

11 college life words

First things first: Americans usually refer to college or university as just **"school"**. That's something I had no idea before actually going there. So, instead of saying *"What college do you go to?"*, most Americans just say *"Where do you go to school?"*

Also, it's important for you to understand the difference between **"college"** and **"university"**. We use the word **"college"** to refer to institutions that only offer undergraduate programs. If the institution also offers graduate degree programs, we will call it a university. Now that these common questions are out of the way, let's keep going. Here are some words related to **English at university** that you should know:

Freshman, Sophomore, Junior & Senior

Freshman is a term used to describe first-year students, the ones that are just out of high school. Second-year students are called **sophomores**, third-year students are known as **juniors**, and **seniors** are the ones that are in their last year of school.

Minor & Major

Every country's school system is unique, but many students outside the US have to choose their main field of study (such as engineering, nursing, journalism, law, psychology, etc) before being admitted to college. In the United States, it's different. Students spend their first two college years exploring different courses and then later they declare their **major**, which is the field of study in which they want to specialize. Besides that, they can also choose a **minor**, which is another academic discipline the student chooses to focus on. For instance, one can pursue a major in journalism and a minor in economics.

GPA

GPA stands for "grade point average" and it is a way to measure academic achievement in college. The GPA scale typically ranges from 0.0 to 4.0. If you are an outstanding student it is very likely that you will have a perfect 4.0 GPA. Most colleges require at least a 3.0 GPA for entry, but some community colleges accept 2.0 GPA.

This is how to pronounce different GPAs:

- 4.0 = four-point-oh
- 3.5 = three-point-five
- 3.0 = three-point-oh
- 2.75 = two-point-seven-five
