1926-27 the Soviet Central Statistical Administration initiated several yearlong expeditions to gather primary data on the whereabouts economy and living conditions of all rural peoples living in the Arctic and sub Arctic at the end of the Russian civil war Due partly to the enthusiasm of local geographers and ethnographers the Polar Census grew into a massive ethnological exercise gathering not only basic demographic and economic data on every household but also a rich archive of photographs maps kinship charts narrative transcripts and museum artifacts To this day it remains one of the most comprehensive surveys of a rural population anywhere The contributors to this volume all noted scholars in their region have
