Emerging Monoculture Assimilation And The Model Minority:

The Emerging Monoculture Eric Kramer,2003-02-28 Kramer brings together experts from a variety of minority backgrounds and from around the world to give their perspectives on the most pervasive ideology today globalism The basic premise is that a developed country is different from a developed community They need not be mutually exclusive but neither is it assumed that they are necessarily consonant The various essays offer answers to such vital questions as What does it mean to become a global citizen and What does it mean to be a model minority in a global economy The process of becoming a mainstream person involves being first marginalized with the implication that something is inadequate about one's self The process of assimilationism is manifested as various forms of enforced and or rewarded acculturation With the vast human migration currently underway the notion of assimilation has become a global phenomenon What is occurring Kramer and his colleagues demonstrate is a worldwide shift from the village milieu to the city lifestyle This migration is seen as a polycentric and global phenomenon whereby the promised land is nowhere in particular but instead a way of life and mindset an urban lifestyle This process is far more than a simple change in geography Moving from the village to the cityscape involves a mutation in worldview and self identity Additional questions asked throughout the collection are What set of persuasive assumptions are leading the world in this direction and What might be lost in the process A provocative collection for scholars students and other researchers involved with development studies multiculturalism and urbanization

Universities and Globalization Ravinder Kaur Sidhu,2006-08-15 Universities and Globalization To Market To Market examines the operations of power and knowledge in international education under conditions of globalization with a focus on the three biggest exporters of higher education the United States Australia and the United Kingdom An interdisciplinary approach based on the core social sciences is used to explore the power relations that shape global education networks The role of nation states in creating the conditions for education markets and the desire for a Westernized template of international education in the postcolonial world is discussed The volume offers a sophisticated attempt to recast international education as a series of geopolitical and geoeconomic engagements that transcend simple supply and demand dynamics Engaging with the theoretical debates about education and globalization this book examines global cultural flows and boundary crossings the cultural economy of education networks and the possibilities for supra

territorial subjectivities International education markets are examined from the perspectives of both first world producers and postcolonial consumers By investigating how first world universities imagine and enact the global in their marketing practices the expressions of cultural diversity valued by education markets and the types of individual and institutional subjectivities merging from markets Universities and Globalization To Market To Market offers students faculty administrators marketing consultants and others who work in the area a highly nuanced account of the global relations fostered by education markets This original critical examination of the forms and cultural politics of international education is a significant contribution to the field

Critical Perspectives on Black Education Noelle Witherspoon-Arnold, Melanie C. Brooks, Bruce Makoto Arnold, 2014-06-01 While nation engages in debates concerning central issues of religion and religious diversity in education the historic saliency of religion and spirituality in the Black community and in the education of its children continues to be largely ignored Historically religion and spirituality were foundational to the development and understanding of social justice issues including but not limited to issues of protest community uplift notions of care and anti oppression Taking into account the historical significance of religion and spirituality in the Black community it is essential for education scholars to cultivate these long standing connections as a means for advancing contemporary struggles for social justice religiosity in education and counter hegemonic praxis The purpose of this book is to expand our understanding of spirituality and religion as related to the schooling of Black students Educational scholarship continues to explore the workings of social justice to ameliorate inequities for those who have not been well served in schools Although the concept of social justice remains a somewhat inchoate term in educational literature this book seeks to explore the historicity of religion and spirituality while offering a scaffold that links ordinary everyday acts of justice religion and spirituality in education to a culture that systematically and institutionally assaults the worth of Black students It is important to note that this book is grounded in a broad concept of religion and spirituality and the editors seek to be inclusive of all types styles and traditions of religiosity and spirituality

The Symbolism of Globalization, Development, and Aging Steven L. Arxer, John W. Murphy, 2012-09-14 This book looks at the symbolic side of globalization development and aging Many of the dimensions that are discussed represent updates of past debates but some are entirely new In particular globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined The process of aging and persons sense of identity is no exception The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized The application of marketplace imagery for example may impact attempts for holism in how aging is studied and the prospects for human agency during the aging process This book offers a special look into how temporality technology normativity and empiricism structure the symbolic side of globalization and influence dominant images of the aging process Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience

Coarseness in U.S. Public Communication Philip Dalton, Eric Mark Kramer, 2012-08-31 Public expression in the United States has become increasingly coarse Whether it s stupid rude base or anti intellectual talk it surrounds us Popular television film music art and even some elements of religion have become as coarse we argue as our often disparaged political dialogue This book s contention is that the U S semantic environment is governed by tactics not tact We craft messages that work that perform their desired function We are instrumental strategic communicators As such entertainment and journalism that draw an audience for instance are good This follows the logic that the marketplace an aggregate of hedonically motivated individuals decides what s good Market logic when unencumbered by what some characterize as quaint human sentimentalities liberates us to cynically communicate whatever and however we want Whatever improves ratings web traffic ticket sales concession sales repeat purchases and earnings is good Embracing this communicative paradigm more fully necessitates the culture s abandonment of collective notions of both taste and veracity thus weakening the forces that keep individual desires in check Our present communication environment is one that invites the hypertrophic expression of the ego enabling elites to erode public communication standards and repeal laws and regulations resulting in immeasurable individual fortunes Meanwhile perpetual plutocratic rule is made even more certain by the cacophonous public noise the rest of us are busy making leaving us incapable disinterested and unwilling to listen to one another

Neoliberalism and National Culture Cory Blad,2011-09-20 Neoliberal globalization is understood to have a corrosive effect on the state Reductions in economic regulatory capacities combined with an ideological attack on the public necessity of social spending has left many with the impression that the state is a weakened institution at best This book argues that despite popular claims to the contrary global capitalism requires state institutional authority but the legitimation of this authority is increasingly tied to cultural rather than economic means Canada and Qu bec are presented in historical comparative context as examples of how neoliberal states achieve global

political economic integration while relying on cultural legitimation to maintain social policies working to mitigate social changes resulting from increased global integration
