Roberts,1997 This study presents the movement from an oral to a literate culture in the West Indies with the English language as central to this movement The period examined from the start of the first English settlement in the islands up to the time of Emancipation was the period which established the foundations of West Indian society The study relates the movement towards a literate culture to the development of methods of communication in the plantation slave society to general literary and intellectual development and to the expansion of formal education Literacy in English is regarded as a barometer of social development because the English language was sustained internally and externally as the language of those who ruled and contrary to fundamental notions associated with the power of literacy it maintained privilege within certain sectors of the society There is no other study which provides the interdisciplinary approach of this work in accounting for the development of literate culture in the West Indies **Yotvata** Lily Singer-Avitz,Etan Ayalon,2023-01-03 This book presents the final report of the excavations at Yotvata the largest oasis in the Arabah Valley conducted by the Sonia and Marco Nadler Institute of Archaeology of Tel Aviv University in 1974 1980 under the direction of Dr Ze ev Meshel The report covers two central sites a fortified Iron I site and an Early Islamic settlement The Iron I remains consist of an irregular casemate wall surrounding a courtyard The location of this site suggests that the settlement was established in order to protect the water sources and to overlook and supervise the nearby crossroads Based on the relative proximity of the site to Timna it may be concluded that the oasis formed the main source of water and wood for the population involved in copper production in that region The rich finds uncovered at the Early Islamic settlement including a large courtyard building and a nearby bathhouse among other structures point to habitation from the end of the seventh to the early ninth century CE The proximity of the settlement to a sophisticated irrigation system qanat and the administrative economic ostraca discovered at the site suggest that it served as the center of

an agricultural estate owned by an elite Muslim family Among the unique finds is a large assemblage of locally produced handmade pottery which is thoroughly studied here The findings from the excavations at the Yotvata oasis have made a major contribution to the study of Early Islamic settlement and material culture in the greater Arabah region and beyond

 How Things Shape the Mind Lambros Malafouris,2016-02-12 An account of the different ways in which things have become cognitive extensions of the human body from prehistory to the present An increasingly influential school of thought in cognitive science views the mind as embodied extended and distributed rather than brain bound or all in the head This shift in perspective raises important questions about the relationship between cognition and material culture posing major challenges for philosophy cognitive science archaeology and anthropology In How Things Shape the Mind Lambros Malafouris proposes a cross disciplinary analytical framework for investigating the ways in which things have become cognitive extensions of the human body Using a variety of examples and case studies he considers how those ways might have changed from earliest prehistory to the present Malafouris s Material Engagement Theory definitively adds materiality the world of things artifacts and material signs into the cognitive equation His account not only questions conventional intuitions about the boundaries and location of the human mind but also suggests that we rethink classical archaeological assumptions about human cognitive evolution Handbook to Life in Prehistoric Europe Jane McIntosh,2009-06-01 For most of Europe s long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunger gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe s massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail Handbook to Life in Prehistoric Europe gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire **Evolution and the Mechanisms of Decision Making** Peter Hammerstein,Jeffrey R. Stevens,2024-03-19 A multidisciplinary examination of cognitive mechanisms shaped over evolutionary time through natural selection that govern decision making How do we make decisions Conventional decision theory tells us only which behavioral choices we ought to make if we follow certain axioms In real life however our choices are governed by cognitive mechanisms shaped over evolutionary time through the process of natural selection Evolution has

created strong biases in how and when we process information and it is these evolved cognitive building blocks from signal detection and memory to individual and social learning that provide the foundation for our choices An evolutionary perspective thus sheds necessary light on the nature of how we and other animals make decisions This volume with contributors from a broad range of disciplines including evolutionary biology psychology economics anthropology neuroscience and computer science offers a multidisciplinary examination of what evolution can tell us about our and other animals mechanisms of decision making Human children for example differ from chimpanzees in their tendency to over imitate others and copy obviously useless actions this divergence from our primate relatives sets up imitation as one of the important mechanisms underlying human decision making The volume also considers why and when decision mechanisms are robust why they vary across individuals and situations and how social life affects our decisions **Essouk - Tadmekka** ,2017-11-20 Essouk Tadmekka presents the first archaeological exploration of one of the most important market towns on the trans Saharan camel caravan routes in the early Islamic period supplying West African gold slaves and ivory to the Mediterranean world Excavation of Essouk Tadmekka s ruins in Saharan West Africa has enabled Sam Nixon and a team of scholars to better understand this town described by early Arabic geographers therein providing insights into such wider questions as the origins of trans Saharan trade the commerce in gold and the arrival of Islamic culture in West Africa This window into the earliest period of trans Saharan exchange includes illustration of some of the best preserved ruins along the camel caravan routes the earliest known Arabic writing in West Africa and rare gold working remains Contributors are Stephanie Black Sophie Desrosiers Laure Dussubieux Thomas Fenn Dorian Fuller James Lankton Kevin MacDonald Paulo de Moraes Farias Mary Anne Murray Sam Nixon Thilo Rehren Peter Robertshaw Jane Sidell and Benoit Suzanne **The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers** Vicki Cummings,Peter Jordan,Marek Zvelebil,2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity Dinosaur Eggs

and Babies Kenneth Carpenter,Karl F. Hirsch,John R. Horner,1996-01-26 In the last two decades the study of dinosaur eggs and babies has proved a very profitable area of dinosaur research This book is solely devoted to this topic and reviews our present state of knowledge in this area of paleontology   **Annual Report** New Jersey. State College. Agricultural Experiment Station,1921   **Annual Report** New Jersey Agricultural Experiment Station,1921 Includes report of the New Jersey Agricultural College Experiment Station   **The Reality of Artifacts** Michael Chazan,2018-08-31 Artifacts are hybrids both natural and cultural They are also an essential component in the process of human evolution In recent years a wide range of disciplines including cognitive science sociology art history and anthropology have all grappled with the nature of artifacts leading to the emergence of a renewed interdisciplinary focus on material culture The Reality of Artifacts An Archaeological Perspective develops an argument for the artifact as a status conferred by human engagement with material On this basis artifacts are considered first in terms of their relationship to concepts and cognitive functions and then to the physical body and sense of self The book builds on and incorporates the latest developments in archaeological research particularly from the archaeology of human evolution and integrates this wealth of new archaeological data with new research in fields such as cognitive science haptics and material culture studies Making the latest research available for the general reader interested in material culture while also providing archaeologists with new theoretical perspectives built on a synthesis of interdisciplinary research this book is suitable for courses taught at both graduate and undergraduate students and is broadly accessible   *Cultural, Psychological and Typological Issues in Cognitive Linguistics* Masako K. Hiraga,Chris Sinha,Sherman Wilcox,1999-10-15 Cognitive linguistics is nothing if not an interdisciplinary and comparative enterprise This collection addresses both the implications OF and the implications FOR cognitive linguistics of psycholinguistic computational neuroscientific cross cultural and cross linguistic research   **Cognitive Models in Palaeolithic Archaeology** Thomas Grant Wynn,Frederick Lawrence Coolidge,2017 Cognitive Models in Palaeolithic Archaeology grew out of a specialized thematic session that we organized for the 2013 meeting of the European Society for the Study of Human Evolution Preface   Saharan Hunter-Gatherers Savino di Lernia,2022-07-28 This book explores the archaeology of the Acacus massif and surrounding areas in southwestern Libya over approximately 2500 years of the Early Holocene utilising fresh theoretical approaches and new explanations of the social and cultural processes of the area Archaeological and rock art evidence much of which is unpublished until now is used to explore the crucial period that encompasses the onset of the Green Sahara to the introduction of domestic livestock It provides a basis for understanding the original cultural and social developments of hunter gatherers and foragers of the central ranges of the Sahara The work also bears upon the wider area informing the reconstruction of the environment and cultural dynamics and stands as key reference point for the larger Sahara and North Africa The book rich in illustrations provides a critical synthesis and overview of the developments of central Saharan archaeology within the broader African framework The book is invaluable to archaeologists

palaeoenvironmental scientists and rock art researchers working on the Sahara and North Africa and as comparative work for researchers in African archaeology in general   Smart Villages Robert Krueger,Hermine Vedogbeton,Mustapha Fofana,Wole Soboyejo,2023-12-18 This book asserts that the goal of smart villages should shift from one of extraction to one of community value creation To begin this conversation we examine the smart village discourse debates in design theory non western traditions of innovation and sustainable development Through case studies of smart village co design we offer a way forward This book is relevant for engineers social scientists and development practitioners The book will be of special interest to those seeking to expand their inquiry into the role of science and technology in low and middle income countries
