T. Al KINKYO,2016-01-06 The purpose of this book is to empirically analyse the multifaceted nature of financial linkages in East Asia and to discuss the key policy challenges faced by the region s economies Although the emphasis is placed on East Asia some of the chapters cover a broader area of countries depending on the aim of the study Particular areas of focus in these studies include the evolution of cross border financial linkages in East Asia long run economic consequences of remittance inflows and natural resource dependence and policy priorities for the financial integration and management of resource rich Financial Globalization and Regionalism in East Asia Takuji Kinkyo, Yoichi Matsubayashi, Shiqeyuki economies Hamori, 2013-12-04 With increased resilience in the financial systems emerging Asian economies were less affected by the recent global financial crisis recovering more quickly from the crisis than major advanced economies Yet Asian financial systems remain underdeveloped More open and efficient financial systems continue to be a key priority for Asia s

development strategy Emerging Asian economies need to tackle the new challenges to macroeconomic and financial stability posed by financial globalisation This book identifies the key challenges to Asia's financial development in an era of rapid financial globalisation and discusses their policy implications for financial reforms and regional cooperation in East Asia Particular areas of focus include the impact of financial globalisation on economic stability and inequality in East Asian economies the progress of Asia's regional financial cooperation and lessons from the recent European economic crisis and the priority of financial reforms in individual Asian economies Combining advanced econometric methods and in depth case studies this book provides rigorous and contextual analyses of the most critical issues for Asia's financial development It offers a comprehensive and useful guide for students academics and policymakers interested in the current state and future prospects of Asian financial systems Moving Up The Ladder: Development Challenges For Low And Middle-income Asia Shigesaburo Kabe, Ryuichi Ushiyama, Takuji Kinkyo, Shigeyuki Hamori, 2016-03-07 Besides export expansion a growing middle class in Asia has contributed to the area's economic expansion providing Asian countries with a window of opportunity to leap from low middle income levels to high income levels It may sound easy for these countries to run up the ladder of economic growth but the potential risks of guickly shifting from low middle to high income levels are often overlooked Careful studies in history reveal that the experience of moving up the ladder of economic growth has varied among countries This book explores 1 the current state of Asian economies and 2 the conditions or policy counter measures that lead to higher income levels under changing external circumstances This is illustrated through case studies on five Asian economies with emphasis on their structural problems It also aims to paint a comprehensive picture of necessary policies which will encourage Asian countries to move up the ladder of growth Global Linkages and Economic Rebalancing in East Asia Shigeyuki Hamori, 2013 In the wake of the global financial crisis leading industrialized countries have managed to show only a gradual recovery while East Asian economies have surged ahead In particular China achieved growth in excess of 10% in 2010 and is expected to continue growing at a rapid pace It appears that in the coming years East Asia will play an even greater role as a growth center leading global economic expansion Following the Asian currency crisis of 1997OCo98 consumption and investment in the region decreased considerably and East Asian economies recovered on the strength of exports Presently however amid a less than robust recovery in the US and Europe the sustainability of East Asia's reliance on export led growth has been called into question The region s transition to growth based on a balance of foreign and domestic demand is important for both building a stronger foundation for sustainable growth and buttressing global economic expansion Moreover the rebalancing of demand in East Asia holds the key to rectifying global current account imbalances OCo the disadvantage of uneven international capital flows This unique volume illuminates policy issues involved in the efforts to promote the rebalancing of demand in East Asia Introduction of the Euro and the Monetary Policy of the European Central Bank Shigeyuki Hamori, Naoko Hamori, 2010 The Euro area is an extremely unique and important

currency area for two reasons First it is the single largest currency area to be created in an industrialized region In a sense the Euro area is important as a test case for those contemplating the establishment of new currency areas in East Asia North America or other industrialized regions Second it was established by sovereign states working as peers who despite various challenges peacefully and autonomously decided to create a single currency area In other words the Euro area is very different from other currency areas created by countries formerly in colonial relationships with each other Therefore for regions emerging from a developing status and forming a currency area the Euro area could serve as a model case Marking the 10th anniversary of the creation of the European Central Bank ECB and the Euro this invaluable book analyzes the monetary policy of the ECB the guardian of the Euro by using recently developed econometric methods The analysis performed in this book marks a substantial contribution toward understanding the significance of the Euro area as well as the future of the Euro from an international perspective The Bibliographic Index ,2005 The British National **Bibliography** Arthur James Wells, 2005 International Competitiveness in Africa Ivohasina Fizara Razafimahefa, Shiqeyuki Hamori, 2007-05-24 This book offers insight into international trade and foreign direct investment competitiveness in Africa It examines two policies frequently used to enhance international competitiveness in Sub Saharan African economies exchange rate policy and productivity related policy Metaheuristics in Machine Learning: Theory and Applications Diego Oliva, Essam H.
