Timothy, Ross Kingston Dowling, 2003 Annotation As a result of the ongoing growth in the tourism industry many destinations around the world are undergoing transformations New destinations are being discovered in regions previously ignored as people search for regions that are yet unspoiled by the ravages of mass tourism At the same time traditional destinations are experiencing rapid environmental socio cultural and economic modifications These changes have the most effect on the destination community the location where tourists spend their time and money and influence development or degradation of the local environment Tourism in Destination Communities describes both the positive and negative effects of tourism on the destination community The chapters are divided into three sections which address the relationship between tourism and the destination community the various impacts of tourism on the destination community and the challenges and opportunities for destination communities Each chapter contains brief case studies and empirical examples Conservation and Development Andrew Newsham, Shonil Bhagwat, 2015-12-22 Conservation and development share an intertwined history dating back to at least the 1700s But what are the prospects for reconciling the two and how far have we come with this project This book explores these questions through a detailed consideration of the past present and future of the relationship between conservation and development Bringing to bear conceptual resources from political ecology social ecological systems thinking and science and technology studies Conservation and Development sets this relationship against the background of the political and economic processes implicated in environmental degradation and poverty alike Whilst recognising that the need for reconciling conservation and development processes remains as compelling as ever it demonstrates why trade offs are more frequently

encountered in practice than synergies It also flags alternative visions for conservation and development obscured or ignored by current framings and priorities Bringing together policy and theory Conservation and Development is an essential resource for undergraduate and postgraduate students and a useful reference for researchers in related fields Each chapter contains a reading guide with discussion questions The text is enlivened by a number of new case studies from around the world A must read for anyone interested in understanding the history current state and projections for future shifts in the relationship between conservation and development
