J. A. N. Rietbergen, 1998 This major contribution to the idea of Europe sweeps the continent from its Celtic and German origins through the influence of the Greeks and Romans to the fruitful and sometimes bloody contacts with other cultures Peter Rietbergen portrays Europe s history as a series of four grand phases of continuity and change set in the context of political social and economic developments These phases are new forms of surviving believing looking at man and the world and consumption and communication Rietbergen s descriptions are supported by a selection of illuminating excerpts such as Chaucer s description of London in 1378 Michelangelo on Italian art and popular music lyrics of Iron Maiden and Sting *Major Companies of Europe 1993/94* R. M. Whiteside, A. Wilson, S. Blackburn, S. E. Hörnig, C. P. Dainotto,2007-01-09 Europe in Theory is an innovative analysis of eighteenth and nineteenth century ideas about Europe that continue to inform thinking about culture politics and identity today Drawing on insights from subaltern and postcolonial studies Roberto M Dainotto deconstructs imperialism not from the so called periphery but from within Europe itself He proposes a genealogy of Eurocentrism that accounts for the way modern theories of Europe have marginalized the continent s own southern region

portraying countries including Greece Italy Spain and Portugal as irrational corrupt and clan based in comparison to the rational civic minded nations of northern Europe Dainotto argues that beginning with Montesquieu's *The Spirit of Laws* 1748 Europe not only defined itself against an Oriental other but also against elements within its own borders its South He locates the roots of Eurocentrism in this disavowal internalizing the other made it possible to understand and explain Europe without reference to anything beyond its boundaries Dainotto synthesizes a vast array of literary philosophical and historical works by authors from different parts of Europe He scrutinizes theories that came to dominate thinking about the continent including Montesquieu's invention of Europe's north south divide Hegel's two Europes and Madame de Staël's idea of opposing European literatures a modern one from the North and a pre modern one from the South At the same time Dainotto brings to light counter narratives written from Europe's margins such as the Spanish Jesuit Juan Andr s's suggestion that the origins of modern European culture were eastern rather than northern and the Italian Orientalist Michele Amari's assertion that the South was the cradle of a social democracy brought to Europe via Islam

The European Environmental Conscience in EU Politics Thomas Hoerber, Gabriel Weber, 2021-12-06 Based on empirical studies of European energy and environmental policies this book suggests that in combination these two policy fields form a consensus in the EU which might also become the basis for a new European ideology namely European sustainability It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy In this connection between energy and the environmental we find one driver for European integration and indeed European identity If sustainability should become a European ideology it will substantially influence the way future Europeans will live This book will be of key interest to scholars and students of European Studies International Relations Political Science History Economics Sustainability Studies Environmental and Energy Policies in Europe
