elaborate the role of emotion as an aid to rationality Therefore I will introduce a concept of the emotion as an aid to bounded rationality I will then go on pointing out the rational and irrational elements of the emotion jealousy in order to conclude with an argument that is defending a more differentiated and relative view on the rationality of emotions At first sight jealousy seems to be a very unreasonable feeling Especially the actions in consequence of jealousy are in several situations hard to comprehend for an external observer This raises the question if the emotion jealousy which leads people to unreasonable activities can be called unreasonable itself as well How about the relationship between rationality and the emotion jealousy without considering the following actions Many philosophers called emotions in general irrational some claimed the relationship between reason and emotion to be interdependent Is the emotion influencing the reason or is the reason affecting emotions Or are emotions rather an aid to rationality Is a feeling like jealousy due to its dependency on temper a proof for the irrationality of emotions For Descartes reason and emotion are two distinct entities while for Hume an emotion is neither called rational nor irrational Aristotle by contrast calls for the rationality of emotions

Emotion, Imagination, and the Limits of Reason Talia Morag, 2016 C Unconscious emotions and neurotic in particular emotional symptoms Reason and Emotion John M. Cooper, 2021-01-12 This book brings together twenty three distinctive and influential essays on ancient moral philosophy including several published here for the first time by the distinguished philosopher and classical scholar John Cooper The volume gives a systematic account of many of the most important issues and texts in ancient moral psychology and ethical theory providing a unified and illuminating way of reflecting on the fields as they developed from Socrates and Plato through Aristotle to Epicurus and the Stoic philosophers Chrysippus and Posidonius and beyond For the ancient philosophers Cooper shows here morality was good character and what that entailed good judgment sensitivity openness reflectiveness and a secure and correct sense of who one was and how one stood in relation to others and the surrounding world Ethical theory was about the best way to be rather than any principles for what to do in particular circumstances or in relation to recurrent temptations Moral psychology was the study of the psychological conditions required for good character the sorts of desires the attitudes to self and others the states of mind and feeling the kinds of knowledge and insight Together these papers illustrate brilliantly how by studying the arguments of the Greek philosophers in their diverse theories about the best human life and its psychological underpinnings we can expand our own moral understanding and imagination and enrich our own moral thought The collection will be crucial reading for anyone interested in classical philosophy and what it can contribute to reflection on contemporary questions about ethics and human life
