IMF and World Bank Sponsored Structural Adjustment Programs in Africa Kwadwo Konadu-Agyemang, 2018-10-24 This title was first published in 2001. Bringing together geographers, planners, political scientists, economists, rural development specialists, bankers, public administrators and other development experts, this volume questions the benefits of Structural Adjustment Programmes (SAPs). It critically assesses the impact of SAPs from a wider perspective than a purely economic one, highlighting concerns about impacts of adjustments on the more vulnerable elements of society such as social welfare, the environment, labour, gender and agriculture. Revealing both the costs and benefits of the economic restructuring programme, the book also suggests alternatives to current development models and how SAPs can be made more sustainable. An original and comprehensive addition to the collections of both students and practitioners of development.

Ageing Populations and Changing Labour Markets Stella Vettori, 2016-04-01 Talk of a demographic time bomb is not new. The notion first entered public consciousness some time ago but there is a lack of clarity about what such talk is really all about. Ageing populations are seen both as a threat and an opportunity. There is concern about discrimination against older workers at the same time as there is concern about a shortage of labour. Migration of labour from places with young populations to places with ageing populations is sometimes seen in a positive light and sometimes quite differently. With chapters reflecting different perspectives from around the world, this book constitutes a major contribution to serious informed debate on issues that all too often have been the subject of sensationalised media treatment. Professor Stella Vettori has assembled a collection of expert writers on the social, cultural, political and economic factors that have implications both for labour markets and the well being of older people both in developed and developing countries. As a result, anyone involved with workplace and employment policy and practice and issues of diversity and discrimination either at a corporate or societal level will want to read this book. Policy implications are considered and possible solutions to seemingly intractable problems are offered in a remarkable book that embraces serious academic debate and a practical focus on real issues.
