**Wilderness as a place for scientific inquiry**, 2000 Southern Water, Southern Power Christopher J.

Manganiello, 2015-04-06 Why has the American South a place with abundant rainfall become embroiled in intrastate wars over water Why did unpredictable flooding come to characterize southern waterways and how did a region that seemed so

rich in this all important resource become derailed by drought and the regional squabbling that has tormented the arid American West To answer these questions policy expert and historian Christopher Manganiello moves beyond the well known accounts of flooding in the Mississippi Valley and irrigation in the West to reveal the contested history of southern water From the New South to the Sun Belt eras private corporations public utilities and political actors made a region defining trade off The South would have cheap energy but it would be accompanied by persistent water insecurity Manganiello s compelling environmental history recounts stories of the people and institutions that shaped this exchange and reveals how the use of water and power in the South has been challenged by competition customers constituents and above all nature itself Wilderness Science in a Time of Change Conference ,2000 Comrades on the Colca Eugene

Buchanan,2016-10-18 A modern day real life adventure this book will take readers along for a rollicking ride through South America on a race to the bottom of the Earth When the author first met Polish explorer Yurek Majcherczyk on a commercial feasibility expedition down Ecuador s Quijos River in 1989 he did not know it would lead to taking part in a Polish race stumbling upon a mummy filled cave and even getting wrapped up in a legend linking long lost Incan riches to a riverfront castle in Poland As the adventurers plunge deeper and deeper into unknown territory they discover a rival Polish team trying to usurp their goal The author seamlessly weaves these tales with his own exploits and adventures climaxing with a tumultuous hike out of the canyon with both teams returning to complete their race the following year **The Same River**

**Twice** Michael D. Burke,2006 In the summer of 1991 Michael Burke an experienced river guide embarks on a three week journey down a series of remote rivers in British Columbia Leaving behind his pregnant wife he embraces the perils of a voyage with a companion he barely knows in a raft that may not weather the trip He attempts to reconcile the shifting fates of his life his transition from river guide to husband father and academic At the same time he hopes to explore his connection to a distant relative Sid Barrington who was a champion swiftwater pilot of the North in the late 19th and early 20th centuries As Burke contemplates what he and Sid may have had in common he meditates on the changing meaning of rivers and the impossibility of fully recovering the past In clear and graceful prose Burke blends Sid s colorful history with his own uncommon journey He also reflects upon the quick currents of time and the fierce passion he shares with Sid for the life of river running in Alaska and the west Unlike most river running books that often describe waterways in the lower forty eight states **The Same River Twice** introduces readers to rough austere and unfamiliar rivers in the northern wilderness Burke has an intimate understanding of these remote free flowing rivers He effectively captures the thrill of moving water the spirit of rivers and river canyons and the life of river guides This insightful memoir brings readers into a confluence of rivers where past and present merge revealing the power of wilderness and the truth about changing course Kayaking Alan Fox,1993

Fletcher,2014-02-24 The worldwide development of ecotourism including adventures such as mountain climbing and

whitewater rafting as well as more pedestrian pursuits such as birdwatching has been extensively studied but until now little attention has been paid to why vacationers choose to take part in what are often physically and emotionally strenuous endeavors Drawing on ethnographic research and his own experiences working as an ecotour guide throughout the United States and Latin America Robert Fletcher argues that participation in rigorous outdoor activities resonates with the particular cultural values of the white upper middle class Westerners who are the majority of ecotourists Navigating 13 000 foot mountain peaks or treacherous river rapids demands deferral of gratification perseverance through suffering and a willingness to assume risks in pursuit of continuous progress In this way characteristics originally cultivated for professional success have been transferred to the leisure realm at a moment when traditional avenues for achievement in the public sphere seem largely exhausted At the same time ecotourism provides a temporary escape from the ostensible ills of modern society by offering a transcendent wilderness experience that contrasts with the indoor sedentary mental labor characteristically performed by white collar workers
