The Fish Feud David L. VanderZwaag, 1983

Ocean Boundary Making Douglas M. Johnston, Phillip Saunders, 2024-05-01 Originally published in 1988 this book was written at a time when many nations were engaged in various forms of ocean boundary making This created new regional pressures and the need for collective regional responses to these issues This book examines the issues at stake and the boundary making processes It discusses these in a general way showing how the Third UN conference on the Law of the Sea helped resolve the problems whilst leaving some issues unresolved The book goes on to examine the issues and boundary making processes in 7 important areas of the world

Environmental Decisionmaking in a Transboundary Region Alison Rieser, Judith Spiller, David VanderZwaag, 2013-11-11

Beyond Walls: Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa's artificial line boundaries and other global situations

Salt Water Neighbors Ted L. McDorman, 2009 The United States and Canada are salt water neighbors on the Atlantic Pacific and Arctic Oceans Despite the general closeness of the political economic and social relationship the two States have approached their offshore areas from different perspectives Canada has long supported expansion of exclusive national control over its adjacent offshore whereas the United States has been concerned

with the balance between national authority and international navigation rights Canada has tended to view maritime disputes with the United States as local matters whereas the United States has tended to see the disputes with Canada in global terms Against this background Salt Water Neighbor s examines both the international ocean law disagreements that exist between the United States and Canada respecting maritime boundaries fisheries and navigation rights e g the Northwest Passage and the numerous cooperative bilateral arrangements that have prevented these disputes from being significant causes of friction between the neighbors There has not been a comprehensive book length study of United States Canada international ocean relations since the early 1970s Much has changed in the last 30 years Most importantly the law and the nature of the disputes between the two States have changed as a result of the adoption of 200 nautical mile zones in the late 1970s

Canadian Water Politics Mark Sproule-Jones,Carolyn Johns,B. Timothy Heinmiller,2008-11-20 Canadian Water Politics explores the nature of water use conflicts and the need for institutional designs and reforms to meet the governance challenges now and in the future The editors present an overview of the properties of water the nature of water uses and the institutions that underpin water politics Contributors highlight specific water policy concerns and conflicts in various parts of Canada and cover issues ranging from the Walkerton drinking water tragedy water export policy Great Lakes pollution St Lawrence River shipping Alberta irrigation and oil production and fisheries management on the Atlantic and Pacific coasts

Library and Information Services Division,1983 *Maritime Claims in the Arctic* Erik Franckx,2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East West relations in general the Arctic has increasingly become the focal point of international attention during the last few years Scientific research and environmental protection are areas which have already witnessed some form of international cooperation in the area With this particular evolution in mind a new look at the legal regime of navigation in the Arctic seems to be justified While several other countries border on the Arctic Canada and Russia have the most extensive shorelines and

have shown keen interest in ensuring that their proper share of this area is not encroached by other countries This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them It also explores the need for greater international cooperation in this area not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area **Maritime Affairs--a World Handbook** Alan John Day,1985 Reference book maritime questions law of the sea sea transport marine resources international organizations IMO resources development marine pollution territorial waters exclusive economic zones role of UN ILO Conventions international agreement texts bibliography of maritime periodicals Bibliography statistical tables **Canadiana** ,1985 The Canadian Historical Review ,1984 Includes section Recent publications relating to Canada
