Cultural and Environmental Change on Rapa Nui Sonia Haoa Cardinali,Kathleen B. Ingersoll,Daniel W. Ingersoll Jr.,Christopher M. Stevenson,2017-08-09 Rapa Nui one of

the world's most isolated island societies and home to the notable moai has been at the centre of a tense debate for the past decade. Some see it as the site of a dramatic cultural collapse occurring before Western contact where a self-inflicted ecocide was brought on by the exhaustion of resources. Others argue that the introduction of Western pathogens and the slave raids of 1862 were to blame for the near extinction of the otherwise resilient Rapa Nui people. *Cultural and Environmental Change on Rapa Nui* brings together the latest studies by prominent Rapa Nui researchers from all over the world to explore the island's past and present from its discovery by Polynesians through the first documented contact with Western culture in 1722 to the 20th century. The exiting new volume looks beyond the moai to examine such questions as: was there a cultural collapse? how did the Rapa Nui react to Westerners and what responses did the Rapa Nui develop to adjust to naturally or humanly induced environmental change? This volume will appeal to scholars and professionals in the fields of history, archaeology and ecology as well as anyone with an interest in the challenges of sustainable resource management and the contentious history of Rapa Nui itself.
