Breaking the Trust Barrier JV Venable, 2016-06-06 Build Extraordinary Trust and Lead Your Team to a Higher Plane For former US Air Force Thunderbirds commander and demonstration leader JV Venable inspiring teamwork was literally a matter of life and death On maneuvers like the one pictured on the cover the distance between jets was just eighteen inches Closing the gaps to sustain that kind of separation requires the highest levels of trust On the ground or in the air from line supervisor to CEO we all face the same challenge Our job is to entice those we lead to close the gaps that slow the whole team down gaps in commitment loyalty and trust Every bit of closure requires your people to let go of biases and mental safeguards that hold them back The process the Thunderbirds use to break that barrier and craft the highest levels of trust on a team with an annual turnover of 50 percent is nothing short of phenomenal That process is packaged here with tips and compelling stories that will help you build the team of a lifetime **Antebellum American Women Writers and the Road** Susan L. Roberson, 2012-07-26 A study of American women s narratives of mobility and travel this book examines how geographic movement opened up other movements or mobilities for antebellum women at a time of great national expansion Concerned with issues of personal and national identity the study demonstrates how women not only went out on the open road but participated in public discussions of nationhood in the texts they wrote Roberson examines a variety of narratives and subjects including not only traditional travel narratives of voyages to the West or to foreign locales but also the ways travel and movement figured in autobiography spiritual and political narratives and domestic novels by women as they constructed their own politics of mobility These narratives by such women as Margaret Fuller Susan Warner and Harriet Beecher Stowe destabilize the male dominated stories of American travel and nation building as women claimed the public road as a domain in which they belonged bringing with them their own ideas about mobility self and nation The many women s stories of mobility also destabilize a singular view of women s history and broaden our outlook on geographic movement and its repercussions for other movements Looking at texts not usually labeled travel writing like the domestic novel brings to light social relations enacted on the road and the relation between story location and mobility **Breaking the Barriers** Jason Frenn, 2009-08-13 In a world filled with dysfunction futility and confusion people are looking for meaning and significance They want to break through the barriers holding them back BREAKING THE BARRIERS offers three foundational pillars to equip readers for overcoming the most difficult obstacles in their lives These three pillars teach readers how to Take on the character of God the Father Take on the wisdom of the Son Take on the discipline of the Spirit Through dynamic stories of people who have overcome seemingly insurmountable odds and the powerful example of the author who has overcome great adversity in his own life this book shows readers that God is on their side and desires for them to fulfill the dreams and purposes he has placed in their hearts **The Everychurch Guide to Growth** Elmer L. Assessment and Treatment Methods for Manual Therapists

Jeffrey Burch, 2023-10-19 Effectively assessing clients and knowing how to treat them is the cornerstone of manual therapy. This practical and informative book gives clear and detailed information about these two steps. The book provides step by step instructions including illustrations for 19 assessment methods and 24 gentle treatment methods, some of which appear in print for the first time. These methods can be combined to give multiple options for treatment as demonstrated in five practical examples which demonstrate how the practitioner can apply the methods to improve their clients wellbeing. The author also describes his six axis model of variance among treatment methods which will be particularly useful for practitioners who may want to develop additional new treatment methods of their own. Jeff Burch seeks to demystify the complex and often inconsistent terminology found in many manual therapy texts, making this a practical text for readers of all levels. It will be a useful tool for osteopaths, massage therapists, chiropractors, occupational therapists, physical therapists, structural integrators and all bodyworkers.

Pride of Obsession A. J. Aizenstat, 2001 This is the full story of Christopher Columbus the central figure of the age of sea exploration who brought his contemporaries into a vastly expanded world changing forever their lives and the scope of human history It is the first comprehensive and well integrated biography soundly rooted in historical fact that places his life time and deeds in proper perspective The fast paced narrative keeping events and incidents in their context replaces myths and distortions with documented facts and clear down to earth analysis Disregarding past stereotypes the story of Columbus emerges as that of a human being of blood and flesh who like all of us had to take on life with its inherent contradictions and limitations It is the story of a complex man of humble origin driven by the innovative power of his vision Lofty dreams and persistent struggles sweeping action and painful defeats high accomplishments and dismal failures are all part of the many sided fabric of a life lived on a scale without precedents What makes the true story of Columbus especially relevant in our time is the looming age of space exploration which is bound to become the dominant factor of the twenty first century Its far reaching consequences for the way we live and think can no more be imagined at this stage than it was possible for the people who lived in 1492 to imagine the extraordinary transformation that would ensue from Columbus discovery of the New World The latter is the only available precedent of comparable importance in human history that no one can ignore in the face of a future about which very little is known or even imaginable

This book documents the growing mobility of international students in the Asia Pacific International students comprise over 2.7m students and it is estimated by the OECD that this will top 8 million in 2020 The great majority of them are students from the Asian countries who study in the Europe North America and Asia In addition countries such as Singapore Malaysia and Hong Kong are becoming education hubs and are proposing to attract international students Over 42% of international students come from Asia and this is predicted to continue with the strong presence of students from China India Korea and Japan continuing A younger population a growing middle class and shortages of quality education providers in the Asia Pacific region means that this mobility will be a feature of the future This book explores questions around the mobility of international students in the context of the global economy and an increasingly competitive trans national education market It also explores questions about the experience of international students principally from the Asia Pacific region at a time of increased global insecurity and growing hostile reactions to

foreigners in the post September 11th era This book emerges from empirical work from several research projects funded by the World Bank and several community projects to support international students The focus is also on the way in which student mobility promotes growing connection within the Asia Pacific as well as other regions and provides the foundations for new notions of global citizenships
