Freinkman,Plamen Yossifov,1999 *Russian Federation* ,1996 World Bank Discussion Paper No 310 Examines the economic performance of East and Southeast Asia and Sub Saharan Africa and attempts to identify some of the practical lessons that Africa can learn from Asia in order to facilitate industrial development and export growth Three country comparisons illustrate the critical nature of government policies such as exchange rate policy and the role assigned to the agricultural sector *Russia's Uncertain Economic Future* John P. Hardt,Robert F. Bennett,2015-04-15 The contributors to this volume analyze the present state of the Russian economy and its future prospects which now seem brighter than at any previous time in the country s history The Russian economy is now showing positive GDP growth and a positive balance of payments portending a trend of sustained growth The record of the Putin presidency with respect to the establishment of market friendly legal and administrative environments is substantially positive On the other side of the ledger the contributors identify the persistence of monopolies in energy transportation and agriculture distortions resulting from corruption infrastructural inadequacies and the maldistribution of political power and decision making authority demographic decline and the erosion of human capital as manifested in the health education and welfare of the population Russia s successful development as a democratic society with a market economy is of great importance to its neighbors and to the global economy and specifically to the United States which is why the U S Congress commissioned these studies by expert analysts This edition includes a comprehensive subject index making the volume user friendly **Strengthening Russia's Fiscal Framework** Ms.Charleen Gust,Ms.Daria Zakharova,2012-03-01 Though many aspects of Russia s fiscal policy framework are close to best practice on paper actual practice in recent years has been moving away from best practice In particular the continued focus on the overall rather than the nonoil balance and the regular use of supplemental budgets to spend windfall oil revenues contribute to procyclicality of fiscal policy risking costly boom bust cycles Against this background this paper suggests several improvements to the framework for fiscal policy

Intergovernmental Reforms in the Russian Federation Migara O. De Silva, Galina Kurlyandskaya, Elena Andreeva, Natalia Golovanova, 2009-07-29 This study is a comprehensive review of fiscal federalism in the Russian Federation It presents a strong case for greater decentralization By succinctly surveying the literature on fiscal decentralization and clearly spelling out the main concepts the volume sets the stage for the subsequent description of the fiscal system in Russia and its evolution through a succession of reforms guided by a desire on the part of Russian policymakers to craft a workable system of fiscal federalism The authors not only describe the state of fiscal federalism in Russia at its key turning points but they also provide insightful critical assessments of the reforms introduced at each stage The book is rich with examples which makes it an easy and exciting reading The book's analysis of the history gives perspective to the authors' assessment of the current state of Russia's federalism The authors make a strong case for greater decentralization in Russia based not only on the traditional economic benefits of fiscal federalism but also on the political benefits from local government competition The richness of detail and the careful tracing of the reforms over the past nearly two decades also mean that this study will be an invaluable guide to both current observers with academic and policy interest in the recent fiscal federalism reforms as well as Russia's fiscal evolution since the early 1990s and its current fiscal challenges **Russia's Transition to a New Federalism**

Tournament Approaches to Policy Reform Clifford F. Zinnes, 2010-10-01 While much foreign aid achieves commendable goals some is ineffective In this volume Clifford Zinnes argues that a donor's intrinsic informational limitations on the local context as well as inability to control the progress of interventions mean that lack of success is not rooting in insufficient funding but in maladapted institution designs of interventions that don't foster local ownership He identifies and assesses a newly emerging class of foreign aid delivery that promises to overcome these obstacles The approach is based on prospective inter jurisdictional competition PIJC Beneficiary groups often local level governments supported by their private sector and civil society act as teams and compete against each other under explicit predefined rules and objectives to design and implement interventions under their own aegis to achieve the highest quantitatively measured performance either relative to others tournaments or against a preset benchmark certification Teams that cooperate internally are the likeliest to win the rewards which aside from the longer run benefits of the intervention itself might include more substantive financial or technical assistance from the sponsor Since only groups serious about reforming choose to play Zinnes says the incentives generated by the ensuing race to the top competition create local ownership encouraging recipients to draw on their own knowledge Moreover since all teams that compete and not just those who win donor rewards benefit from their own reform efforts he argues that this approach can leverage aid resources more than a conventional bilateral aid agreement Zinnes presents a dozen recent

applications of the approach including those sponsored by the World Bank USAID the United Nations the Ford Foundation and others He also recommends improvements and ways to scale up PIJC based projects in applications ranging from protecting the environment and reducing red tap
