policy decisions

Environmental Management: Issues and Concerns in Developing Countries Pradip K. Sikdar, 2021-03-17 This book deals with issues and concerns for the human environment in the developing countries incorporating natural processes and systems pollution removal technology energy conservation environmental impact assessment process economics culture political structure and societal equity from a management point of view Solutions to the emerging problems of the environment need a paradigmatic shift in approach from a process based model to a socio political economic model Hence environmental management should involve equality and control over use of the finite natural resources and the balance between Earth's biocapacity and humanity's ecological footprint Changes such as green technologies human population stabilization and adoption of ecologically harmonious lifestyles are absolutely essential and will require redesigning of political institutions policies and revisiting forgotten skills of sustainable practices of environmental management These challenges should centre on

environment governance using the concepts of common property equity and security This book is relevant for academics professionals administrators and policy makers who are concerned with various aspects of environment management and governance

The Biodiversity Observation Network in the Asia-Pacific Region Shin-ichi Nakano,Tetsukazu Yahara,Tohru Nakashizuka,2012-07-26 Biological diversity is important for ecosystem function and services which in turn is essential for human well being Under the Convention on Biological Diversity international efforts have been made to achieve a significant reduction in the current rate of biodiversity loss The loss continues however The Asia Pacific region includes both developing countries with high biodiversity and developed countries with sophisticated data collection and analyses but only limited information about the status quo of biodiversity in this region has been available Many Asia Pacific countries have rapidly grown their economies and social infrastructures causing a loss of biodiversity and requiring an urgent mandate to achieve a balance between development and conservation in the region In December 2009 scientists successfully organized the Asia Pacific Biodiversity Observation Network in the region to establish a network for research and monitoring of ecosystems and biodiversity and to build a cooperative framework The present volume is the first collection of information on biodiversity in the Asia Pacific and represents a quantum step forward in science that optimizes the synergy between development and biodiversity conservation
