Emu Portfolio Adjustment Cepr Policy:

EMU and Portfolio Adjustment Kpate Adjaouté, 2000 The advent of the euro is a significant event for portfolio managers both within and outside the monetary union The euro will affect portfolio decisions through a variety of channels and the emergence of a single currency marks the disappearance of explicit and psychological barriers to international investing The set of investment opportunities qualifying as domestic is expanding while the need for diversification across currencies must now be met by an increased demand for assets which are not denominated in euros This paper examines the principal factors influencing the portfolio reallocation process following the introduction of the euro Three broad categories of possible portfolio allocation are considered domestic versus non domestic investment debt versus equity investment and public debt versus private debt investment
