## First Sight Birds Of Prey:

Raptors of the World David A. Christie, James Ferguson-Lees, 2010-07-30 Covering every species of raptor on the planet this book is perfect for anyone with an interest in birds of prey Birdwatch This guide covers all the world's 313 raptor species illustrated with adult juvenile and selected immature plumages as well as main geographical races There are illustrations of over 2000 perched and flying birds some with typical prey and facing texts summarising length wingspan male to female proportion shape and flight The text is further enhanced with line drawings illustrating specific points about identification and behaviour

**The Birds World** Nicolae Sfetcu, 2021-10-25 Birds are among the most extensively studied of all animal groups Hundreds of academic journals and thousands of scientists are devoted to bird research while amateur enthusiasts called birdwatchers or more commonly birders probably number in the millions Birds are categorised as a biological class Aves The earliest known species of this class is Archaeopteryx lithographica from the Late Jurassic period According to the most recent consensus Aves and a sister group the order Crocodilia together form a group of unnamed rank the Archosauria Phylogenetically Aves is usually defined as all descendants of the most recent common ancestor of modern birds or of a specific modern bird species like Passer domesticus and Archaeopteryx Modern phylogenies place birds in the dinosaur clade Theropoda Modern birds are divided into two superorders the Paleognathae mostly flightless birds like ostriches and the wildly diverse Neognathae containing all other birds

nature *Eleonora's Falcon* Harmut Walter,1979-05 Named after a Sardinian princess of the fourteenth century who established laws protecting falcons Eleonora's falcon is the only European bird to breed in autumn and feed its brood on the mass of birds that migrate from Europe to Africa between July and October It breeds on small Mediterranean islands in colonies of up to 200 pairs and hunts often in groups preying on more than 90 species of migrant birds During the winter this falcon visits the rain soaked woodlands of Madagascar In this study illustrated beautifully and extensively with 59 line drawings and 38 photographs Harmut Walter shows how the unique geographical and biological situation of *Falco eleonorae* makes the species health an important indicator of environmental decay For though it lives in relatively isolated areas Eleonora's falcon nevertheless may ingest the many pollutants contained in its diet of birds migrating from industrial Europe Walter who has studied raptors on several continents and has been an ornithologist since his early youth examines several discrete colonies of Eleonora's falcon He concentrates on the species intraspecific behavior and ecology such as the falcons aggressive actions hunting strategies and response to fluctuating environmental conditions and investigates their evolutionary past

*The Bird* Colin Tudge,2010-09-07 How are birds so good at flying and navigating Why are birds so like mammals and yet so very different Did birds descend from dinosaurs and if so does that mean birds are dinosaurs How do they court each other and fend off rivals What's being communicated in birdsong Can we ever know how birds think In this fascinating exploration of the avian class Colin Tudge considers the creatures of the air From their evolutionary roots to their flying feeding fighting mating nesting and communicating Tudge provocatively ponders what birds actually do as well as why they do it and how With the same curiosity passion and insight he brought to redwoods pines and palm trees in his widely acclaimed book *The Tree* Tudge here studies sparrows parrots and even the Monkey eating Eagle to better understand their world and our own There is far more to a bird's existence than gliding gracefully on air currents or chirping sweetly from fence posts the stakes are life and death By observing and explaining the complex strategy that comes into play with everything from migration to social interaction to the timing of giving birth to young Tudge reveals how birds are uniquely equipped biologically to succeed and survive And he offers an impassioned plea for humans to learn to coexist with birds without continuing to endanger their survival Complete with an annotated cast list of all the known birds in the world plus gorgeous illustrations *The Bird* is a comprehensive and delightfully accessible guide for everyone from dedicated birders to casual birdwatchers that celebrates and illuminates the remarkable lives of birds
