In Defense of Childhood Chris Mercogliano, 2007 As codirector of the Albany Free School Chris Mercogliano has had remarkable success in helping a diverse population of youngsters find their way in the world He regrets however that most kids lives are subject to some form of control from dawn until dusk Lamenting risk averse parents overstructured school days and a lack of playtime and solitude Mercogliano argues that we are robbing our young people of that precious irreplaceable period in their lives that nature has set aside for exploration and innocent discovery leaving them ill equipped to face adulthood The domestication of childhood squeezes the adventure out of kids lives and threatens to smother the spark that animates each child with talents dreams and inclinations There is plenty that those involved with children can do to protect their spontaneity and exuberance We can address their desperate thirst for knowledge give them space to learn from their mistakes and let them explore what their

Teach Baby to Talk ... and Make Reading Fun Sandra Jean Smith, 2012-11-07 Teach Baby to Talk and Make Reading Fun The Importance of Speech and Language in Learning to Read begins by recounting author Sandra Jean Smith's experience as a teacher of illiterate adults and also examines the possible causes for the ever growing number of children starting school with speech problems unseen in previous generations Smith's research on this topic interspersed with her personal stories make for impressive reading She uses humour and anecdotes to entertain and inform readers Learn the latest research into these problems and what parents can do to prevent and rectify them Chapter summaries reinforce her research The content covers such topics as childcare and parenting issues the problems associated with children learning to speak and the consequent implications for learning to read She also discusses the library's role in stimulating and extending children's interest in reading to counteract the influence of computer games and television Teach Baby to Talk is written in an easy to read format with minimal educational jargon The book is a must read for parents and anyone working with very young children **Raising Readers at Home** Sheila E. Sapp, 2023-07-31 This book consists of an easy to follow plan designed to guide and assist parents in nurturing and developing pre reading pre literacy skills needed to learn how to read Parents caregivers begin their journey by examining and exploring why some children have difficulty learning to read It is also noted the role they can play in preparing their children for the learning to read process at home They are guided through the development of pre reading milestones and behavior characteristics of young children Additionally parents caregivers complete a self assessment to determine their thoughts about learning which is important in setting up a creative and vibrant learning environment for their home Before addressing the four components of the reading process parents caregivers are guided in setting the stage for learning to reading their home by establishing a print rich environment

Super Learning for Kids─The First Step Towards a Top Life─Part 1─Tsung-Yi Chen,2025-09-24 The rise of Taiwan's semiconductor industry is rooted in the super learning parenting approach In the journey of accompanying children through their learning we often encounter various questions How can we ignite their learning motivation How can we help them remember better and learn faster Recently I've been deeply reflecting on these questions and have begun to re-examine our understanding of learning In reality learning is not just about memorizing knowledge it's an adventure of intellect and creativity Children's learning speeds vary and this isn't a flaw but rather a reflection of each individual's growth rhythm When we are willing to respect these differences and utilize various learning strategies children's potential can gradually be unearthed In the past we might have only focused on grades and outcomes but modern brain science tells us that the essence of learning lies in the development and activation of brain structures Activities seemingly unrelated to academics such as exercise meditation and even sleep can significantly boost learning efficiency Appropriate levels of stress and relaxation can help children overcome difficulties while diverse techniques like spaced practice concentrated practice visual memory auditory learning and even body code memory methods can simultaneously enhance memory and comprehension Furthermore building learning motivation cultivating speed reading abilities mastering efficient reading techniques and improving presentation and note-taking skills are all indispensable keys for children to move towards independent learning Every child can discover their unique intellectual strengths as long as we are willing to accompany guide and experiment This journey of exploration has given me a brand new appreciation for learning I hope every parent and child will be brave enough to try different learning methods and find the path that suits them best After all learning is a lifelong endeavor the starting point isn't what matters continuous progress is key
