Born to Choose John H Falk, 2017-09-05 Born to Choose is John H Falk s compelling account of why and how we make the endless set of choices we do every second of every day of our lives Synthesizing research from across the biological and social sciences Falk argues that human choice making is an evolutionarily ancient and complex process He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well being This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall

Good Reasons for Bad Feelings Randolph M. Nesse, MD, 2019-02-12 A founder of the field of evolutionary medicine uses his decades of experience as a psychiatrist to provide a much needed new

framework for making sense of mental illness Why do I feel bad There is real power in understanding our bad feelings With his classic Why We Get Sick Dr Randolph Nesse helped to establish the field of evolutionary medicine Now he returns with a book that transforms our understanding of mental disorders by exploring a fundamentally new question Instead of asking why certain people suffer from mental illness Nesse asks why natural selection has left us all with fragile minds Drawing on revealing stories from his own clinical practice and insights from evolutionary biology Nesse shows how negative emotions are useful in certain situations yet can become overwhelming Anxiety protects us from harm in the face of danger but false alarms are inevitable Low moods prevent us from wasting effort in pursuit of unreachable goals but they often escalate into pathological depression Other mental disorders such as addiction and anorexia result from the mismatch between modern environment and our ancient human past And there are good evolutionary reasons for sexual disorders and for why genes for schizophrenia persist Taken together these and many more insights help to explain the pervasiveness of human suffering and show us new paths for relieving it by understanding individuals as individuals

Nonverbal Communication in Close Relationships Robert J. Sternberg,Aleksandra Kostić,2022-03-15 This book is an up to date compendium of knowledge on the secret language of close relationships namely nonverbal routes of communication In close relationships as everyone learns sooner or later the usefulness of words can be somewhat limited because people a mean different things by the same words b mean the same thing by different words c sometimes find it hard to express their feelings in words and d lie Nonverbal signals therefore often provide the best means of communication The book points out how decoding interpreting nonverbal signals is a major key to success because often what people say wholly belies how they feel nonverbal signals reveal their true feelings rather than what they want other people to think their feelings are This book helps decode those secret signals The book is written by the leading worldwide experts in the field of nonverbal communication to ensure accuracy comprehensiveness and timeliness

Brain, Decision Making and Mental Health Nima Rezaei,2023-01-01 Brain Decision Making and Mental Health acknowledges that thinking is not a constant phenomenon but varies considerably across cultures Critical thinking is particularly important in bridging thinking divisions and its applicability across sciences particularly medical sciences We see critical thinking as educable and the arts as means to achieve this purpose We address the multidimensional relationship between thinking and health and related mechanisms Thinking mainly affects emotion regulation and executive function in other words both mental and physical health are related as a function of thoughts Considering the thinking feeling emotion regulation executive function pathway it would be reasonable to propose thinking capacities based interventions to impact emotion regulation and executive function such as mindfulness and psychotherapy We review decision making taking place in integrated and social contexts and discuss the decision making styles decision outcomes relation Finally artificial thinking and intelligence prepare us for decision making outside the human mind

The Mystery of Emotions R D Hinshelwood,2023-03-16 Psychoanalysis is above all the science of the emotions but as yet there

is no single accepted theory of affects. Instead, there are many, all of them too limited based as they are on idiosyncratic introspection. R. D. Hinshelwood presents an extensive scoping of the prominent theories from the philosophy of mind and academic psychology alongside a review of psychoanalytic ideas based on instinct theory or object relations. This wide review of divergent theories from various disciplines helps to mitigate variation and identify commonalities. From this scoping exercise, Hinshelwood creates a form of qualitative meta-analysis which enables the most common dimensions to come to the fore, namely 113 features of affects form a more general theory with four dimensions. This more systematic view offers an affective space as a model for thinking about the nature of affects, their origins, and their consequences. At the same time, Hinshelwood retains the personal. He starts with the memory which initiated his quest to understand how much we are rooted in the experience of our feelings and includes a chapter documenting his own idiosyncrasies to bring his own bias to the fore. In this way, the book preserves the especially personal and intimate quality of its universal topic. **Balanced**

Wonder Jan B. W. Pedersen, 2019-10-15 In *Balanced Wonder: Experiential Sources of Imagination, Virtue, and Human Flourishing* Jan B. W. Pedersen digs deep into the alluring topic of wonder and argues in a scholarly yet accessible way that the experience of wonder when balanced serves as a strong contributor to human flourishing. Along the way, Pedersen describes seven properties of wonder and shows how wonder is distinct from other altered states including awe, horror, the sublime, curiosity, amazement, admiration, and astonishment. Examining the contribution of both emotion and imagination in the experience of wonder, filtered through the Neo-Aristotelian work of philosophers Douglas Rasmussen, Alasdair MacIntyre, and Martha Nussbaum, Pedersen also makes it clear that wonder may contribute to human flourishing in various ways, such as the widening of perception, extension of moral scope, or sensitivity, a wondrous afterglow, openness, humility, an imaginative attitude, reverence, and gratitude. Importantly, for wonder to act as a strong contributor to human flourishing, one needs to wonder at the right thing, in the right amount, at the right time, in the right way, and for the right purpose. Emotional intelligence: Does it really matter? Phillip Walden Bowen, 2019-09-05 What really is emotional intelligence? This book, aimed primarily at the university, academic, and those working and/or studying in higher education, seeks to help readers understand the term and the role emotional intelligence plays in education and business. It clearly identifies and critiques the three main models: the ability model (Salovey and Mayer), the mixed model (Goleman, Bar-On), and the trait model (Petrides and Furnham). It discusses eustress, distress, and chronic stress, reflecting on the effects negative types of stress can have on the human body, demonstrating how the modern workplace can lead to burnout. It emphasizes the importance of a healthy work-life balance while acknowledging the demands and pressures placed on organisations to compete within the global marketplace. It also explores how one may understand and process emotions, considering terms such as learned optimism and learned helplessness. Room for discussion is also given to the influence of bullying and harassment in the workplace and types of therapy that are presently available. It discusses strategies for coping with challenging experiences, providing anecdotes and

case studies from university academics It also considers how personality relates to emotional intelligence and how people cope with challenging experiences The book delves into the term intelligence showing how theories surrounding the concept have developed over the twentieth century and it elucidates the link between emotional intelligence and wellbeing The author discusses the effect stress can have on human telomeres thus shortening lifespan and sheds light on the darker sides of human nature such as the so called dark triad personality traits psychopathy narcissism and Machiavellian behaviour Overall the book is dedicated to the vital question Emotional intelligence does it really matter **Emotional Equations** Chip Conley,2012-01-10 An invaluable operating manual says Tony Hsieh Zappos CEO and author of Delivering Happiness Using brilliantly simple logic that illuminates the universal truths in common emotional challenges popular motivational speaker and bestselling author Chip Conley has written a fresh original guide to an authentic and fulfilling life With a foreword by Tony Hsieh CEO of Zappos and author of Delivering Happiness When Chip Conley dynamic author of the bestselling Peak suffered a series of devastating personal and professional setbacks he began using what he came to call Emotional Equations such as Joy Love Fear to help him focus on the variables in life that he could handle rather than dwelling on the parts he couldn't such as the bad economy death and taxes Using brilliantly simple logic that illuminates the universal truths in common emotional challenges Emotional Equations offers a way to identify the elements in our lives that we can change those we can't and how to better understand our emotions so they can help us rather than hurt us Equations like Despair Suffering Meaning and Happiness Wanting What You Have Having What You Want have been reviewed for mathematical and psychological accuracy by experts Now Conley tells his own comeback story and those of other resilient people and inspiring role models who have worked through emotional equations in their own lives Emotional Equations arms you with practical strategies for turbulent times Human Nature: Fact and Fiction Robin Headlam Wells,Johnjoe McFadden,2006-05-30 *Handbook of Research on Synthesizing Human Emotion in Intelligent Systems and Robotics* Vallverdú, Jordi,2014-11-30 Emotions convey significant information through means of natural language analysis embodiment and emotional signing Machines equipped with the ability to experience and interpret emotions perform better in complex environments and share in the emotionally rich social context The Handbook of Research on Synthesizing Human Emotion in Intelligent Systems and Robotics presents a solid framework for taking human robot interaction closer to its full potential Presenting a close look at all the factors involved in modeling emotions and applying a thorough understanding of human emotional recognition to technology this volume appeals to active researchers in the fields of artificial emotions artificial intelligence computing robotics philosophy and psychology as well as to students interested in the research of synthetic emotions
