Emotion And Social Change Toward A New Psychohistory:

Emotion and Social Change Carol Zisowitz Stearns, Peter N. Stearns, 1988 **The Kiss in History** Karen Harvey, 2005-07-15 Writers have previously placed the action of kissing into categories kisses of love affection peace respect and friendship Each of the essays in this fascinating book takes a single kind of kiss and uses it as an index to the past For rather than offering a simple history of the kiss this book is about the kiss in history In this collection an eminent group of cultural historians explore the kiss through sources as diverse as religious texts popular prints court depositions periodicals diaries and poetry This collection shows that by analyzing the kiss and its position embedded as it is as part of our culture history can use small gestures to take us to big issues concerning ourselves and others the past and the present ***The Emotional Self*** Deborah Lupton, 1998-04-15 This addition to a growing number of texts which approach emotions and emotionality from a social constructionist perspective is well written scholarly accessible and interesting There is both breadth and depth to this work **Feminism and Psychology** This broad ranging and accessible book brings together social and cultural theory with original empirical research into the nature of the emotional self in contemporary western societies The emphasis of the analysis is on the emotional self as a dynamic project that is continually shaped and reshaped via discourse embodied sensations memory personal biography and interactions with others and objects Using an interdisciplinary approach Deborah Lupton draws on a number of sociocultural approaches that adopt a post structuralist perspective She strongly emphasizes language and discourse as they construct and express concepts of the self and the emotions whilst also acknowledging the sensual embodied and unconscious dimensions of emotional experience **Decolonizing Emotions in French Algeria** Christiane-Marie Abu Sarah, 2024-08-22 Alongside the diplomatic struggles of the early Cold War European politicians worked to shape emotions about the postwar order advocating fear of communism and hope for postwar recovery In this context the French Empire in North Africa emerged as one important emotional battleground where Algerian nationalists and anti colonial campaigners challenged French narratives about imperial pride and native hysteria During the Algerian War 1954 1962 emotions thus became a pivotal part of the independence struggle Accordingly **Decolonizing Emotions** tracks affective politics during the revolution focusing on members of the Front de lib ration nationale FLN Combattants de la lib ration CDL and Jeune R sistance Delving into the manifestos poetry and personal diaries of anti colonial activists the book reveals a rich world of transgressive sentiments emotional exile and affective border crossings The stories that surface show how Algerians used biopower to combat an affective regime that refused native populations the right to be angry The book further chronicles how Europeans complicated ideas of humanitarian pity and confronted the French production of political apathy It is a history that holds modern relevance speaking to contemporary debates over race relations and national pride the pathologizing of Muslim emotions and the contested process of how myths die demythologization **Emotions in American History** Jessica C. E. Gienow-Hecht, 2010 The study of emotions has

attracted anew the interest of scholars in various disciplines igniting a lively public debate on the constructive and destructive power of emotions in society as well as within each of us Most of the contributors to this volume do not hail from the United States but look at the nation from abroad They explore the role of emotions in history and ask how that exploration changes what we know about national and international history and in turn how that affects the methodological study of history In particular they focus on emotions in American history between the 18th century and the present in war in social and political discourse as well as in art and the media In addition to case studies the volume includes a review of their fields by senior scholars who offer new insights regarding future research projects The Hidden Genius of Emotion Carol Magai, Jeannette Haviland-Jones, 2002-09-26 This thoughtful and beautifully written book demonstrates compellingly that emotions are central to personality development across the lifespan Carol Magai and Jeannette Haviland Jones draw on a wealth of textual and film material to forge an original empirical and theoretical analysis of the dynamics of emotion in human development For its content the work examines the lives of three mid century psychologists Carl Rogers Albert Ellis and Fritz Perls Each man adopted a unique stance on the question of emotion in personality and in therapeutic interventions and tellingly the therapeutic methods they developed necessarily reflected their own emotional dynamics Drawing on the most important research in clinical social and personality psychology the authors reveal the pervasive influence of emotional organization in the lives of these individuals Having presented a new approach to personology autobiography autobiography narrative studies psychotherapy and the theory of emotions on its publication in 2002 this book is essential reading

A Is for Arson Campbell F. Scribner, 2023-07-15 In A Is for Arson Campbell F. Scribner sifts through two centuries of debris to uncover the conditions that have prompted school vandalism and to explain why attempts at prevention have inevitably failed Vandalism costs

taxpayers hundreds of millions of dollars every year as students parents and even teachers wreak havoc on school buildings Why do they do it Can anything stop them Who should pay for the damage Underlying these questions are long standing tensions between freedom and authority and between wantonness and reason Property destruction is not simply a moral failing to be addressed with harsher punishments nor can the problem be solved through more restrictive architecture or policing Scribner argues that education itself is a source of intractable struggle and that vandalism is often the result of an unruly humanity To understand schooling in the United States one must first confront the all too human emotions that have led to fires broken windows and graffiti A Is for Arson captures those emotions through new historical evidence and diverse theoretical perspectives helping readers understand vandalism variously as a form of political conflict as self education and as sheer chaos By analyzing physical artifacts as well as archival sources Scribner offers new perspectives on children s misbehavior and adults reactions and allows readers to see the complexities of education the built environment of teaching and learning evolving approaches to youth psychology and student discipline through the eyes of its often resistant subjects

Love in Africa Jennifer Cole, Lynn M. Thomas, 2009-08-01 In recent years scholarly interest in love has flourished Historians have addressed the rise of romantic love and marriage in Europe and the United States while anthropologists have explored the ways globalization has reshaped local ideas about those same topics Yet love in Africa has been peculiarly ignored resulting in a serious lack of understanding about this vital element of social life a glaring omission given the intense focus on sexuality in Africa in the wake of HIV AIDS *Love in Africa* seeks both to understand this failure to consider love and to begin to correct it In a substantive introduction and eight essays that examine a variety of countries and range in time from the 1930s to the present the contributors collectively argue for the importance of paying attention to the many different cultural and historical strands that constitute love in Africa Covering such diverse topics as the reception of Bollywood movies in 1950s Zanzibar the effects of a Mexican telenovela on young people s ideas about courtship in Niger the models of romance promoted by South African and Kenyan magazines and the complex relationship between love and money in Madagascar and South Africa *Love in Africa* is a vivid and compelling look at love s role in African society **Learning to be an Individual** Hyang-Jin Jung, 2007 *Learning to Be an Individual* delves into how the ideology of individualism shapes American personhood by examining socialization during early adolescence As an anthropological study it painstakingly analyzes the workings of American cultural conceptions of self person and emotion in the minute details of everyday school life In so doing it draws attention to a crucial yet often overlooked aspect of schooling affective education It also points out how emotion is deeply involved in morality politics in American education and society This is a book that needs to be read by anyone interested in the role of individualism in public education Encyclopedia of Social History Peter N. An Emotional History of the United States Peter N. Stearns, Jan Lewis, 1998

Emotions lie at our very core as human beings How we process and grapple with our emotions how and what we emote and how we respond to the emotions of others constitute the essence of our social universe In a very real sense we exist only through the prism of our emotions And yet the profound effect of human emotion on history politics religion and culture remains underexamined While the influence of emotion in such realms as American foreign policy has been well documented other emotional aspects of American history have escaped notice What role for instance does emotion have in the practice of African American religion How do shame and self hatred influence American conceptions of identity How does our emotional life change as we age To what degree is American consumerism driven by basic human emotion With this landmark anthology historians Peter N Stearns and Jan Lewis provide a road map of the American emotional landscape From the emotional world of working class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage these essays provide a multicultural snapshot of the unique nature and evolution of American emotions
