## **Egyptian Faience And Glass:**

Egyptian Faience and Glass Paul T. Nicholson,1993 This book examines the technology of making this vitreous material and outlines its long history which stretches from early Predynastic times to the end of pharaonic Egypt and beyond The range of uses found for faience from amulets to large vessels is examined and some of the reasons for its popularity discussed About the author Paul Nicholson studied Archaeology and Prehistory at the University of Sheffield He has specialised in Egyptian crafts and technology especially ceramics and has led two ethno archaeological expeditions to study contemporary pottery making in Egypt

**Ancient Egyptian Materials and Technology** Paul T. Nicholson,Ian Shaw,2000-03-23 The book describes current research into all aspects of craftwork in ancient Egypt **Glass and Glazes from Ancient Egypt** Brooklyn Museum,Elizabeth Riefstahl,1948 How Glass Changed the World Seth C.

Rasmussen,2012-02-24 Glass production is thought to date to 2500 BC and had found numerous uses by the height of the Roman Empire Yet the modern view of glass based chemical apparatus beakers flasks stills etc was quite limited due to a lack of glass durability under rapid temperature changes and chemical attack This brief gives an overview of the history and chemistry of glass technology from its origins in antiquity to its dramatic expansion in the 13th century concluding with its impact on society in general particularly its effect on chemical practices **The Material World of Ancient Egypt** William

H. Peck,2013-08-12 The Material World of Ancient Egypt examines the objects and artifacts the representations in art and the examples of documentation that together reveal the day to day physical substance of life in ancient Egypt This book investigates how people dressed what they ate the houses they built the games they played and the tools they used among many other aspects of daily life paying great attention to the change and development of each area within the conservative Egyptian society More than any other ancient civilization the ancient Egyptians have left us with a wealth of evidence about their daily lives in the form of perishable objects from leather sandals to feather fans detailed depictions of trades and crafts on the walls of tombs and a wide range of documentary evidence from temple inventories to personal laundry lists Drawing on these diverse sources and richly illustrating his account with nearly one hundred images William H Peck illuminates the culture of the ancient Egyptians from the standpoint of the basic materials they employed to make life possible and perhaps even enjoyable Vitreous Materials at Amarna Andrew J. Shortland,2000 The earliest vitreous materials in Egypt date to c

4000 BC although the production of glass faience frit or Egyptian blue does not really take off until the 18th dynasty Andrew Shortland combines descriptions of various objects made from vitreous materials with an analysis of the processes and techniques used in their production *Ancient Glass* Julian Henderson,2016-02-04 This book is an interdisciplinary exploration of archaeological glass in which technological historical geological chemical and cultural aspects of the study of ancient glass are combined The book examines why and how this unique material was invented some 4 500 years ago and considers the ritual social economic and political contexts of its development The book also provides an in depth

consideration of glass as a material the raw materials used to make it and its wide range of chemical compositions in both the East and the West from its invention to the seventeenth century AD Julian Henderson focuses on three contrasting archaeological and scientific case studies Late Bronze Age glass late Hellenistic early Roman glass and Islamic glass in the Middle East He considers in detail the provenances of ancient glass using scientific techniques and discusses a range of vessels and their uses in ancient societies

**Development History Of Ancient Chinese Glass Technology**, 2021-02-04 Worldwide research on ancient glass began in the early 20th century A consensus has been reached in the community of Archaeology that the first manmade or synthetic glasses based on archaeological findings originated in the Middle East during the 5000-3000s BC By contrast the manufacturing technology of pottery and ceramics were well developed in ancient China The earliest pottery and ceramics dates back to the Shang Dynasty the Zhou Dynasty 1700 BC 770 BC while the earliest ancient glass artifacts unearthed in China dates back to the Western Han Dynasty Utilizing the state-of-the-art analytical and spectroscopic methods the recent findings demonstrate that China had already developed its own glassmaking technology at latest since 200 BC There are two schools of viewpoint on the origin of ancient Chinese glass The more common one believes that ancient Chinese glass originated from the import of glassmaking technology from the West as a result of Sino-West trade exchanges in the Western Han Dynasty 206 BC-25 AD The other scientifically demonstrates that homemade ancient Chinese glass with unique domestic formula containing both PbO and BaO were made as early as in the Pre-Qin Period or even the Warring States Period 770 BC-221 BC known as Yousha or Faience This English version of the previously published Chinese book entitled *Development History of Ancient Chinese Glass Technology* is for universities and research institutes where various research and educational activities of ancient glass and history are conducted With 18 chapters the scope of this book covers very detailed information on scientifically based findings of ancient Chinese glass development and imports and influence of foreign glass products as well as influence of the foreign glass manufacturing processes through the trade exchanges along the Silk Road

**Glass and Glass Production in the Near East during the Iron Age** Katharina Schmidt, 2019-03-12 This book examines the history of glass in Iron Age Mesopotamia

and neighbouring regions 1000-539 BCE This is the first monograph to cover this region and period comprehensively and in detail and thus fills a significant gap in glass research **Byzantine Materiality** Evan Freeman, Roland

Betancourt, 2024-06-04 This volume explores the power of matter and materials in the Eastern Roman Empire also known as Byzantium Recent attention to matter as dynamic and meaningful constitutes an emerging interdisciplinary field of inquiry known as materiality new materialism or the material turn Materials can be symbolic but matter can also act on human subjects This volume builds on these insights to consider the role of matter materials form and embodied experiences in Byzantium In many respects Byzantine materiality represents a continuation of its Greco Roman inheritance which was also shared by neighboring peoples such as the Umayyads and Abbasids But the Byzantines also developed their own unique perspectives on matter and form as with their parsing of the sacred materialities of icons the Eucharist and relics Chapters in this volume consider the cultural meanings and functions of materials such as gold and ivory the materiality of icons and relics experiences of objects as well as Byzantine philosophies of matter and form Materiality takes center stage in Byzantine constructions of power luxury belief and identity which will be of interest to scholars and students of Byzantium and the wider medieval world **Blue by Fire: A Marker of the Technical History of Glass and Ceramics** Howell G. M.

Edwards, Philippe Colomban, 2025-01-27 The use of natural mineral and synthetic blue pigments in antiquity for wall paintings and illuminated manuscript historiation evolved into the most suitable blue pigments for the decoration of glazed and enamelled wares ceramics glass and metal which required a stability at the high temperatures of the kilns used for glazing and firing Historic literature is often vague regarding the blue pigments used for this purpose The generic term cobalt blue covers a wide range of pigments that were actually used for the decoration of faience majolica stonewares earthenwares and porcelains This book addresses the application of elemental and molecular spectroscopic analytical techniques to a range of diverse problems which arise for decorated ceramics glass and enamels and related artefacts a history of techniques provenance and authentication The text contains an introduction to the important analytical techniques that are used in destructive and nondestructive analytical measurements and highlights potential future applications based upon novel miniaturised instrumentation for in situ studies The book is co authored by two international experts with many years experience in the application of analysis to artworks and archaeological artefacts and in the investigation of materials and sites for cultural heritage preservation Among 19 chapters one is devoted to an evaluation of the analytical techniques that are used and the pitfalls which can arise in the interpretation of the data The approach conveys the detailed information which has become available from the adoption of analytical techniques to diverse problems through the scientific interrogation of ceramic and related artefacts Examples are given of how the pigment analysis and sourcing can provide unique information about ancient trade routes and pigment sourcing historically A classic instance is provided by the transfer of European enamelling technologies carried out at the beginning of the 17th century in Japan Arita and at the turn of the

17th 18th centuries in China by the Jesuits established at the Court of respectively the Kyushu island of Daymios and the Chinese Qing Empero Kangxi It has hence been demonstrated that some of the most beautiful porcelains emanating from Japan and China in this period incorporate blue decoration with pigments supplied from Europe The interpretation of the analytical data can assist museum curators archaeologists art dealers experts and cultural heritage historians in the preservation and conservation of ancient materials which have applied blue pigment decoration

**Invention and Innovation** Janine Bourriau,Jacke Phillips,2004-10-01 In September 2002 a second workshop on the theme of the social context of technological change was held at the McDonald Institute for Archaeological Research University of Cambridge Discussion has been the core of these meetings so far with the aim being to relate the results of the specialist investigator to broad historical questions concerning the nature and development of ancient societies The papers presented here address a wider context geographically with the inclusion of the Aegean and thematically with papers on natural products and raw materials The time frame remains the same in covering the Late Bronze Age New Kingdom The majority of the papers draw on Egyptian evidence and illustrate a multiplicity of approaches to the problems set by ancient technologies modelling methodology of art history and archaeology applied to a problematic group of artefacts integration of archaeological and textual sources and the application of the results of scientific analysis to illuminate ancient technology

*Conservation and Restoration of Glass* Sandra Davison,R.G. Newton,2008-05-09 Conservation and Restoration of Glass is an in depth guide to the materials and practices required for the care and preservation of glass objects It provides thorough coverage of both theoretical and practical aspects of glass conservation This new edition of Newton and Davison s original book Conservation of Glass includes sections on the nature of glass the historical development and technology of glassmaking and the deterioration of glass Professional conservators will welcome the inclusion of recommendations for examination and documentation Incorporating treatment of both excavated glass and historic and decorative glass the book provides the knowledge required by conservators and restorers and is invaluable for anyone with glass objects in their care
