Jayakrishna,Dr. John Martin,Ms Dipalee D. Rane / Chaudhari,Dr. Herison Surbakti ,2023-03-16 The ability of a buzzword to provide the appearance of meaning without really expressing that meaning is a distinguishing quality shared by all buzzwords This perception of meaning may be conveyed without actually communicating the meaning A great number of individuals are beginning to see the notion of cloud computing as if it were a foreign language It is used in a broad range of contexts and it often refers to subjects that do not seem to have any connection whatsoever During one conversation they discuss Google Gmail and then during the subsequent conversation they discuss Amazon Elastic Compute Cloud at least the latter has the term cloud in its name On the other hand the cloud is not a buzzword in the same sense that the Web is not a buzzword Cloud computing on the other hand is not a buzzword

Cloud computing is the result of the gradual development of a number of technologies that when combined have the potential to transform the manner in which an organization constructs its information technology infrastructure. Cloud computing is the result of the gradual development of these technologies. None of the technologies that go into cloud computing reflect anything fundamentally unique. This is comparable to the condition of the World Wide Web only a little more than a decade ago. In the same way that the majority of the technologies that make up cloud computing have been around for quite some time, the majority of the technologies that built up the World Wide Web have been around for decades before Netscape came along and made them accessible. Cloud computing and the World Wide Web are both examples of this. These were made accessible to the general public for the first time solely due to Amazon.com. When it comes to the deployment of their applications, the purpose of this book is to provide developers of transactional web apps with the knowledge and skills essential to make the most of cloud infrastructure. This book has a stronger emphasis on cloud computing as it relates to Amazon EC2 than it does on cloud computing as it relates to Google Gmail.

Step By Step Neural Networks for Image Classification using Python GUI

Hamzan Wadi, This book provides a practical explanation of the backpropagation neural networks algorithm and how it can be implemented for image classification. The discussion in this book is presented in step by step so that it will help readers understand the fundamental of the backpropagation neural networks and its steps. This book is very suitable for students, researchers, and anyone who want to learn and implement the backpropagation neural networks for image classification using PYTHON GUI. The discussion in this book will provide readers deep understanding about the backpropagation neural networks architecture and its parameters. The readers will be guided to understand the steps of the backpropagation neural networks for image classification through case example. The readers will be guided to create their own neural networks class and build their complete applications for data image classification. The final objective of this book is that the readers are able to realize each step of the multilayer perceptron neural networks for image classification. In Addition, the readers also are able to create the neural networks applications which consists of two types of applications which are command window based application and GUI based application. Here are the material that you will learn in this book.

CHAPTER 1 This chapter will guide you in preparing what software are needed to realize the backpropagation neural networks using Python GUI. The discussion in this chapter will start from installing Python and the libraries that will be used installing Qt Designer, understanding and using Qt Designer to design the application UI, and the last is about how to create a GUI program using Python and Qt Designer.

CHAPTER 2 This chapter discusses the important parts in the backpropagation neural networks algorithm which includes the architecture of the backpropagation neural networks, the parameters contained in the backpropagation neural networks, the steps of the backpropagation neural networks algorithm, and the mathematical calculations of the backpropagation neural networks.

CHAPTER 3 This chapter discusses in detail the mathematical calculations of fruit quality classification using the backpropagation neural networks.

which includes the feature extraction process of fruit images data normalization the training process and the classification process The feature extraction method used in this case is GLCM Gray Level Co occurrence Matrix The image features that will be used in this case are energy contrast entropy and homogeneity CHAPTER 4 This chapter discusses how to implement the backpropagation neural networks algorithm for fruit quality classification using Python This chapter will present the steps to create your backpropagation neural networks class and to define the functions that represent each process of the backpropagation neural networks This chapter will also present the steps to create a class for image processing And in final discussion you will be guided to create your backpropagation neural networks application from scratch to classify the quality of fruit CHAPTER 5 This chapter will discuss how to create a GUI based application for fruit quality classification using the backpropagation neural networks algorithm This chapter will discuss in detail the steps for designing the application UI by using Qt Designer the steps for creating a class for the backpropagation neural networks GUI based application and how to run the GUI based application to classify the fruit data
