First European Elections:

The First European Elections Chris Cook, Mary Mother Francis, 1979-04-11 **Routledge Handbook of European Elections** Donatella M. Viola, 2015-08-14 The Routledge Handbook of European Elections explores the multifaceted dimension of the European Parliament's EP electoral contests across the European Community and European Union since 1979. After setting a general empirical and theoretical framework, this collaborative project presents original contributions from leading experts from virtually all the corners of the European Union. Each case study adheres to a common template that makes it easy to compare data methodology and outcomes. Every country chapter includes a brief geopolitical profile and historical background of the Member State, a glance at the national political landscape, a short account of the main political parties including their attitude toward the European Union, a section on public opinion and European integration, a summary of electoral systems, an overview of all EP and national elections, an in-depth analysis of the 2009 EP electoral race, an overall theoretical interpretation of European elections. A comparative chapter closes the Handbook, followed by an Epilogue focussing on the 2014 EP contest with a detailed analysis of the newly elected European Assembly in terms of political group and gender composition. The volume aims to enhance readers' understanding of the European Parliament and revive their interest in the European integration process. By providing a wide range of national and European facts and figures, this investigation represents a comprehensive reference guide to scholars, practitioners, and students of the European Parliament.

European elections, political parties, European Union, and comparative politics **The European Parliament Election of 2019 in East-Central Europe** Vít Hloušek, Petr Kaniok, 2020-06-03 This book provides an analysis of the European Parliament elections 2019 with a focus on East Central European countries. The authors offer conceptual insights into Euroscepticism and discuss traditionally familiar concepts in a new light, pairing East Central European Euroscepticism with visions of illiberal democracy on the one hand and showing the increasing Europeanisation of Eurosceptic parties in the region on the other. The book combines a fresh and innovative conceptual treatment with rich and accurate empirical evidence in order to highlight the dynamics of Euroscepticism in new EU member states. Students and experts interested in EU politics within academia and beyond will find this volume particularly informative.

2019 European Elections, 2020-09-29 This volume aims to provide consolidated analyses of the 2019 European elections and explanations about the future of the European party system in a context in which the EU has to face many challenges, including the erosion of electoral support for mainstream parties and the increasing success of populist parties. The structure of the book is designed to combine the overall view on the role of elections in shaping the future European project with relevant case studies. The reader is given a perspective not only on the results of the European Parliament elections as such but also on how these results are related to national trends which pre-exist and what kind of collateral effects on the quality of democracy they could have. Contributors include Jan Běha, Sorin Bocancea, Dora Bokay, Radu Carp, József Dör, Tomáš Dvořák, Alexandra Alina Iancu.

Lodge,2010-09-17 An analysis of the 2009 European elections in each of the 27 member states of the newly enlarged European Union and assessment of the European Parliament in 2004 2009 This book looks at the implications of low turnout for the future of European Union democracy and accountability European Communities John Paxton,1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community s target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992 *A Dictionary of the European Union* Lee McGowan,David Phinnemore,2004-04-29 Concise definitions and explanations on all aspects of the European Union The 2014 European Parliament Elections in Southern Europe Hermann Schmitt,Eftichia Teperoglou,2018-02-02 Southern Europe has been the EU region most exposed to the Eurozone sovereign debt crisis with consequences for national party systems and political stability The 2014 European Parliament elections took place at a crucial time for Europe and Southern European societies more generally This book analyses the Euroelections in Southern Europe asking whether these followed the usual pattern of low stimulus contests or whether the crisis context raised the bar Country chapters on Italy Greece Spain Portugal Cyprus and Malta investigate the background of the elections the electoral campaign and the rise of Euroscepticism The linkage between governments economic performance the Europhile or Eurosceptic stances of political parties and their electoral performance are at the core of the analysis in each chapter The findings reveal that the political and electoral consequences of the economic crisis

have not fundamentally challenged the second order character of the 2014 European Parliament elections in Southern Europe However electoral behaviour exhibits some indications of a more critical contest in which the EU divide becomes more significant and polarising in determining voting choices This book was previously published as a special issue of South European Society and Politics *The 2019 European Electoral Campaign* Edoardo Novelli, Bengt Johansson, Dominic Wring, 2022-07-12 The 2019 European Electoral Campaign In the Time of Populism and Social Media examines political advertising during the 2019 elections to the European Parliament which has become the largest supranational campaign of its kind in the world Based on a research project funded by the European Parliament and an archive of more than 11 000 campaign items the book draws on results from a major content analysis covering every one of the 28 member states involved The 2019 European Electoral Campaign delivers a unique comparative assessment on the state of political communication within a European Union convulsed by momentous change This book will be of interest to scholars researchers and students of political communication media political science history European Union studies as well as a wider readership including politicians political strategists and journalists **British Elections and Parties Yearbook** David Broughton, David Denver, David Farrell, Colin Rallings, 2020-03-25 This volume looks at the political events and discusses the major issues of 1994 most notably the European parliament elections *European Union* Jeremy Richardson, 2006-01-16 This best selling book delivers a comprehensive introduction to the policy making processes at work in the European Union Written by some of the leading authorities in the field this new edition has been significantly improved to make it even more accessible for second and third year undergraduates Addressing some of the more contentious areas in order to stimulate students interest this book also continues to cover the vital elements of EU courses including theory history institutions policy relations with member states external relations enlargement A companion website also supports this edition with a clear guide to more technical material such as statistics as well as regular updates This volume is essential reading for all students of politics and the European Union **Europe's Elected Parliament** Julie Smith, 1999-05-01 An invaluable survey of the origins and development of the European Parliament and of its uncertain role in narrowing the gap between European institutions and voters Julie Smith traces the rising influence of the European Parliament over EU policy making in the 20 years since it was first elected the extension of its authority through successive Inter governmental Conferences and the ambiguities which nevertheless persist over its legitimacy as representing the people in its dialogue with the Commission and Council WILLIAM WALLACE Julie Smith places the fifth direct elections to the European Parliament in the broader context of the EU's development She examines the arguments and debates which surrounded the creation and evolution of a unique institution considers the effects which direct elections have had not always those expected and the growing relations between EP political groups and national parties She argues that national politicians should more openly acknowledge the shift in the balance of powers which European integration has caused MARTIN WESTLAKE This title

Why Europe Will Not Run the 21st Century Valerio Volpi, 2011-05-25 What future awaits Europe One of irrelevance where the emerging powers will crush the Old Continent or perhaps not Why Europe Will Not Run the 21st Century focuses on the necessity of radical and dramatic institutional reforms at the EU level not only to streamline a decision making process fragmented into a thousand trickles and naturally prone to the influence of powerful interest groups but also to involve the citizenry whose convinced support is necessary to the success of the project The EU is a distant entity whose democraticity is highly disputable The press ignores it and citizens know very little about it as the EU does things they do not really care about or cannot comprehend at all Citizens unawareness and lack of participation and involvement means the impossibility to create a real close knit European civil society and public opinion Why Europe Will Not Run the 21st Century revives the idea that only a federal Europe made up at least initially of a limited circle of pioneer states and characterised by a common Constitution central government and real European political parties will manage to work out the constitutional political economic and ethnic discrepancies inherent in so large a Union of states thus overcoming the EU's inability to face domestic as well as external threats and allowing Europe to halt its apparently inexorable decline

The European Parliament in the News Dimitrios Souliotis, 2022-02-13 This book analyzes the social legitimacy deficit of the European Parliament EP in the United Kingdom and Greece It does so by considering it partially a communication deficit and by addressing the relevant inadequacies of its communication and media relations performance Following this approach the book identifies and critically analyzes the problems that the European Parliament is facing in communicating and portraying itself to news websites in the United Kingdom and Greece and offers potential solutions to the issues presented The book provides an initial comparison of the scale of the problems that the EP is facing in its communication and media relations performance in Greece and in the United Kingdom focusing on a number of prominent carefully selected impartial or pro European websites The failures of the EP to secure adequate levels of visibility on these websites automatically signify serious basic weaknesses in its communication strategy This book identifies those weaknesses their causes and presents solutions on how to solve them Therefore this book is a must read for students and scholars of political science and media communication as well as policy makers and practitioners interested in a better understanding of the European Parliament's social legitimacy and communication deficit
