A First Course in Analysis George Pedrick,2012-09-10 The first course in Analysis which follows calculus along with other courses such as differential equations and elementary linear algebra in the curriculum presents special pedagogical challenges There is a change of stress from computational manipulation to proof Indeed the course can become more a course in Logic than one in Analysis Many students caught short by a weak command of the means of mathematical discourse and unsure of what is expected of them what the game is suffer

bouts of a kind of mental paralysis This text attempts to address these problems in several ways First we have attempted to define the game as that of inquiry by using a form of exposition that begins with a question and proceeds to analyze ultimately to answer it bringing in definitions arguments conjectures exam ples etc as they arise naturally in the course of a narrative discussion of the question The true historical narrative is too convoluted to serve for first explanations so no attempt at historical accuracy has been made our narra tives are completely contrived Second we have kept the logic informal especially in the course of preliminary speculative discussions where common sense and plausibility tempered by mild skepticism serve to energize the inquiry Fundamentals of Engineering Numerical Analysis Parviz Moin,2010-08-23
