transform and professionalize the practice of journalism in their own terms By analyzing the contentious narratives of gender and class these women crafted as well as their conflicting efforts to maintain their stature in the printing and public worlds it reveals the ongoing negotiations involved within their disputes over inclusion and democracy in a country still finding its way to equality peace and stability between the 1940s and 1960s This book challenges oversimplified portrayals of struggles for power that either glorify or vilify these historical processes by erasing the complexity of the political and social actors involved in them It stresses the importance of women but not to the expense of a balanced critique of their historical reality actions and endeavors This is a history of paradoxical political manifestations and a redefinition of power struggles as multidirectional intersectional non monolithic historical processes from the viewpoint of women **Reports of the**

From language shift to language revitalization and sustainability Albert Bastardas-Boada,2019-11-25 This book aims to contribute to the overall integrated

understanding of the processes of language contact and their evolution be they the result of political or economic dis integrations or migrations or for technological reasons Via an interdisciplinary holistic approach it also aims to support the theoretical grounding of a unified common sociolinguistic paradigm based on an ecological and complexity perspective This approach built on the fact that linguistic structures do not live in isolation from their social functions and must be situated in relation to the sub and supra systems that determine their existence if we are to understand their fortunes It is a useful contribution to understanding and promoting the processes of linguistic revitalization in the world combining at the same time the maintenance and development of diversity while ensuring the intercommunication of human species
