Handbook of Public Economics Martin Feldstein, A.J. Auerbach, 2002-01-25 The Field of Public Economics has been changing rapidly in recent years and the sixteen chapters contained in this Handbook survey many of the new developments As a field Public Economics is defined by its objectives rather than its techniques and much of what is new is the application of modern methods of economic theory and econometrics to problems that have been addressed by economists for over two hundred years More generally the discussion of public finance issues also involves elements of political science finance and philosophy These connections are evidence in several of the chapters that follow Public Economics is the positive and normative study of government's effect on the economy We attempt to explain why government behaves as it does how its behavior influences the behavior of private firms and households and what the welfare effects of such changes in behavior are Following Musgrave 1959 one may imagine three purposes for government intervention in the economy allocation when market failure causes the private outcome to be Pareto inefficient distribution when the private market outcome leaves some individuals with unacceptably low shares in the fruits of the economy and stabilization when the private market outcome leaves some of the economy's resources underutilized The recent trend in economic research has tended to emphasize the character of stabilization problems as problems of allocation in the labor market The effects that government intervention can have on the allocation and distribution of an economy's resources are described in terms of efficiency and incidence effects These are the primary measures used to evaluate the welfare effects of government policy

Venture Capital, Entrepreneurship, and Public Policy Vesa Kanninen, Christian Keuschnigg, 2004-12-03 Experts in public economics and financial economics discuss the special

role of venture capital and if public policy should promote the venture capital industry empirical and theoretical perspectives are developed The existing literature in both public economics and financial economics often fails to consider how appropriate and effective public policy may be in promoting the venture capital industry Public economics has dealt extensively with the effect of taxes and subsidies but has neglected the unique role of venture capitalists as active investors who provide not only funding but added value Financial economics has emphasized the special role of the venture capitalist but has not focused on the real effects of venture capital in industry equilibrium or the role of public policy This volume in the CESifo Seminar series brings together experts in public and financial economics to develop a theoretically and empirically informed international policy perspective for an era in which policymakers increasingly look to venture capital as a source of jobs innovation and economic growth The chapters in part I analyze data on the levels of venture capital fundraising in Europe problems in the bank oriented beginnings of German venture capital finance in the 1970s and the inefficiency of Canadian labor sponsored venture capital funds Part II looks at the effect of venture capital on labor market performance the importance of exit opportunities and the effect of information inflows on the venture capital cycle The chapters in part III take the perspective of public economics reviewing the role of public policy in addressing potential market failures improving the quality of venture capital investments and affecting entrepreneurial business activity through tax policy

Handbook of Experimental Economics Results Charles R. Plott, Vernon L. Smith, 2008-08-21 Experimental methods in economics respond to circumstances that are not completely dictated by accepted theory or outstanding problems While the field of economics makes sharp distinctions and produces precise theory the work of experimental economics sometimes appear blurred and may produce results that vary from strong support to little or partial support of the relevant theory At a recent conference a question was asked about where experimental methods might be more useful than field methods Although many cannot be answered by experimental methods there are questions that can only be answered by experiments Much of the progress of experimental methods involves the posing of old or new questions in a way that experimental methods can be applied The title of the book reflects the spirit of adventure that experimentalists share and focuses on experiments in general rather than forcing an organization into traditional categories that do not fit The emphasis reflects the fact that the results do not necessarily demonstrate a consistent theme but instead reflect bits and pieces of progress as opportunities to pose questions become recognized This book is a result of an invitation sent from the editors to a broad range of experimenters asking them to write brief notes describing specific experimental results The challenge was to produce pictures and tables that were self contained so the reader could understand quickly the essential nature of the experiments and the results

Advances in Local Public Economics Minoru Kunizaki, Kazuyuki Nakamura, Kota Sugahara, Mitsuyoshi Yanagihara, 2019-02-23 This book introduces recent developments in both theoretical and empirical analyses of local public economics Theories of those economics as well as empirical analyses have been developed dramatically in various directions in recent years One direction has been to reflect real economic circumstances especially in Japan In the early 2000s Japan experienced the so called great merger or consolidation of municipalities in the Heisei era 1999 through the present with the number of municipalities shrinking from 3 232 to 1 821 for increasing administrative and financial efficiency This phenomenon is mainly due to a drastic change in demography in Japan the diminishing birthrate and aging population Following the consolidation regional coordination has been undertaken to raise overall administrative and financial efficiency In sum various types of public policies for tackling the decreasing birthrate and aging population have been carried out Urban sprawl and the timing of municipal mergers are dealt with from a broad point of view and public child care services and tax competition are investigated from a policy standpoint Another direction has been to incorporate new ideas for forming theoretical frameworks for local public finance most of which have been based on static situations In the recent trend toward globalization local governments have attended not only to the welfare of residents but also to the interests of regional economic development In addition decision making by local governments has tended to be affected by political activities Thus the endogenous growth setting and lobbying activities

for the activities of local governments are discussed in the book With these new directions for analyses the author tackles the topics of tax competition cross border shopping local provision of public goods and soft budgets thus covering a broad range of aspects of local public finance

Resources, Power, and Economic Interest Distribution in China Zhang Yishan, Yu Weisheng, Wang Guangliang, 2021-03-30 Based on an investigation of economic and resource allocation factors and their close relation to economic power this book puts forward the power paradigm a new economic research paradigm revealing the relationship among power institutions and resource allocation mechanisms helping to establish a valid connection between macroeconomics and microeconomics and shedding light on real world economic issues Drawing on classical neoclassical and institutional economics and how these schools of thought have impacted on economic development in China over the past century the book sheds light on distribution processes and argues that enterprise contracts market pricing policies laws and regulations can all be classified as interest distribution mechanisms informed by a variety of power games The power paradigm suggests that to achieve full utility and an optimal allocation of resources to foster social welfare power reciprocity needs to be shared among different economic agents at the same hierarchy level while making sure that power and responsibility are equivalent for each economic agent The book will appeal to research students and academics interested in heterodox economics pluralist approaches institutional economics and game theory

Decision-Making Processes and Asymmetry of Information Massimo Marrelli, Giacomo Pignataro, 2012-12-06 The problems arising from the existence of asymmetric information in public decision making have been widely explored by economists Most of the traditional analysis of public sector activities has been reviewed to take account of the possible distortions arising from an asymmetric distribution of relevant information among the actors of the public decision making process A normative approach has been developed to design incentive schemes which tackle adverse selection and moral hazard problems within public organisations our understanding of these problems is now much better and some of the mechanisms designed have had important practical implications While this analysis is still under way in many fields of public economics as the papers by Jones and Zanola and Trimarchi witness a debate is ongoing on the possible theoretical limitations of this approach and on its actual relevance for public sector activities This book encompasses different contributions to these issues on both theoretical and practical areas which were firstly presented at a conference in Catania The innermost problem in the current discussion arises from the fact that this normative analysis is firmly rooted in the complete contracting framework with the consequence that despite the analytical complexities of most models their results rely on very simplified assumptions Most complexities of the organisation of public sector and more generally of writing contracts are therefore swept away
