dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics

Metropolitics Myron Orfield, 2011-12-01 Metropolitan communities across the country are facing the same seemingly unsolvable problems the concentration of poverty in central cities with flashpoints of increasing crime and segregation declining older suburbs and vulnerable developing suburbs and costly urban sprawl with upper middle class residents and new jobs moving further and further out to an insulated favored quarter Exacerbating this polarization the federal government has largely abandoned urban policy Most officials educators and citizens have been at a loss to create workable solutions to these complex

widespread trends And until now there has been no national discussion to adequately and practically address the future of America's metropolitan regions Metropolitica is the story of how demographic research and state of the art mapping together with resourceful and pragmatic politics built a powerful political alliance between the central cities declining inner suburbs and developing suburbs with low tax bases In an unprecedented accomplishment groups formerly divided by race and class poor minority groups and blue collar suburbanites together with churches environmental groups and parts of the business community began to act in concert to stabilize their communities The Twin Cities of Minneapolis and St Paul believed that they were immune from the forces of central city decline urban sprawl and regional polarization but the 1980s hit them hard The number of poor and minority children in central city schools doubled from 25 to 50 percent segregation rapidly increased distressed urban neighborhoods grew at the fourth fastest rate in the United States and the murder rate in Minneapolis surpassed that of New York City These changes tended to accelerate and intensify as they reached middle and working class bedroom communities which were less able to respond and went into transition far more rapidly On the other side of the region massive infrastructure investment and exclusive zoning were creating a different type of community In white collar suburbs with high tax bases where only 27 percent of the region's population lived 61 percent of the region's new jobs were created As the rest of the region struggled these communities pulled away physically and financially In this powerful book Myron Orfield details a regional agenda and the political struggle that accompanied the creation of the nation's most significant regional government and the enactment of land use fair housing and tax equity reform legislation He shows the link between television and talk radio sensationalism and bad public policy and conversely how a well delivered message can ensure broad press coverage of even complicated issues Metropolitica and the experience of the Twin Cities show that no American region is immune from pervasive and difficult problems Orfield argues that the forces of decline sprawl and polarization are too large for individual cities and suburbs to confront alone The answer lies in a regional agenda that promotes both community and stability Copublished with the Lincoln Institute of Land Policy *Benefit Incidence* Elke C. Meldau, 1980 Benefit incidence theory and its applications is a new and important area of research In many countries government expenditures represent a significant share of GDP and are expanding rapidly The actual and potential effect of these expenditures on the distribution of income may be significant Aware of this researchers have attempted to quantify the distributional effects of government outlays These empirical analyses have generated criticism and investigations into the theory and methodology of benefit incidence **Steuerwettbewerb und seine Auswirkungen auf Allokation und Distribution** Lars P. Feld, 2000 English summary Lars P Feld evaluates the economic arguments for or against tax competition in a federal polity and summarizes the empirical evidence concerned with the extent and impact of tax competition On this basis he conducts an empirical analysis of tax competition in Switzerland as a country which is particularly suited for such an analysis It is the only OECD country in which the subfederal jurisdictions have the basic power

to tax personal and corporate incomes actually leading to a considerable variation in personal and corporate income tax burdens among Swiss states cantons and local jurisdictions German description In der Europäischen Union werden seit einiger Zeit die Auswirkungen des Steuerwettbewerbs zwischen den Mitgliedsländern und die Notwendigkeit der Steuerharmonisierung diskutiert In der Schweiz wird eine ähnliche Diskussion hinsichtlich der kantonalen Steuerbelastungsunterschiede geführt Auf Basis einer Übersicht über die vorliegenden theoretischen und empirischen Resultate zum Steuerwettbewerb legt Lars P Feld eine empirische Analyse für den Steuerwettbewerb in der Schweiz vor Die Schweiz eignet sich besonders für eine solche Analyse da die Kantone und Gemeinden die grundsätzliche Kompetenz zur Besteuerung der Einkommen natürlicher und juristischer Personen besitzen Dabei zeigt sich dass aus dieser Kompetenzverteilung erhebliche Steuerbelastungsunterschiede zwischen den Kantonen und zwischen den lokalen Gebietskörperschaften resultieren Lars P Feld weist ausserdem ein erhebliches Ausmass an fiskalischem Wettbewerb in der Schweiz im Jahre 1990 nach Dabei findet eher Steuerwettbewerb als Transferwettbewerb im Bereich der Sozialpolitik statt Der Steuerwettbewerb ist bei Selbständigen etwas starker ausgeprägt als bei anderen Gruppen von Steuerzahlern und starker auf lokaler als auf kantonaler Ebene Auswirkungen des Steuerwettbewerbs auf die Effizienz der Bereitstellung öffentlicher Leistungen lassen sich kaum und allenfalls auf lokaler Ebene feststellen In der Schweiz wird im Laufe der Zeit hingegen in verstärktem Masse Einkommen durch die nachgeordneten Gebietskörperschaften mit Hilfe der Einkommensteuer umverteilt Dadurch scheint der Steuerwettbewerb ohne einen Zusammenbruch des Wohlfahrtsstaates im Rahmen einer bestimmten Finanzverfassung möglich Ein solches Element stellt die schwache Form einer Art Nationalitätsprinzip für die Sozialpolitik dar wie es auch auf die Europäische Union Anwendung finden konnte
