Wu,2019-06-20 This study questions the validity of the American Psychiatric Association s definition of autism and offers evidence that even non verbal children have an emotional life Drawing on data from a series of intimate interviews with the parents of children with autism from three different cultures namely the UK India and Taiwan the reader is shown how children with autism have emotional competence and do experience both negative and positive emotions Parents of children with autism have to make many sacrifices and worry about their child s ability to become independent Good parent teacher relationships are essential and doctors and their teams need to be sensitive and help families find the resources that they need In some cases religion plays an important role as does the acceptance by society in general The book will be of particular interest to families teachers and professionals dealing with autism **Emotional Intelligence in Everyday Life**

Joseph Ciarrochi,Joseph P. Forgas,John D. Mayer,2013-10-14 Since the release of the very successful first edition in 2001 the

field of emotional intelligence has grown in sophistication and importance. Many new and talented researchers have come into the field and techniques in EI measurement have dramatically increased so that we now know much more about the distinctiveness and utility of the different EI measures. There has also been a dramatic upswing in research that looks at how to teach EI in schools, organizations, and families. In this second edition, leaders in the field present the most up-to-date research on the assessment and use of the emotional intelligence construct. Importantly, this edition expands on the previous by providing greater coverage of emotional intelligence interventions. As with the first edition, this second edition is both scientifically rigorous yet highly readable and accessible to a non-specialist audience. It will therefore be of value to researchers and practitioners in many disciplines beyond social psychology, including areas of basic research, cognition, and emotion, organizational selection, organizational training, education, clinical psychology, and developmental psychology.

This publication brings together leading emotion researchers whose work has pioneered new questions, methods, and levels of analyses for investigating development and individual differences in how infants and children attend to, categorize, understand, talk about, and regulate emotions. Topics include infant attention and processing of emotions, developmental affective psychophysiology, emotions in maltreated children, attention biases and anxiety, emotional competence and social interactions, cultural differences in emotion socialization, gender and parent-child reminiscing about emotional events, family emotion conversations, and socio-cognitive development and causal reasoning about emotions. These contributions lay a foundation for new scientific discoveries in developmental affective science and they inform evidence-based practices and interventions aimed at promoting children's emotional wellbeing.
