Ecosocialism Or Ecocapitalism:

Eco-Socialism or Eco-Capitalism? Saral Sarkar,1999-05-01 This major synoptic work explores some of the most important questions facing humanity in the coming generations It is remarkable for its author's holistic treatment of the environment and social justice as inescapably related questions his refusal to analyze the industrialized and developing countries as though they are so different that any understanding of the one can ignore the other and his integrity in exploring difficult and controversial questions from a stance that always addresses the evidence even if that leads to conclusions that are not currently fashionable Saral Sarkar argues that the USSR bumped up against environmentally defined and resource related limits to growth at a relatively early stage But this does not mean that a free market globalized capitalist economy will indefinitely escape a similar fate Nor will a modified eco capitalism as promoted by some sections of the Western environmental movement provide a sufficiently grounded solution to the twin problems of environmental destruction and social injustice The author looks therefore to a fundamentally different future one in which our very notion of progress is differently conceived

Saral Sarkar,2023-08-14 After the ignominious fall of the classical Soviet model of socialism in the early 1990s socialists communists and all other kinds of Leftists had felt to have been left in the lurch With his book Eco Socialism or Eco Capitalism A Critical Analysis of Humanity's Fundamental Choices 1999 Saral Sarkar presented and laid the theoretical foundation of a new conception of socialism which convinced because it organically synthesized the newly arisen imperative

of ecological sustainability and the old ideal of equality among members of humanity On their part all opponents of any kind of socialism have also been trying to somehow accommodate the inexorable insights and demands of true ecological sustainability in extant conceptions of capitalism What they have achieved is not a synthesis but merely a fake and self contradictory phrase that does not deserve the prefix Eco and should properly be called Green Capitalism But they succeeded in hoodwinking millions of worried human beings all over the world In the last thirty years Sarkar has been relentlessly trying through speeches and writings to counter their misconceptions of the ecological and social imperatives In the present two volumes of his Collected Writings readers will find some of the fruits of his endeavor **Ecosocialism**

Salvatore Engel-Di Mauro,2024-11-30 This book offers an extensive critical overview of eco socialism one of the most generative and significant aspects of contemporary debates within socialism Marxism has played a foundational role in the development of ecosocialism since its inception and has also led to critical reflections on the 20th century Marxism and ecological interpretation of Marxist writings Despite the relevance of ecosocialism to the pressing debates on the ecological crisis and the growing literature on ecosocialism there has not been a comprehensive account on ecosocialism and its variations This volume seeks to fill this important gap and to pave the way for a more systematic development of this emerging paradigm The book not only engages with a critique of other non socialist ecological schools of thought in defence of ecosocialism but also provides a critical overview of debates within ecosocialism and of ecosocialism itself The latter includes an appraisal of ecosocialism in Bolivarian Venezuela and the implications of current efforts in the People s Republic of China to build an ecological civilisation Furthermore the book contains a crucial discussion about the relation between eco socialism and indigenous studies and movements **Eco-Socialism** David Pepper,2002-09-26 First Published in 2004

Routledge is an imprint of Taylor Francis an informa company Eco-socialism as Politics Qingzhi Huan,2010-03-11 This volume consists of analyses by experts from both the West and the East on the up to date development of Eco socialism as a red green politics within the context of capitalist globalisation It investigates whether and or in what sense Eco socialism can offer a better explanation to the causes of ecological problems than the other Green discourses such as deep ecology and ecological modernisation theory and thus has more contributions to make in dealing with the deteriorating ecological crisis throughout the world **The Routledge Handbook on Ecosocialism** Leigh Brownhill,Salvatore Engel-Di Mauro,Terran

Giacomini,Ana Isla,Michael Löwy,Terisa E. Turner,2021-12-27 Building on the classical works that have propelled and shaped ecosocialist thinking and action and more recent political developments on the ground the volume will provide a reference point for international work in the field both directly political and academic The Handbook acquaints readers with the varied roots of and sometimes conflicting approaches to ecosocialism It does not attempt any unification of ecosocialist currents Rather it aims to provide a resource that is as comprehensive as possible with respect not only to theorization and ideological framing but also and especially to existing projects practices and movements and giving a sense of the geographical reach

that ecosocialism so far represents This includes scholarship that extends Marxist foundations and reflects on more recent political developments The theoretical and practice oriented moorings are buttressed by discussions on movements frameworks and prefigurative processes as well as on social struggles occurring within institutional settings Together the collection offers a reference point for international work in the field in social movements and in institutional transformations Providing detailed but accessible overviews of the complex varied dimensions of ecosocialism the Handbook is an essential up to date guide and reference not only for researchers but also for undergraduate and graduate students in geography environmental studies development studies sociology and political science as well as for policymakers and activists

Democratic Eco-Socialism as a Real Utopia Hans A. Baer, 2017-10-01 As global economic and population growth continues to skyrocket increasingly strained resources have made one thing clear the desperate need for an alternative to capitalism In *Democratic Eco Socialism as a Real Utopia* Hans Baer outlines the urgent need to reevaluate historical definitions of socialism commit to social equality and justice and prioritize environmental sustainability Democratic eco socialism as he terms it is a system capable of mobilizing people around the world albeit in different ways to prevent on going human socio economic and environmental degradation and anthropogenic climate change **The Politics of Ecosocialism**

Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound it is clear that we need a fundamentally new approach to tackle these issues This innovative book offers a unique perspective stressing the necessity of both ecological and social change as it discusses how to create a red green or eco socialist society Examining the current crises of welfare capitalism as well as the challenges and conflicts of an eco socialist society the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability It analyses the key social and ecological issues related to the welfare state including green Keynesianism ecological Marxism the limits of growth and no growth capitalist barriers to a renewable energy transition proposals for a universal basic income and the role of technology Finally the book outlines possible paths of transformation towards creating an eco socialist society drawing out lessons that can be applied internationally This book will be of great interest to students and researchers in economics environmental studies and political science Eco-Socialism For Now and the Future

Robert Albritton, 2019-04-23 It is increasingly apparent that capitalism cannot stave off the truly frightening ecological disasters that threaten the future of life on earth Is it an accident that the strongest and most capitalist economic force in the world the US is also that force that is most prone to the denial of the enormous dangers of global warming While capitalism is a global force it is not supported by the majority of the world and much more thought and action is needed to integrate and globalize movements against oppression injustice and ecological destruction While changes at a local level are important and more feasible in our current world ultimately changes at a global level may have greater long term importance and we need to greatly expand theorizations and mobilizations in

this direction now Robert Albritton proposes practical utopias as a process of thinking by which short term changes tend in the direction of desirable changes in the longterm Political Economy of Eco-sustainable Alternatives Richard

Westra,2025-08-22 Westra recounts how the unceremonious collapse of Soviet style socialism coupled with mounting awareness of unfolding environmental destruction and irreversible climate change opened the door to a new wide ranging social change literature In this exciting book he begins by tracing out the case for the Anthropocene He then provides an unparalleled inclusive critical exploration of the plurality of progressive designs on offer These include the Green New Deal nowtopias of cooperative solidarity and commoning economies ecofeminism Degrowth society as well as ecosocialism and democratic socialism Westra firstly explains why the Green New Deal program to sustainably develop capitalism is unworkable given the boundedness of resources necessary to generalize the advanced economy way of life it seeks to maintain Secondly while he concurs with much that the new social change literature offers his concern is with the way it abandons a major caution that had been leveled at so called utopian socialists in the past To be sure the problem does not reside with bursts of creative future directed thinking in themselves Rather where difficulties arise is over the paucity of attention devoted to questions of economic coordination and principles of economic viability Westra explains how only by combining several economic principles each operating at a determinate scale and devoted to specific elements of human social and material reproduction will the promise of an equitable eco sustainable human future be realized This unique volume will be of interest to academic specialists and students of political economy economics environmental sustainability sociology and political science Progressive policymakers and social activists will also find its arguments refreshing and compelling **Building the Critical Anthropology of Climate Change** Hans A. Baer,Merrill Singer,2024-08-14 This book

applies a critical perspective to anthropogenic climate change and the global socio ecological crisis The book focuses on the critical anthropology of climate change by opening up a dialogue with the two main contending perspectives in the field namely the cultural ecological and the cultural interpretive perspectives Guided by these the authors take a firm stance on the types of changes that are needed to sustain life on Earth as we know it Within this framework they explore issues of climate and social equity the nature of the current era in Earth s geohistory the perspectives of the elite polluters driving climate change and the regrettable contributions of anthropologists and other scholars to climate change Engaging with perspectives from sociology political science and the geography of climate change the book explores various approaches to thinking about and responding to the existential threat of an ever warming climate In doing so it lays the foundation for a brave new sustainable world that is socially just highly democratic and climatically safe for humans and other species This book will be of interest to researchers and students studying environmental anthropology climate change human geography sociology and political science **Grappling with Societies and Institutions in an Era of Socio-Ecological Crisis** Hans
