The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices
