Information, Territory, and Networks Hilde De Weerdt, 2020-05-11 The occupation of the northern half of the Chinese territories in the 1120s brought about a transformation in political communication in the south that had lasting implications for imperial Chinese history By the late eleventh century the Song court no longer dominated the production of information about itself and its territories Song literati gradually consolidated their position as producers users and discussants of court gazettes official records archival compilations dynastic histories military geographies and maps This development altered the relationship between court and literati in political communication for the remainder of the imperial period Based on a close

reading of reader responses to official records and derivatives and on a mapping of literati networks the author further proposes that the twelfth century geopolitical crisis resulted in a lasting literati preference for imperial restoration and unified rule Hilde De Weerd makes an important intervention in cultural and intellectual history by examining censorship and publicity together In addition she reorients the debate about the social transformation and local turn of imperial Chinese elites by treating the formation of localist strategies and empire focused political identities as parallel rather than opposite trends

Rulers and Ruled in Ancient Greece, Rome, and China Hans Beck, Griet Vankeerberghen, 2021-02-04 A comparative study of the ancient Mediterranean and Han China seen through the lens of political culture

History of Customs in the Yuan Dynasty Li Shi, The book is the volume of History of Customs in the Yuan Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600-1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070-1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley

which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi, or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China. In some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

China's Early Empires Michael Nylan, Michael Loewe, 2010-11-04. Shows how recent archaeological discoveries have enriched our perception of the cultural history of China in the Classical era. [Sacred Landscapes of Imperial China](#) Giulio Magli, 2020-06-15. This book analyses the magnificent imperial necropolises of ancient China from the perspective of Archaeoastronomy, a science which takes into account the landscape in which ancient monuments are placed, focusing especially but not exclusively on the celestial aspects. The power of the Chinese emperors was based on the so-called Mandate of Heaven; the rulers were believed to act as intermediaries between the sky gods and the Earth, and consequently the architecture of their tombs, starting from the world-famous mausoleum of the first emperor, was closely linked to the celestial cycles and to the cosmos. This relationship, however, also had to take into account various other factors and doctrines: first the Zhao Mu doctrine in the Han period, and later the various forms of Feng Shui. As a result, over the centuries, diverse sacred landscapes were constructed. Among the sites analysed in the book are the pyramids of Xi

an from the Han dynasty the mountain tombs of the Tang dynasty and the Ming and Qing imperial tombs The book explains how considerations such as astronomical orientation and topographical orientation according to the principles of Feng Shui played a fundamental role at these sites
