Fiscal Reform and Structural Change in Developing Countries analyzes the experience of countries involved in major tax reforms in the 1980s and first half of the 1990s by a combination of qualitative and quantitative country studies and overarching thematic studies. The emphasis is on the role of fiscal reform in stabilization and structural change as well as the effects that policy for stabilization and especially structural change can have on the fiscal deficit under different types of tax systems. The authors then analyze the reasons for the convergence of tax systems around the developing world. *Fiscal Reforms in the Least Developed Countries* Chandra K. Patel, 1997-01-01. The empirical research in this volume provides an analysis of the experience of the fiscal reforms carried out since the early 1980s in four different LDCs: Bangladesh, The Gambia, Malawi, and the United Republic of Tanzania. The case studies examine the nature and budgetary impact of the fiscal reforms in these countries, assess the extent to which reforms have achieved their objectives, and discuss the major obstacles to the success of fiscal reform.

Law Reform in Developing and Transitional States Timothy

Lindsey, 2007. Law reform in developing countries has become an increasingly topical subject in recent years. A critical issue is why so many law reform projects in developing economies are regarded by their sponsors and recipients as unsuccessful. This informative book examines examples of law reform projects in post-socialist and post-authoritarian states in Asia, identifies common problems, proposes analytical frameworks for understanding the problems identified. Though parallels between Asian models and those in developing states elsewhere in the world are strong, the book has been developed to avoid suggestion that the issues covered are somehow peculiarly Asian; indeed, it is shown that cultural relativist approaches to Asia are unsustainable. This is an invaluable reference for those involved in the areas of development economics, Asian studies, and comparative politics. Fiscal Decentralization in Developing and Transition Economies Anwar Shah, 2004

Analyzing the Distributional Impact of Reforms, 2 Aline Coudouel, Stefano Paternostro, 2005. The analysis of the distributional impact of policy reforms on the well-being or welfare of different stakeholder groups, particularly on the poor and vulnerable, has an important role in the elaboration and implementation of poverty reduction strategies in developing countries. In recent years, this type of work has been labeled as Poverty and Social Impact Analysis (PSIA) and is increasingly implemented to promote evidence-based policy choices and foster debate on policy reform options. While information is available on the general approach, techniques, and tools for distributional analysis, each sector displays a series of specific characteristics. These have implications for the analysis of distributional impacts, including the types of impacts and transmission channels that warrant particular attention, the tools and techniques most appropriate, the data source typically utilized, and the range of

political economy factors most likely to affect the reform process This volume provides an overview of the specific issues arising in the analysis of the distributional impacts of policy and institutional reforms in selected sectors Each chapter offers guidance on the selection of tools and techniques most adapted to the reforms under scrutiny and offers examples of applications of these approaches This is a companion to the first volume which offers guidance on trade monetary and exchange rate policy utility provision agricultural markets land policy and education
