Nuclear Wastelands International Physicians for the Prevention of Nuclear War, Institute for Energy and Environmental Research, 2000 A handbook for scholars students policy makers journalists and peace and environmental activists A handbook for scholars students policy makers journalists and peace and environmental activists Nuclear Wastelands provides concise histories of the development of nuclear weapons programs of every declared and de facto nuclear weapons power as well as detailed surveys of the health and environmental effects of this development both in these countries and in non nuclear nations involved in nuclear weapons testing and uranium mining Among the more obvious but largely deferred costs of the Cold War are those related to the management of radioactive waste The world is burdened with thousands of unwanted nuclear devices and mounting surpluses of weapons grade plutonium and enriched uranium In addition the process of weapons production and testing has left many lands aquifers rivers lakes and seas contaminated by a multitude of weapons related poisons This book follows the production process step by step and country by country from uranium mining to the final assembly and storage of weapons analyzing the potential hazards of each step and compiling the most complete information available on the actual health and environmental effects in each country involved Nuclear Wastelands includes a wealth of information that has only recently come to light particularly on the nuclear weapons program of the former Soviet Union It also features critical analyses of official public communications concerning the health and environmental consequences of nuclear weapons production bringing to light governmental secrecy and outright deception that have led to the subversion of democratic principles and have camouflaged the damage done to the very people and lands the weapons were meant to safeguard Kaibab National Forest (N.F.), Canyon Uranium Mine Proposal ,1986 **First International Conference, Uranium Mine Tailings and Waste Disposal, May 19, 20, 21, 1980, Vancouver, British Columbia, Canada** ,1980 *Geotechnical Practice for Waste Disposal* D.E. Daniel, 2012-12-06 Earth scientists and geotechnical engineers are increasingly challenged to solve environmental problems related to waste disposal facilities and cleanup of contaminated sites The effort has given rise to a new discipline of specialists in the field of environmental geotechnology To be effective environmental geotechnologists must not only be armed with the traditional knowledge of fields such as geology and civil engineering but also be knowledgeable of principles of hydrogeology chemistry and biological processes In addition the environmental geotechnologist must be completely up to date on the often complex cadre of local and national regulations must comprehend the often complex legal issues and sometimes mind boggling financial implications of a project

and must be able to communicate effectively with a host of other technical specialists regulatory officials attorneys local land owners journalists and others The field of environmental geo technology will no doubt continue to offer unique challenges The purpose of this book is to summarize the current state of practice in the field of environmental geotechnology Part One covers broadly applicable principles such as hydrogeology geochemistry and con taminant transport in soil and rock Part Two describes in detail the underlying principles for design and construction of new waste disposal facilities Part Three covers techniques for site remediation Finally Part Four addresses the methodologies for monitoring The topics of waste disposal and site remediation are extra ordinarily broad
