Worswick,2024-09-18 Originally published in 1976 the 14 papers in this collection discuss the history and significance of the concept of involuntary unemployment particularly as seen from a Keynesian perspective The micro economic foundations of employment and job search theory and the measurement and the significance of employment statistics are also examined Later sections consider aspects of unemployment as economic indicators and the relationship between unemployment and vacancies as well as the social aspects of unemployment A final chapter considers employment policies during the 20th century in the light of managing the economy **A Theory of Inequality and Taxation** Patricia Apps,1981 The author presents a theory of institutional inequality in which in analysing taxation she shows that tax incidence depends upon the causes of inequality Just Taxes Martin Daunton,2002-10-17 In 1914 taxation was about 10 per cent of GNP by 1979 taxes had risen to almost half of the total national income and contributed to the rise of Thatcher Martin Daunton continues the story begun in *Trusting Leviathan* offering an analysis of the politics of acceptance of huge tax rises after the First World War and asks why it did not provoke the same levels of discontent in Britain as it did on the continent He further questions why acceptance gave way to hostility at the end of this period Daunton views taxes as the central driving force for equity or efficiency As such he provides a detailed discussion of their potential in providing revenue for the state and their use in shaping the social structure and influencing economic growth *Just Taxes* places taxation in its proper place at the centre of modern British history The Growth of the British Economy 1918-1968 G. A. Phillips,R. T. Maddock,2021-11-21 Originally published in 1973 the aim of this work was to discuss the various factors governing the rate of growth of the British economy since the First World War It endeavours to explain or at least to provide the groundwork for an explanation of the movements of aggregate production and productivity in this period In so doing it examines two particular and partly antithetical questions why Britain exceeded the predictions of economic theorists who until at least the Second World War had forecast a retardation of growth in all mature industrial economies and why especially since 1950 the economy has expanded less quickly than many professional economists and almost all politicians thought possible The authors look in turn at the changing trends in effective economic demand both domestic and foreign the supply of labour and capital and the role of management and the state in fostering growth Their object is to produce a balanced mixture of the available historical and statistical evidence and the relevant economic theory They introduce their readers at the same time to the more specialized

works of both disciplines The book is the product of a fruitful collaboration between an economist and a historian both with considerable experience in teaching students combining their two subjects It marries accordingly the qualities of apt and informative use of evidence wide ranging theoretical discussion and clarity of exposition **Effects of the selective employment tax** W.B. Reddaway,1970 Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,1924 Contains the 4th session of the 28th Parliament through the session of the Parliament *Industrial Subsidies* C. Wren,1996-09-25 This book describes the adoption growth and subsequent relinquishment of industrial subsidies in the UK tracing their development back to the early years of this century and following their extension through to virtually every area of economic policy This includes the foothold gained for industrial subsidies in the run up and aftermath of the First World War the application of large scale subsidies to agriculture in the Depression the plans for an interventionist industrial strategy devised in the Second World War and the gradual expansion of industrial subsidies from this time through to their heyday in the late 1970s Considerable attention is devoted to events in the 1980s including the extension of financial assistance to urban and rural policy small and new firm measures technology support collaborative research programmes and advisory schemes
