Emergent Theories of Aging James E. Birren, 1988

Handbook of the Psychology of Aging James E.

Birren, 2013-10-22 *Handbook of the Psychology of Aging* Third Edition describes the psychology of adult development and aging. This book is organized into four parts encompassing 28 chapters that cover the basic behavioral changes and capacities occurring with advancing age. The first part deals with the history, concept, and models of the psychology of aging. This part also examines the distinctions between physical, biological, psychological, and social time or age. The second part explores the influences of racial, ethnic, and cultural factors on biological, health, social, and psychological aging processes. This part also surveys gender differences in aging. The third part describes numerous behavioral processes, changes, and patterns in advancing age. This part specifically considers the motivation, cognitive, and motor performance, attentional processes, learning, memory, personality, and wisdom in aging. The fourth part focuses on the applications of the concepts and principles of aging to the individual and society. This book will be of great value to psychologists, researchers, and graduate students.

Handbook of Aging and Mental Health Jacob Lomranz, 1998-09-30. This comprehensive resource responds to a growing need for theory and multidisciplinary integrative research in adult and gerontological health. *Handbook of Aging and Mental Health* brings together for the first time diverse strategies and methodologies as well as theoretical formulations involving psychodynamic, behavioral, psychosocial, and biological systems as they relate to aging and health. Forward thinking in his approach, Lomranz provides the mental health, adult developmental, and geriatric professions with a single reference source that covers theory, construction, empirical research, treatment, and multidisciplinary program development. *Critical Perspectives on Aging* Meredith Minkler, Carroll Estes, 2020-11-25. This unique volume brings together 20 critical essays on aging within the context of the broad social, political, and economic factors that help shape and determine the realities of growing old. Rather than viewing aging in isolation, it explores the social creation of old age dependency and the profound influence of race, gender, and social class on what it means to grow old. It looks too at such topics as the biomedicalization of aging, the role of business and the media in changing societal images of the old, the fact and fiction behind senior power, the multibillion dollar nursing home industry, and the role of advanced capitalist nations in creating economic dependency among elders in the Third World. *Virtuous Cycles in Humanistic Management* Ricardo Aguado, Almudena Eizaguirre, 2019-11-16.

This volume is divided into three major parts, each of which symbolizes a new virtuous circle that is added to the previous one in order to foster the dissemination of humanistic management (HM) among corporations and social institutions. After an introductory chapter explaining the concept of humanistic management and the plan behind this research project, the first part of the book is devoted to education. The authors address pedagogical strategies that can be used in higher education to introduce students to HM. In turn, the second part of the book focuses on the implementation of HM in corporations, while the third presents an approach for measuring and monetizing the social value generated by corporations through their economic

activities In the closing chapter the editors illustrate how the three parts of the book can be combined to generate virtuous cycles in corporations *Aging and Biography* Gary M. Kenyon,James E. Birren,Jan-Erik Ruth,Johannes J.F.
