First Psychic:

The First Psychic Peter Lamont, 2005 He was simply the greatest psychic of all time He was also the first before him the word psychic did not even exist The feats he performed were so extraordinary that Victorian scientists had to invent the term in order to explain them The man who became the world's first psychic was Daniel Dunglas Home Now almost entirely forgotten Home was a household name in Victorian Britain a man of inexplicable ability who divided opinion wherever he went Hated by Dickens and defended by Thackeray denounced by Faraday yet mysterious to Darwin insulted by Tolstoy but patronised by the Emperor of France and the Czar of Russia He was it is said the only subject upon which Robert and Elizabeth Barrett Browning ever argued The astonishing feats he performed and the bizarre personal life that attracted so much controversy are little known today outside the esoteric world of psychical research He rarely appears in the biographies of the many great Victorians who knew him as few could openly admit to such a controversial acquaintance But everyone knew him or knew of him figures in history and the strange and seemingly inexplicable events that occurred in his presence

G. Jung,2025-07-29 Jung s lectures on consciousness and the unconscious in English for the first time Between 1933 and 1941 C G Jung delivered a series of public lectures at the Swiss Federal Institute of Technology ETH in Zurich Intended for a general audience these lectures addressed a broad range of topics from dream analysis and yoga to the history of psychology They are at the center of Jung s intellectual activity in this period and provide the basis of his later work Here for the first

time in English is Jung's introduction to his core psychological theories and methods delivered in the summer of 1934. With candor and wit, Jung shares with his audience the path he himself took to understanding the nature of consciousness and the unconscious. He describes their respective characteristics using examples from his clinical experience as well as from literature, his travels, and everyday life. For Jung, consciousness is like a small island in the ocean of the unconscious, while the unconscious is part of the primordial condition of humankind. Jung explains various methods for uncovering the contents of the unconscious, in particular, talk therapy and dream analysis. Complete with explanations of Jungian concepts and terminology, *Consciousness and the Unconscious* painstakingly reconstructs and translates these talks from detailed shorthand notes by attendees, making a critical part of Jung's work available to today's readers.

[Cumulative List of Organizations Described in Section 170 \(c\) of the Internal Revenue Code of 1986, 1990](#) [Cumulative List of Organizations Described in Section 170 \(c\) of the Internal Revenue Code of 1954, 2003](#) [The Philosophical Dimension of Psychology: A Beginner's Guide](#) James A. Harold, 2022-01-04

Both students and professors typically assume that the content of introductory psychology textbooks, which are empirical in nature, are identical to psychology proper. Yet what is surprising is how many interesting psychological insights can be found in both philosophy and literature that are often not found in psychology texts. Such insights are clearly psychological in nature, yet they do not go back to any empirical investigation. It seems that basic psychology textbooks, typically providing the basis for undergraduate and graduate psychology programs, represent only one important dimension of psychology: empirical psychology. But there is no simple co-extensive identity between psychology and empirical psychology. *The Philosophical Dimension of Psychology: A Beginner's Guide* begins with an investigation of what constitutes the subject matter of psychology, which demonstrates the aspects of psychological reality that are ignored, missed, or at times even theoretically denied by mainline contemporary psychology if they lack an empirical warrant. Such matters include inner conscious experience, the world of intrinsic value, as well as the higher, uniquely personal dimension of human nature that is of intellect and will. This book therefore offers a more complete survey of the entire sphere of psychological reality, which could provide the context for more properly interpreting empirical psychological phenomena. For example, should we understand psychological conditioning principles within a broader context of personal freedom? Is a person more rightly conceived in a psychologically immanent way that is oriented simply toward the fulfillment of instincts and needs, or is there as well a transcendent orientation oriented to truth and meaning? Should we understand psychology simply from the point of view of efficient causation, or do we need to also take into account final causation? It will be of interest to psychology students of either undergraduate or graduate level and of great use to those with no prior knowledge of philosophy.
