Emotions Social Cultural And Biological Dimensions:

The Emotions Rom Harre, W Gerrod Parrott, 1996-06-27 There is much that is fascinating here Long established experiments and conclusions are rubbished and reinterpreted long established assumptions and beliefs about emotions are soundly trounced and generally a good going over is delivered to the whole field it is such a blockbuster that one can only reel backwards and tell anyone studying the subject that they would be crazy not to get it Self the variation and diversity in emotion which provides scope for exploring how patterns of emotion contrast in different societies across gender lines at different historical times and between children and adults and the way in which the body is shaped and its functions influenced by culturally maintained patterns of emotion displays *The emotions* Rom (ed.) Harre, 2000 [Emotions in Social Psychology](#) W. Gerrod Parrott, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company *The Institutional Dynamics of Culture, Volumes I and II* Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences *Emotions in Cultural Context* Girishwar Misra, Indiar Misra, 2024-05-16 This book approaches emotion from a cultural perspective in applied contexts consolidating new research that examines the interface of emotions with various aspects of human life It provides insights into the vibrant and growing field of emotion research by rearticulating the distinction and interrelationships of the trilogy of mind consisting of cognition affection and conation It brings into focus indigenous and culturally relevant conceptualizations of emotion processes Among the topics covered Emotions at work applications of emotional intelligence Indian perspectives on youth compassion and moral well being Parental emotion regulation strategies Role of emotions in construction of social identities Emotions in Cultural Context offers an up to date exploration of recent work in psychology of emotions [The Emotions](#) Peter Goldie, 2002-08 Peter Goldie opens the path to a deeper understanding of our emotional lives through a lucid philosophical exploration of this surprisingly neglected topic He illuminates the phenomena of emotion by drawing not only on philosophy but also on literature and science He considers the roles of culture and evolution in the development of our emotional capabilities He examines the links between emotion mood and character and places the emotions in the context of such related phenomena as consciousness thought feeling and imagination He explains how it is that we are able to make sense of our own and other people s emotions and how we can explain the very human things which emotions lead us to do A key

theme of *The Emotions* is the idea of a personal perspective or point of view contrasted with the impersonal stance of the empirical sciences Goldie argues that it is only from the personal point of view that thoughts reasons feelings and actions come into view He suggests that there is a tendency for philosophers to over intellectualize the emotions and investigates how far it is possible to explain emotions in terms of rationality Over intellectualizing can also involve neglecting the centrality of feelings and Goldie shows how to put them where they belong as part of the intentionality of emotional experience directed towards the world from a point of view Goldie argues that the various elements of emotional experience including thought feeling bodily change and expression are tied together in a narrative structure To make sense of one s emotional life one has to see it as part of a larger unfolding narrative The narrative is not simply an interpretative framework of a life it is what that life is Goldie concludes by applying these ideas in a close study of one particular emotion jealousy This fascinating book gives an accessible but penetrating exploration of a subject that is important but mysterious to all of us Any reader interested in emotion and its role in our understanding of our lives will find much to think about here

Transforming Emotion Glenda Fredman,2004-02-13 Starting from the position that there is no universal story of emotion necessarily acceptable to all cultures and that we cannot assume a common language of emotion that accurately transfers meanings and experiences between people this volume approaches emotion as the story people weave of physical sensation display and judgements through multi layered contexts of their relationships and cultures Emotion stories are seen as intricately woven with stories of identity therefore having implications for how people perceive their moral worth Within a framework informed by communication theories social constructionism and systemic and narrative therapies Glenda Fredman offers a repertoire of possibilities to talk about feelings share understanding and transform emotion Using her personal stories transcripts of conversations and case vignettes to speak the theory she shows how paying careful attention to each person s emotional language rules and theories can avoid coercion undermining isolating or creating an impasse between the people involved

Affective Communities in World Politics Emma Hutchison,2016-03-11 Emotions underpin how political communities are formed and function Nowhere is this more pronounced than in times of trauma The emotions associated with suffering caused by war terrorism natural disasters famine and poverty can play a pivotal role in shaping communities and orientating their politics This book investigates how affective communities emerge after trauma Drawing on several case studies and an unusually broad set of interdisciplinary sources it examines the role played by representations from media images to historical narratives and political speeches Representations of traumatic events are crucial because they generate socially embedded emotional meanings which in turn enable direct victims and distant witnesses to share the injury as well as the associated loss in a manner that affirms a particular notion of collective identity While ensuing political orders often re establish old patterns traumatic events can also generate new emotional cultures that genuinely transform national and transnational communities

Moving Beyond Individualism in Pastoral Care and Counseling Barbara J. McClure,2010-01-01 Despite astute critiques and available resources for alternative modes of thinking and practicing individualism continues to be a dominating and constraining ideology in the field of pastoral psychotherapy and counseling Philip Rieff was one of the first to highlight the negative implications of individualism in psychotherapeutic theories and practices As heirs and often enthusiasts of the Freudian tradition of which Rieff and others are critical pastoral theologians have felt the sting of his charge and yet the empirical research that McClure presents shows

that pastoral counseling practitioners resist change Their attempts to overcome an individualistic perspective have been limited and ineffective because individualism is embedded in the field s dominant theological and theoretical resources practices and organizational arrangements Only a radical reappraisal of these will make possible pastoral counseling practices in a post individualistic mode McClure proposes several critical transformations broadening and deepening the operative theologies used to guide the healing practice expanding the role of the pastoral counselor reimagining the operative anthropology reclaiming sin and judgment nuancing the particular against the individual rethinking the ideal outcome of the practices and reimagining the organizational structures that support the practices Only this level of revisioning will enable this ministry of the church to move beyond its individualistic limitations and offer healing in more complex effective and socially adequate ways

Performing Emotions Peta Tait,2017-07-05 In *Performing Emotions* Peta Tait s central argument is that performing emotions in realism is also performing gender identity Emotions are phenomena that are performable by bodies which have cultural identities In turn these create cultural spaces of emotions This study integrates scholarship on realist drama theatre and approaches to acting with interdisciplinary theories of emotion phenomenology and gender theory With chapters devoted to masculinity and femininity specifically as well as to emotions generally it investigates social beliefs about emotions through Chekhov s four major plays in translation and English language commentaries on Constantin Stanislavski s direction of the play s first productions and his approaches to acting and Olga Knipper s acting of the central women characters Emotions exists as social relationships they are imagined and embodied as gendered Tait demonstrates how theatrical emotions are predicated on social performances and vice versa In Chekhov s plays which came to dominate a twentieth century theatre of emotions characters interpret their emotions intertextually in relation to other theatrical and fictional narratives of emotions Tait here interrogates these plays as sustained explorations of the inherent theatricality of characters expressing emotions from their phenomenological awareness A theatrical language of gendered interiority is produced in the acting of emotions in Stanislavski s early realistic theatre Alternatively remapping the performances of emotional bodies can destabilise the culturally constructed boundary separating an inner private self and an outer social self in culturally produced geographies of emotions As Tait shows emotions can be performed as indivisible spatialities *Performing Emotions* integrates theories of theatre gender identity and emotion to investigate how sexual difference impacts on the representations of emotions The book develops an accumulative analysis of the meanings of emotions in twentieth century realist drama theatre and acting
