*Strategies for Therapy with the Elderly* Claire Brody, Vicki Semel, 2005-09-27 Newly revised and updated In this second edition Brody and Semel contend that meaningful and successful therapy can be accomplished with an aging population debunking the belief that the elderly can not pick up or put into practice newly acquired information Rather the way in which therapy with aging adults is approached may affect the way in which the therapist initially experiences and reacts to the client because of stereotypes about aging This book encompasses three major areas of work with elderly clients aged 60 years and older Living in nursing homes Living in assisted living housing while participating in community oriented activities for the aged Living independently and being seen in private practice It comprises a variety of approaches ranging from eclectic small group formats for nursing home residents group and individual counseling in assisted living settings and home care for the elderly to psychoanalytic therapy techniques in private practice Illustrative case examples used throughout the book bring to life successful strategies and interventions New areas of focus include Treatment of stress and mental disorders Alzheimer s disease Caregiving issues at home Expanded information on Medicare coverage issues

*Opening Up* James W. Pennebaker, 2012-03-19 Anyone who has ever entrusted a troubling secret to a journal or mourned a broken heart with a friend knows the feeling of relief that expressing painful emotions can bring This book presents astonishing evidence that personal self disclosure is not only good for our emotional health but boosts our physical health as well Psychologist James W Pennebaker has conducted controlled clinical research that sheds new light on the powerful mind body connection This book interweaves his findings with insightful case studies on secret keeping confession and the hidden price of silence Filled with information and encouragement Opening Up explains Why suppressing inner problems takes a devastating toll on health How long buried trauma affects the immune system How writing about your problems can improve your health Why it s never too late to heal old emotional wounds When self disclosure may be risky and how to know whom to trust

**Focus on Psychotherapy Research** M. E. Abelian, 2005 Psychotherapy is the treatment of mental and emotional disorders using psychological methods Psychotherapy thus does not include physiological interventions such as drug therapy or electroconvulsive therapy although it may be used in combination with such methods Behaviour therapy aims to help the patient eliminate undesirable habits or irrational fears through

conditioning Techniques include systematic desensitisation particularly for the treatment of clients with irrational anxieties or fears and aversive conditioning which uses negative stimuli to end bad habits Humanistic therapy tends to be more optimistic basing its treatment on the theory that individuals have a natural inclination to strive toward self fulfilment Therapists such as Carl Rogers and Abraham Maslow used a highly interactive client therapist relationship compelling clients to realise exactly what they are saying or how they are behaving in order to foster a sense of self awareness Cognitive therapies try to show the client that certain usually negative thoughts are irrational with the goal of restructuring such thoughts into positive constructive ideas Such methods include rational emotive therapy where the therapist argues with the client about his negative ideas and cognitive restructuring therapy in which the therapist works with the client to set attainable goals Other forms of therapy stress helping patients to examine their own ideas about themselves

Principles of Multicultural Counseling and Therapy Uwe P. Gielen, Juris G. Draguns, Jefferson M. Fish, 2008-06-19

In an era of globalization characterized by widespread migration and cultural contacts, psychologists, counselors, and other mental health professionals face a unique challenge: how does one practice successfully when working with clients from so many different backgrounds? Gielen, Draguns, and Fish argue that an understanding of the general principles of multicultural counseling is of great importance to all practitioners. The lack of this knowledge can have several negative consequences during therapy, including differences in expectations between counselor and client, misdiagnosis of the client's concerns, missed non-verbal cues, and the client feeling that she has been misunderstood. This volume focuses on the general nature of cultural influences in counseling rather than on counseling specific ethnic groups. Counseling practices from all over the world, not just those of Western society, are explored. Bringing together the work of a diverse group of international experts, the editors have compiled a volume that is not only concise and teachable but also an essential guidebook for all mental health professionals.
